This innovative case-based question-and-answer study guide to neuroradiology is geared to neurology and neurosurgery residents, medical students, and resident graduates preparing for the neurology and neuroradiology boards. The book presents 101 cases from adult neurology, pediatric neurology, and neurosurgery practice covering all major neuroradiology topics. Each case begins with one or more high-resolution images, a brief history, and questions, with answers and detailed explanations on the next page. Cases are presented in random order, rather than grouped by classification, so that readers will approach each case image with no prior clue to the diagnosis. The cases, questions, and answers will also be available on a companion Website . This book presents a wide-ranging series of illustrative clinical cases that cover the main pathologies and areas of interest in diagnostic and therapeutic neuroradiology. The aim is to enable the reader to learn important lessons from real cases that exemplify the caseload and capabilities of a large, modern neuroradiology department. The cases are presented in a quiz format. For each one, the first page documents clinical and imaging findings, followed by questions concerning these findings, differential diagnosis, and other aspects. On the second page, the answers are provided, with concise explanation and discussion. Attention is also drawn to the relevant available literature. Most of the cases derive from the Department of Neuroradiology at the University Hospital Center of Porto (Portugal), which is staffed by a large multidisciplinary team providing cutting-edge services. In addition, some cases from other centers have been included to ensure wider representation of experience. The book will be of particular value for residents and fellows in neuroradiology, radiology, neurology, and neurosurgery. The accessible, easy-to-follow guide that demystifies documentation management When it comes to receiving documentation to confirm good science, U.S. and international regulators place high demands on the healthcare industry. As a result, companies developing and manufacturing therapeutic products must implement a strategy that allows them to properly manage their records and documents, since they must comply with rigorous standards and be available for regulatory review or inspection at a moment's notice. Written in a user-friendly Q&A style for quick reference, *Managing the Documentation Maze* provides answers to 750 questions the authors encounter frequently in their roles as consultants and trainers. In simple terms, this handy guide breaks down the key components that facilitate successful document management, and shows why it needs to be a core discipline in the industry with information on: Compliance with regulations in pharmaceutical, biological, and device record keeping Electronic systems, hybrid systems, and the entire scope of documentation that companies must manage How to write and edit documents that meet regulatory compliance Making the transition to an electronic system, including how to validate and document the process Anyone responsible for managing documents in the health field will find this book to be a trusted partner in unraveling the bureaucratic web of confusion, while it initiates a plan on how to put an effective, lasting system in place—one that will stand up to any type of scrutiny. Unlike traditional vignettes, these case studies evolve over time as real-life situations, better enabling students to develop the skills they need to problem solve, actively engage, and use critical thinking techniques in new situations. The unfolding case study method also assists in the development of skills that are important for nursing students about to embark on the NCLEX-RN. The text incorporates all types of NCLEX-style questions into the unfolding case studies to facilitate exam preparation. This method offers a unique study opportunity that integrates all fundamental concepts and skills application with practice and professional role responsibilities. The patient care content areas that are needed for NCLEX-RN success--safe and effective care, health promotion, physiological and psychological integrity--are interwoven into an engaging format. References at the end of each chapter provide guidance for additional study as needed. Electronic and web resources provide quick access to valuable web-delivered information that will be useful in a clinical setting. eBook versions of this text will take the reader directly to the web resource. Six comprehensive sample tests with 75 questions each are also included. The book continues the light-hearted approach of the Incredibly Easy! Series™, and familiar cartoon characters from the series provide support for the reader and point out vital information. The brain is the most complex organ in our body. Indeed, it is perhaps the most complex structure we have ever encountered in nature. Both structurally and functionally, there are many peculiarities that differentiate the brain from all other organs. The brain is our connection to the world around us and by governing nervous system and higher function, any disturbance induces severe neurological and psychiatric disorders that can have a devastating effect on quality of life. Our understanding of the physiology and biochemistry of the brain has improved dramatically in the last two decades. In particular, the critical role of cations, including magnesium, has become evident, even if incompletely understood at a mechanistic level. The exact role and regulation of magnesium, in particular, remains elusive, largely because intracellular levels are so difficult to routinely quantify. Nonetheless, the importance of magnesium to normal central nervous system activity is self-evident given the complicated homeostatic mechanisms that maintain the concentration of this cation within strict limits essential for normal physiology and metabolism. There is also considerable accumulating evidence to suggest alterations to some brain functions in both normal and pathological conditions may be linked to alterations in local magnesium concentration. This book, containing chapters written by some of the foremost experts in the field of magnesium research, brings together the latest in experimental and clinical magnesium research as it relates to the central nervous system. It offers a complete and updated view of magnesiums involvement in central nervous system function and in so doing, brings together two main pillars of contemporary neuroscience research, namely providing an explanation for the molecular mechanisms involved in brain function, and emphasizing the connections between the molecular changes and behavior. It is the untiring efforts of those magnesium researchers who have dedicated their lives to unraveling the mysteries of magnesiums role in biological systems that has inspired the collation of this volume of work. Co-Published with the National Association of Clinical Nurse Specialists (NACNS) to provide you with invaluable guidance for acing your Adult-Gerontology CNS exam! This comprehensive review manual provides the ultimate resource for either the AACN Adult-Gerontology Clinical Nurse Specialist Wellness Through Acute Care (ACCNS-AG) or the ANCC Adult-Gerontology Clinical Nurse Specialist (AGCNS-BC) certification exam. It incorporates both current test plans and the most recent NACNS core competencies, encompassing all the essential knowledge you need to pass the exam and succeed in practice. Written by certified Clinical Nurse Specialist educators and practitioners, this guide begins with an overview of both exams, study tips, and test-taking strategies to help you prepare for the big day. The manual is then organized into three sections according to the Three Spheres of Impact for CNS Practice. Patient Direct Care: covers health assessment, diagnostic reasoning, pharmacology, and pathophysiology Nurses & Nursing Practice: reviews health maximization, consultation, advocacy, culturally competent care, and coaching and mentoring Organizations & Systems: features sections on leadership, QI/safety, outcomes, research, and evidence-based practice Adult-Gerontology Clinical Nurse Specialist Certification Review provides a targeted, systematic review for the ACCNS-AG and AGCNS-BC exams with end-of-chapter review questions and a FULL practice test that includes answers and rationales in an easy-to-digest format. Key Features: Reflects the latest AACN and ANCC

test plans Incorporates the updated NACNS Core Competencies and the AACN Scope and Standards for CNS Practice Edited and authored by certified Clinical Nurse Specialist educators and practitioners Includes end-of-chapter review questions, PLUS a valuable 175-question practice test with rationales for self-assessment Purchase includes digital access for use on most mobile devices or computers This book elucidates the radiation therapy protocols and procedures for the management of adult patients presenting with primary benign and malignant central nervous system tumors. With the development of new treatment strategies and rapid advancement of radiation technology, it is crucial for radiation oncologists to maintain and refine their knowledge and skills. Dedicated exclusively to adult CNS radiation oncology, this textbook explores CNS tumors ranging from the common to the esoteric as well as secondary cancers of metastatic origin. The first half of the book is organized anatomically: tumors of the brain, spinal cord, leptomeninges, optic pathway, ocular choroid, and skull base. The second half covers primary CNS lymphoma, rare CNS tumors, metastatic brain disease, vascular conditions of the CNS, radiation-associated complications, and radiation modalities. Each chapter provides guidance on treatment field design, target delineation, and normal critical structure tolerance constraints in the context of the disease being treated. Learning objectives, case studies, and Maintenance of Certification Self-Assessment Continuing Medical Education-style questions and answers are incorporated throughout the book. This is an ideal guide for radiation oncologists, residents, and fellows, but medical students may also find value in the text. Includes: Multiple choice fact, scenario and case-based questions Correct answers and explanations to help you quickly master specialty content All questions have keywords linked to additional online references The mission of StatPearls Publishing is to help you evaluate and improve your knowledge base. We do this by providing high quality, peer-reviewed, educationally sound questions written by leading educators. StatPearls Publishing ***Includes Practice Test Questions*** Adult-Gerontology CNS Exam Secrets helps you ace the Adult-Gerontology Clinical Nurse Specialist Exam without weeks and months of endless studying. Our comprehensive Adult-Gerontology CNS Exam Secrets study guide is written by our exam experts, who painstakingly researched every topic and concept that you need to know to ace your test. Our original research reveals specific weaknesses that you can exploit to increase your exam score more than you've ever imagined. Adult-Gerontology CNS Exam Secrets includes: The 5 Secret Keys to CNS Exam Success: Time is Your Greatest Enemy, Guessing is Not Guesswork, Practice Smarter, Not Harder, Prepare, Don't Procrastinate, Test Yourself; A comprehensive General Strategy review including: Make Predictions, Answer the Question, Benchmark, Valid Information, Avoid Fact Traps, Milk the Question, The Trap of Familiarity, Eliminate Answers, Tough Questions, Brainstorm, Read Carefully, Face Value, Prefixes, Hedge Phrases, Switchback Words, New Information, Time Management, Contextual Clues, Don't Panic, Pace Yourself, Answer Selection, Check Your Work, Beware of Directly Quoted Answers, Slang, Extreme Statements, Answer Choice Families; A comprehensive Content review including: Direct Care, Professional Practice, Systems Leadership/Quality/Outcomes, and much more... The second edition of Neurosurgery Rounds: Questions and Answers Neurosurgery Rounds: Questions and Answers, Second Edition by Mark Shaya and an impressive cadre of coauthors and contributors, thoroughly prepares medical students and residents for common yet challenging questions frequently encountered during neurosurgery rounds. The convenient, easy-to-follow format provides diverse coverage of multiple disciplines intertwined in the understanding, care, and treatment of neurosurgical patients. Bringing the state of the art in neurosurgery up to date, nine revised and expanded chapters cover a full range of congenital, degenerative, traumatic, neoplastic, infectious, vascular, and inflammatory conditions impacting the brain, spine and peripheral nerves. Short answers and explanations appear directly below the questions, enabling quick reference during busy hospital shifts. Key Features More than 1,600 questions and answers test readers on a wide range of basic neuroscience, brain, spine, and peripheral nerve topics 30 featured cases provide invaluable clinical pearls and insightful discussions More than 175 high-quality radiographs and anatomical illustrations enhance the text This concise review is an essential lab coat companion for all medical students pursuing neurosurgical clerkships or sub-internships and junior residents on rounds.
