**Slices and Lumps** Lee Anne Fennell,2019-09-16 How things are divided up or pieced together matters Half a bridge is of no use at all Conversely many things would do more good if they could be divided up differently Perhaps you would prefer a job that involves a third less work and a third less pay or a car that materializes only when needed and is priced accordingly Difficulties in slicing and lumping shape nearly every facet of how we live and work and a great deal of law and policy as well Lee Anne Fennell explores how both types of challenges carving out useful slices and assembling useful lumps surface in myriad contexts from hot button issues like conservation and eminent domain to developments in the sharing economy to personal struggles over work money time diet and exercise Yet the significance of configuration is often overlooked leading to missed opportunities for improving our lives With a technology fueled entrepreneurial explosion underway that is dividing goods services and jobs in novel ways and as urbanization and environmental threats raise the stakes for assembling resources and cooperation this is an especially exciting and crucial time to confront questions of slicing and lumping The future of the city the workplace the marketplace and the environment all turn on matters of configuration as do the prospects for more effective legal doctrines for better management of finances and health and more This book reveals configuration s power and potential as a unifying concept and as a focus of public and private innovation
