He was concerned with the plight of animals as well as any injustice that he stumbled upon. He did his writing in a small cabin in the mountains above Austin, Nevada. He was excited about a story he was working on when he went to Montana to meet with a retired FBI man. Soon afterward, he is found shot dead in a motel room on the east shore of Flathead Lake. The authorities have ruled it a suicide, but his family does not believe it. I agree to follow Ryan's footsteps from the high desert of central Nevada to Flathead Lake in Montana. The journey turns out to be dangerous and disturbing. This journal is a perfect gift for friends and family male or female. Quotes from the Journals, photos and notes on each day Lewis & Clark were in Montana. Based on the memoir of Stephen Norton Van Blaricom, An Uncommon Journey details the origins of Dawson County, Montana, in the late 1800s. The oldest of nine children, Van Blaricom left home at the age of thirteen and worked for many of northeastern Montana's earliest ranches. After working for the Northern Pacific Railroad, he married Maud Griselle, one of the first female telegraphers for the Northern Pacific. More than a family history, An Uncommon Journey tells the personal stories of many of the first settlers of this last West: buffalo hunters, cattlemen, train drivers, early tradesmen, saloonkeepers, scallywags, and lawmen. This is the story of many of the long-forgotten first settlers of old Dawson County and how they met the challenges of a country that was then primitive and remote at its best and deadly at its worst. For all of them it was, indeed, An Uncommon Journey. This is the perfect logbook to take along on your visit to the great state of Montana. Writing down your thoughts and ideas is a great way to relieve stress. Journals are good for the soul! An account of one year in the Yaak Valley wilderness range, by the acclaimed naturalist and memoirist. Beginning with his family settling in for the long northwestern Montana winter, and capturing all the subtle harbingers of change that mark each passing month—the initial cruel teasing of spring, the splendor and fecundity of summer, and the bittersweet memories evoked by fall—this is a beautiful evocation of the “fauna, flora and folks” in this rugged and spectacular landscape (Publishers Weekly, starred review). It is full of rich observation about what it takes to live in the valley—toughness, improvisation and, of course, duct tape. The Wild Marsh is also poignant, especially as the author reflects on what it means for his young daughters to grow up surrounded by the strangeness and wonder of nature. He shares with them the Yaak’s little secrets—where the huckleberries are best in a dry year, where to find a grizzly’s claw marks in an old cedar—and discovers that passing on this intimate local knowledge, the knowledge of home, is a kind of rare and valuable love. Bass emerges not just as a writer but as a father, a neighbor, and a gifted observer, uniquely able to bring us close to the drama and sanctity of small things, ensuring that though the wilderness is increasingly at risk, the voice of the wilderness will not disappear. “A work of wonder, praise, and thanksgiving for all the marvels of nature, where every aspect is connected and every process has its place. Bass, grounding his book in science well, takes the facts and transforms them, as a musician transforms musical notes, into a work of great beauty. This walk through a year is a walk through the author’s soul, filled with passions, dreams, fears, and the exuberance of Walt Whitman.” —School Library Journal, starred review “Whether the topic is a forest fire in his front yard or the excitement of the first tiny cheerful glacier lilies in spring, Rick Bass is a stirring companion on the trail that leads west from the Walden Pond of Henry David Thoreau and the Sand County of Aldo Leopold.” —Ivan Doig, author of *The Whistling Season* This is a reproduction of a book published before 1923. This book may have occasional imperfections such as missing or blurred pages, poor pictures, errant marks, etc. that were either part of the original artifact, or were introduced by the scanning process.
