Risk and Hyperconnectivity Jun 25 2023 Risk and Hyperconnectivity brings the paradigms of new risk theory, neoliberalization they, and connectivity theory together for the first time to illuminate how the kaleidoscope of risk events in the opening years of the new century has recharged a neoliberal battlespace of media, economy, and security. Probing a series of risk events that have already contoured the twenty-first century, this account shows how both established and emergent media are central in shaping past, present and future horizons of neoliberalism, while also propelling pressure for its alternatives.

Losing Eden Jul 27 2023 A fascinating look at why human beings have a powerful mental, spiritual, and physical need for the natural world—and the profound impact this has on our consciousness and ability to heal the soul and bring solace to the heart, and the cutting-edge scientific evidence proving nature as nurturer. "The connection between mental health and the natural world turns out to be strong and deep—which is good news in that it offers those feeling soul-sick the possibility that falling in love with the world around them might be remarkably helpful." —Bill McKibben Lucy Jones interweaves her deeply personal story of recovery from addiction and depression with that of discovering the natural world and how it aided and enlivened her progress, giving her a renewed sense of belonging and purpose. Jones writes of the intersection of science, wellness, and the environment, and reveals that in the last decade, scientists have begun to formulate theories of why people feel better after a walk in the woods and an experience with the natural world. She describes the recent data that supports evidence of biological and neurological responses: the lowering of cortisol (released in response to stress), the boost in cortical attention control that helps us to concentrate and subdues mental fatigue, and the increase in activity in the parasympathetic nervous system, slowing the heart and allowing the body to rest. "Beautifully written, movingly told and meticulously researched. An elegy to the healing power of nature. A convincing plea for a wilder, richer world." —Isabella Tree, author of Wilding

UPSC: CSAT General Studies Paper-II Solved Paper 2011-2021 Oct 18 2022 9789354881060 | The presented book aim to provide comprehensive, lucid and practice-oriented solutions, This edition is in-sync with the latest examination pattern for CSAT. The presented book covers the questions of the UPSC Civil Service Examination of General Studies in year -wise Solved Papers of the last 11 years CSAT (2011-2021). All chapters have been prepared according to the previous year's UPSC Civil Service Prelims Paper- II. This book helps in gaining good grades in the CSAT Paper -2 and will take you to next stage of UPSC CSE exam. Recommended by Faculties and Read by UPSC Toppers.

Advances in Digital Forensics XII Mar 23 2023 Digital forensics deals with the acquisition, preservation, examination, analysis and presentation of electronic evidence. Networked computing, wireless communications and portable electronic devices have expanded the role of digital forensics beyond traditional computer crime investigations. Practically every crime now involves some aspect of digital evidence; digital forensics provides the techniques and tools to articulate this

evidence. Digital forensics also has myriad intelligence applications. Furthermore, it has a vital role in information assurance -- investigations of security breaches yield valuable information that can be used to design more secure systems. Advances in Digital Forensics XII describes original research results and innovative applications in the discipline of digital forensics. In addition, it highlights some of the major technical and legal issues related to digital evidence and electronic crime investigations. The areas of coverage include: Themes and Issues, Mobile Device Forensics, Network Forensics, Cloud Forensics, Social Media Forensics, Image Forensics, Forensic Techniques, and Forensic Tools. This book is the twelfth volume in the annual series produced by the International Federation for Information Processing (IFIP) Working Group 11.9 on Digital Forensics, an international community of scientists, engineers and practitioners dedicated to advancing the state of the art of research and practice in digital forensics. The book contains a selection of twenty edited papers from the Twelfth Annual IFIP WG 11.9 International Conference on Digital Forensics, held in New Delhi, India in the winter of 2016. Advances in Digital Forensics XII is an important resource for researchers, faculty members and graduate students, as well as for practitioners and individuals engaged in research and development efforts for the law enforcement and intelligence communities. Gilbert Peterson, Chair, IFIP WG 11.9 on Digital Forensics, is a Professor of Computer Engineering at the Air Force Institute of Technology, Wright-Patterson Air Force Base, Ohio, USA. Sujeet Shenoj is the F.P. Walter Professor of Computer Science and a Professor of Chemical Engineering at the University of Tulsa, Tulsa, Oklahoma, USA.

The City Record Nov 30 2023

Social Services Disrupted Mar 30 2021 This book revives the discussion on public social services and their redesign, with a focus on services relating to care and the social inclusion of vulnerable groups, providing rich information on the changes that occurred in the organisation and supply of public social services over the last thirty years in different European places and service fields. Despite the persisting variety in social service models, three shared trends emerge: public sector disengagement, 'vertical re-scaling' of authority and 'horizontal re-mix' in the supply system. The consequences of such changes are evaluated from different perspectives – governance, social and territorial cohesion, labour market, gender – and are eventually deemed 'disruptive' in both economic and social terms. The policy implications of the restructuring are also explored. This title will be Open Access on Elgaronline.com.

Corporate Financing Trends and Balance Sheet Risks in Latin America Aug 16 2022 Easy global liquidity conditions, stronger risk appetite

and a retrenchment in cross-border bank lending led to a surge in emerging market firms' bond issuance in international markets (what we term "The Bon(d)anza"). Using firm-level data for five large Latin American economies, we provide evidence of a significant change in companies' external funding strategies and liability structures after 2010, as well as in the balance sheet risks that firms face. We find that stepped up bond issuance was mostly aimed at re-financing rather than funding investment projects, as firms extended the average duration of their debt while securing lower fixed-rates, reducing roll-over and interest rate risks. The shift towards safer maturity structures has come at the expense of a leveraging-up in foreign-currency-denominated financial debt in several countries— reversing a de-dollarization trend seen during the last decade. We also provide evidence that a substantial part of these bonds were issued through offshore vehicles, suggesting regulatory and tax arbitrage strategies. For some corporations, rising dollar debt and high leverage will be particularly taxing in an environment of US dollar strengthening, less buoyant commodity prices and slowing domestic activity.

Race, Class, and Gentrification in Brooklyn \_\_\_\_\_ Nov 06 2021 In this book, the authors "revisit" two iconic Brooklyn neighborhoods, Crown Heights-Prospect-Lefferts Gardens and Greenpoint-Williamsburg, where they have been active scholars since the 1970s. Krase and DeSena's comprehensive view from the street describes and analyses the neighborhoods' decline and rise with a focus on race and social class. They look closely at the strategies used to resist and promote neighborhood change and conclude with an analysis of the ways in which these neighborhoods contribute to current images and trends in Brooklyn. This book contributes to a better understanding of the elevated status of Brooklyn as a global city and destination place.

The National Politics of EU Enlargement in the Western Balkans  
2022 The National Politics of EU Enlargement in the Western Balkans examines the way in which a number of European Union member states, including Germany and France, formulate their policies towards enlargement in the Western Balkans. The six countries of the Western Balkans – Albania, Bosnia and Herzegovina, Kosovo, Montenegro, North Macedonia and Serbia – are on course to become the next members of the European Union. While there has been a lot of work on the ways in which these countries are preparing for accession, and how the EU as a whole approaches the question of expansion, very little attention has been paid to how individual EU member states regard enlargement into a region that presents a number of serious challenges, including the legacies of the conflicts of the 1990s, economic underdevelopment and poor governance. Focusing on key states, such as Germany, France and Italy, the neighbouring countries of Central and South East Europe, and Britain, once a leading advocate of enlargement that is now in the process of leaving the European Union, this volume casts important new empirical and conceptual light on the diverse motivations that underpin member state attitudes towards EU enlargement. The National Politics of EU Enlargement in the Western Balkans will be of great interest to scholars of the European Union, European politics, and the politics of the Western Balkans. The chapters were originally published as a special issue of Southeast European and Black Sea Studies.

Current Issues in Asian Tourism Sep 16 2022 This comprehensive volume was put together in response to the growing amount of research on tourism in Asia and an increasing number of authors from Asian countries. It concentrates on two aspects of Asian Tourism: first, the Asian tourists themselves, and second, economic development and tourism in the Asian region. The first part of the collection focuses on three areas: the motivations of different types of Asian tourist; the characteristics and behaviour of particular Asian tourist segments; and, finally, an analysis of specific research issues. The second part of the book then goes on to explore the governance and

organisation of tourism in the Asian region, and the nature of Asian growth and competitiveness as it relates to tourism. The articles in this book were originally published in the journal Current Issues in Tourism.

Shifting Power in Asia-Pacific? Jun 01 2021 This book investigates whether a power shift has taken place in the Asia-Pacific region since the end of the Cold War. By systematically examining the development of power dynamics in Asia-Pacific, it challenges the notion that a wealthier and militarily more powerful China is automatically turning the regional tides in its favour. With a special emphasis on Sino-US competition, the book explores the alleged linkage between the regional distribution of relevant material and immaterial capabilities, national power and the much-cited regional power shift. The book presents a novel concept for measuring power in international relations by outlining a composite index on aggregated power (CIAP) that includes 55 variables for 44 regional countries and covers a period of twenty years. Moreover, it develops a middle power theory that outlines the significance of middle powers in times of major power shifts. By addressing political, military and economic cooperation via a structured-focused comparison and by applying a comparative-historical analysis, the book analyses in depth the bilateral relations of six regional middle powers to Washington and Beijing.

useful for UPSC, IAS, PCS, Civil Services Exams.

The Upside of Inequality \_\_\_\_\_ Dec 08 2021 The scourge of America's economy isn't the success of the 1 percent—quite the opposite. The real problem is the government's well-meaning but misguided attempt to reduce the payoffs for success. Four years ago, Edward Conard wrote a controversial bestseller, *Unintended Consequences*, which set the record straight on the financial crisis of 2008 and explained why U.S. growth was accelerating relative to other high-wage economies. He warned that loose monetary policy would produce neither growth nor inflation, that expansionary fiscal policy would have no lasting benefit on growth in the aftermath of the crisis, and that ill-advised attempts to rein in banking based on misplaced blame would slow an already weak recovery. Unfortunately, he was right. Now he's back with another provocative argument: that our current obsession with income inequality is misguided and will only slow growth further. Using fact-based logic, Conard tracks the implications of an economy now constrained by both its capacity for risk-taking and by a shortage of properly trained talent—rather than by labor or capital, as was the case historically. He uses this fresh perspective to challenge the conclusions of liberal economists like Larry Summers and Joseph Stiglitz and the myths of "crony capitalism" more broadly. Instead, he argues that the growing wealth of most successful Americans is not to

blame for the stagnating incomes of the middle and working classes. If anything, the success of the 1 percent has put upward pressure on employment and wages. Conard argues that high payoffs for success motivate talent to get the training and take the risks that gradually loosen the constraints to growth. Well-meaning attempts to decrease inequality through redistribution dull these incentives, gradually hurting not just the 1 percent but everyone else as well. Conard outlines a plan for growing middle- and working-class wages in an economy with a near infinite supply of labor that is shifting from capital-intensive manufacturing to knowledge-intensive, innovation-driven fields. He urges us to stop blaming the success of the 1 percent for slow wage growth and embrace the upside of inequality: faster growth and greater prosperity for everyone.

Advanced Concepts for Renewable Energy Supply of Data Centres Jan 26

2021 The rapid increase of cloud computing, high performance computing (HPC) and the vast growth in Internet and Social Media use have aroused the interest in energy consumption and the carbon footprint of Data Centres. Data Centres primarily contain electronic equipment used for data processing (servers), data storage (storage equipment), and communications (network equipment). Collectively, this equipment processes, stores, and transmits digital information and is known as information technology (IT) equipment. Advanced Concepts for Renewable Energy Supply of Data Centres introduces a number of technical solutions for the supply of power and cooling energy into Data Centres with enhanced utilisation of renewable energy sources in order to achieve low energy Data Centres. Because of the high energy density nature of these unique infrastructures, it is essential to implement energy efficiency measures and reduce consumption before introducing any renewable energy source. A holistic approach is used with the objective of integrating many technical solutions such as management of the IT (Information Technology) load, efficient electrical supply to the IT systems, Low-Ex air-conditioning systems, interaction with district heating and cooling networks, re-use of heat, free cooling (air, seawater, groundwater), optimal use of heat and cold storage, electrical storage and integration in smart grids. This book is therefore a catalogue of advanced technical concepts that could be integrated into Data Centres portfolio in order to increase the

overall efficiency and the share of renewable energies in power and cooling supply. Based on dynamic energy models implemented in TRNSYS some concepts are deeply evaluated through yearly simulations. The results of the simulation are illustrated with Sankey charts, where the energy flows per year within the subsystems of each concept for a selected scenario are shown, and graphs showing the results of parametric analysis. A set of environmental metrics (as the non-renewable primary energy) and financial metrics (CAPEX and OPEX) as well of energy efficiency metrics like the well-known PUE, are described and used to evaluate the different technical concepts.

Global Challenges in the Arctic Region Feb 27 2021 Bringing together interconnected discussions to make explicit the complexity of the Arctic region, this book offers a legal discussion of the ongoing territorial disputes and challenges in order to frame their impact into the viability of different governance strategies that are available at the national, regional and international level. One of the intrinsic features of the region is the difficulty in the determination of boundaries, responsibilities and interests. Against this background, sovereignty issues are intertwined with environmental and geopolitical issues that ultimately affect global strategic balances and international trade and, at the same time, influence national approaches to basic rights and organizational schemes regarding the protection of indigenous peoples and inhabitants of the region. This perspective lays the ground for further discussion, revolving around the main clusters of governance (focusing on the Arctic Council and the European Union, with the particular roles and interest of Arctic and non-Arctic states, and the impact on indigenous populations), environment (including the relevance of national regulatory schemes, and the intertwinement with concerns related to energy, or migration), strategy (concentrating in geopolitical realities and challenges analysed from different perspectives and focusing on different actors, and covering security and climate change related challenges). This collection provides an avenue for parallel and converging research of complex realities from different disciplines, through the expertise of scholars from different latitudes.

EU Leadership in Energy and Environmental Governance Nov 18 2022 This edited collection focuses on the impact of the changing global distribution of power on the EU's energy policy and ability to project its approach to energy-related issues abroad. It maps the EU's changing position on global energy, the impact of various factors on its energy policy, and its relations with Russia, China, the USA and Brazil.

Governance and Societal Adaptation in Fragile States Apr 23 2023 This book examines the various ways in which some fragile states in the Global South (or states with limited statehood) have adopted, and

adapted to, processes of governance in their quests to address the socialized problems affecting their societies. It tells the story of these states' resilience in the societal adaptation to a liberalized notion of governance. In addition to comparative case studies, the book also analyzes the engendered interplay of culture, economics, and politics in the creation of people-centric governance reforms. The contributing authors shed light on weak states' often constructive engagement in the promotion of state governance under a variety of societal conditions, adverse or otherwise, and on their ability to remain resilient despite the complexities of the political and economic challenges they face.

ECRM2014-Proceedings of the 13th European Conference on Research Methodology for Business and Management Studies Sep 28 2023

Environmental Success Stories Sep 04 2021 Unlike many titles on environmental issues that portend a dark future, *Environmental Success Stories* delves into the most daunting ecological and environmental challenges humankind has faced and shows how scientists, citizens, and a responsive public sector have dealt with them successfully. In addition to presenting the basic chemical and environmental science underlying problems like providing clean drinking water, removing DDT and lead from agriculture and our homes, and curtailing industrial pollution, this book also discusses the political actors, agency regulators, and community leaders who have collaborated to enact effective legislation. Sharing the stories of the people, organizations, and governments who have addressed these problems successfully, Frank M. Dunnivant explains how we might confront the world's largest and most complex environmental crisis: climate change. Now is the time for rededicated scientific exploration and enlightened citizen action to save our environment, and Dunnivant's book offers a stirring call to action.

Writing Kit Carson Mar 11 2022 In this critical biography, Susan Lee Johnson braids together lives over time and space, telling tales of two white women who, in the 1960s, wrote books about the fabled frontiersman Christopher "Kit" Carson: Quantrille McClung, a Denver librarian who compiled the *Carson-Bent-Boggs Genealogy*, and Kansas-born but Washington, D.C.- and Chicago-based Bernice Blackwelder, a singer on stage and radio, a CIA employee, and the author of *Great Westerner: The Story of Kit Carson*. In the 1970s, as once-celebrated figures like Carson were falling headlong from grace, these two amateur historians kept weaving stories of western white men, including those who married American Indian and Spanish Mexican women, just as Carson had wed Singing Grass, Making Out Road, and Josefa Jaramillo. Johnson's multilayered biography reveals the nature of relationships between women historians and male historical subjects and between history buffs and professional historians. It explores the

practice of history in the context of everyday life, the seductions of gender in the context of racialized power, and the strange contours of twentieth-century relationships predicated on nineteenth-century pasts. On the surface, it tells a story of lives tangled across generation and geography. Underneath run probing questions about how we know about the past and how that knowledge is shaped by the conditions of our knowing.

Experimental IR Meets Multilinguality, Multimodality, and Interaction Feb 07 2022 This book constitutes the refereed proceedings of the 8th International Conference of the CLEF Initiative, CLEF 2017, held in Dublin, Ireland, in September 2017. The 7 full papers and 9 short papers presented together with 6 best of the labs papers were carefully reviewed and selected from 38 submissions. In addition, this volume contains the results of 10 benchmarking labs reporting their year long activities in overview talks and lab sessions. The papers address all aspects of information access in any modality and language and cover a broad range of topics in the field of multilingual and multimodal information access evaluation.

8 Year-wise MH-CET (MBA / MMS) Solved Papers (2014 - 2021) 2nd Edition May 05 2024 The book 8 Year-wise MH-CET (MBA / MMS) Solved Papers (2014 - 2021) covers Previous Year Solved Papers from 2014 to 2021 with detailed solutions. The Past Papers will guide you in terms of understanding the Pattern, Types of Questions & their Level of Difficulty. Each Paper covers Logical & Abstract Reasoning, Quantitative Aptitude and Verbal Ability & Reading Comprehension. The solutions are provided immediately after each Paper.
