Student Exploration: pH Analysis: Quad Color Indicator

Vocabulary: acid, acidic, alkaline, base, indicator, neutral, pH

Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

- Acids** are substances that produce hydrogen ions (H^+) when dissolved in water. Lemon juice is an example of an acid.
 - What does lemon juice taste like? sour
 - What does it feel like if lemon juice gets in your eye? burns
- Bases** are substances that produce hydroxide ions (OH^-) when dissolved in water. Hand soap is an example of a base.
 - What does soap feel like? slippery, smooth
 - What does soap taste like? sour, bad
 - What does it feel like if soap gets in your eye? burns

Gizmo Warm-up

The strength of an acid or base is measured on the **pH** scale. The term "pH" is short for "potential of hydrogen." It is a measure of how many excess H^+ ions there are in a solution. The pH scale runs from 0 to 14, with 0 representing the highest concentration of hydrogen ions. **Acidic** substances have a pH below 7, while **alkaline** substances (bases) have a pH above 7. Pure water has a pH of 7 and is considered **neutral**.

The *pH Analysis: Quad Color Indicator* Gizmo™ allows you to find the pH of a variety of liquids. In the Gizmo, check that the **Substance in the tube** is **Ammonia**, and click **Test**.

- Indicators** change color in acids or bases. What are the colors of the pH paper?
orange, coral pink, blue, yellow
- Compare the paper to the **pH color chart**. What is the pH of ammonia? 11
Is ammonia acidic or alkaline? alkaline

Boden, 2006 Cognitive science is among the most fascinating intellectual achievements of the modern era The quest to understand the mind is an ancient one But modern science has offered new insights and techniques that have revolutionized this enquiry Oxford University Press now presents a masterly history of the field told by one of its most eminent practitioners Psychology is the thematic heart of cognitive science which aims to understand human and animal minds But its core theoretical ideas are drawn from cybernetics and artificial intelligence and many cognitive scientists try to build functioning models of how the mind works In that sense Margaret Boden suggests its key insight is that mind is a very special machine Because the mind has many different aspects the field is highly interdisciplinary It integrates psychology not only with cybernetics AI but also with neuroscience and clinical neurology with the philosophy of mind language and logic with linguistic work on grammar semantics and communication with anthropological studies of cultures and with biological and A Life research on animal behaviour evolution and life itself Each of these disciplines in its own way asks what the mind is what it does how it works how it develops and how it is even possible Boden traces the key questions back to Descartes s revolutionary writings and to the ideas of his followers and his radical critics through the eighteenth and nineteenth centuries Her story shows how controversies in the development of experimental physiology neurophysiology psychology evolutionary biology embryology and logic are still relevant today Then she guides the reader through the complex interlinked paths along which the study of mind developed in the twentieth century Cognitive science covers all mental phenomena not just cognition knowledge but also emotion personality psychopathology social communication religion motor action and consciousness In each area Boden introduces the key ideas and researchers and discusses those philosophical critics who see cognitive science as fundamentally misguided And she sketches the waves of resistance and acceptance on the part of the media and general public showing how these have affected the development of the field No one else could tell this story as Boden can she has been a member of the cognitive science community since the late 1950s and has known many of its key figures personally Her narrative is written in a lively swift moving style enriched by the personal touch of someone who knows the story at first hand Her history looks forward as well as back besides asking how state of the art research compares with the hopes of the early pioneers she identifies the most promising current work Mind as Machine will be a rich resource for anyone working on the mind in any academic discipline who wants to know how our understanding of mental capacities has advanced over the years **ACADIA ... Our Patchwork Nation Dante Chinni,James Gimpel Ph.D.,2011-10-04 A revolutionary new way to understand America's complex cultural and political landscape with proof that local communities have a major impact on the nation's behavior in the voting booth and beyond In a climate of culture wars and tremendous economic uncertainty the media have often reduced America to a simplistic schism between red states and blue states In response to that oversimplification journalist Dante Chinni teamed up with political geographer James Gimpel to launch the Patchwork Nation

project using on the ground reporting and statistical analysis to get past generalizations and probe American communities in depth The result is *Our Patchwork Nation* a refreshing sometimes startling look at how America s diversities often defy conventional wisdom Looking at the data they recognized that the country breaks into twelve distinct types of communities and old categories like soccer mom and working class don t matter as much as we think Instead by examining Boom Towns Evangelical Epicenters Military Bastions Service Worker Centers Campus and Careers Immigration Nation Minority Central Tractor Community Mormon Outposts Emptying Nests Industrial Metropolises and Monied Burbs the authors demonstrate the subtle distinctions in how Americans vote invest shop and otherwise behave reflect what they experience on their local streets and in their daily lives *Our Patchwork Nation* is a brilliant new way to debate and examine the issues that matter most to our communities and to our nation
