[The Genius of Japanese Carpentry](#) Jun 13 2022 The Genius of Japanese Carpentry tells the story of the 1200-year-old Yakushiji monastery in Nara and the dedicated modern-day craftsmen who are working to restore what has been lost to the depredations of time, fire and warfare. Although the full monastery reconstruction will not be completed until 2030, one of the main temples, the Picture Hall, has been completely restored employing the same woodworking technology used to create the original building. This new edition of an architectural classic is by Azby Brown—one of the world's leading experts on Japanese architecture. It contains a new preface and many new text materials and photographs—most of them now available in color for the first time. Azby Brown chronicles the painstaking restoration of the temple through extensive interviews with the carpenters and woodworkers along with original drawings based on the plans of master carpenter Tsunekazu Nishioka. An inspiring testament to the dedication of these craftsmen and their philosophy of carpentry work as a form of personal fulfillment, The Genius of Japanese Carpentry offers detailed documentation of this singular project and a moving reminder of the unique cultural continuity found in Japan.

A Carpenter's Life as Told by Houses May 25 2023 "From one of Fine Homebuilding's best-loved authors, Larry Haun, comes a unique story that

looks at American home building from the perspective of twelve houses he has known intimately. Part memoir, part cultural history, *A Carpenter's Life as Told by Houses* takes the reader house by house over an arc of 100 years. Along with period photos, the author shows us the sod house in Nebraska where his mother was born, the frame house of his childhood, the production houses he built in the San Fernando Valley, and the Habitat for Humanity homes he devotes his time to now. It's an engaging read written by a veteran builder with a thoughtful awareness of what was intrinsic to home building in the past and the many ways it has evolved. Builders and history lovers will appreciate his deep connection to the natural world, yearning for simplicity, respect for humanity, and evocative notion of what we mean by "home."--

Modern Carpentry and Building Aug 28 2023 Excerpt from Modern Carpentry and Building: Giving Methods of Obtaining the Various Cuts in Carpentry Fourteen years ago The Modern Carpenters' Companion and Builders' Guide was issued, and has since met with a sale of ten thousand copies; which, considering the fact that it has been advertised but very little indeed, shows that it met a want. Some complaint has been made that the illustrations did not always come opposite the descriptions, and many have expressed a desire for a much larger number of floor plans of modern residences, accompanied by elevations or perspectives to show the general style of exterior finish; others wanted complete framing plans and specifications. For many reasons it has been deemed best to remodel and add to this book, thus bringing it up to date, and meeting most of the above

mentioned requirements, and to distinguish this revised book from the former one, it has been decided to call it Modern Carpentry and Building. It must not be inferred that this is a thorough, complete and exhaustive work on carpentry, dealing with framing odd shaped structures, groined arches, and the like.
