**Agility** Feb 07 2022 As the Fourth Industrial Revolution barrels forward and the pace of disruption accelerates, all organizations must operate with agility. But this urgent priority, now widely-accepted by senior leaders, presents a major challenge: In business, government, and warfare, agility is a buzzword. There is no common understanding of what it means, or of what it takes to be consistently agile. In this groundbreaking book, Leo Tilman and Charles Jacoby offer the first comprehensive assessment of the fundamental nature of organizational agility and then describe the essential leadership practices for achieving it. They show that agility is far superior to mere speed or adaptability. Pinpointing its distinctive features, they define agility as the ability to detect and assess changes in the competitive environment in real time and then take decisive action. They demonstrate that agility enables an organization to outmaneuver competitors by seizing opportunities; better defending against threats; and acting as a well-orchestrated collective of teams that are empowered to take disciplined initiative. Combining their personal experience of building and leading agile organizations, Tilman in the realm of business and finance and Jacoby in battlefield command and homeland security, they present a powerful approach to fostering agility up and down an organization, and out to its very edges. They show how to detect opportunities and threats

by fighting for risk intelligence; how to pierce through complexity and unleash creativity by nurturing a culture of honesty and trust; how to meld top-down vision and planning with decentralized execution; and how to enhance strategy by recognizing organizations as dynamic portfolios of risk. In a world where leaders and their teams must brave the unknown and step confidently forward – or risk extinction – Agility provides a vital roadmap for seizing the unprecedented possibilities of the new age and dominating change instead of being dominated by it.

**The Decentralized Energy Revolution** Sep 16 2022 The global energy system stands at the verge of a far-reaching paradigm shift. The established model of centralized supply services will be challenged by new, decentralized technologies, with Germany being an international role model for energy efficiency and renewable energy generation.

*Making China Modern* Jan 09 2022 Klaus Mühlhahn situates modern China in the nation's long, dynamic tradition of overcoming adversity and weakness through creative adaptation--a legacy of crisis and recovery that is apparent today in China's triumphs but also in its most worrisome trends. Mühlhahn's panoramic survey rewrites the history of modern China for a new generation.

**The Murder of Rosa Luxemburg** Sep 04 2021 On the tracks of the killers of Rosa Luxemburg The cold-blooded murder of revolutionary icons Rosa Luxemburg and Karl Liebknecht in the pitched political battles of post-WWI Germany marks one of the greatest tragedies of the 20th century. No other political assassination inflamed popular passions and transformed Germany's political climate as that killing in the night of 15-16 January 1919 in front of the luxurious Hotel Eden. It not only cut short the lives of two of the country's most brilliant political leaders, but also inaugurated a series of further political assassinations designed to snuff out the revolutionary flame and, ultimately, pave the way for the ultra-reactionary forces that would take power in 1933. To commemorate the 100th anniversary of their untimely deaths, Klaus Gietinger has carefully reconstructed the events on that fateful night, digging deep into the archives to identify who exactly was responsible for the murder, and what forces in high-placed positions had a hand in facilitating it and protecting the culprits.

*Endgame* Oct 06 2021 A step by step analysis of the future we can expect.

**Artificial Intelligence and the Fourth Industrial Revolution** Dec 08 2021 This book presents the overall technology spectrum in artificial intelligence (AI) and the Fourth Industrial Revolution, which is set to revolutionize the world. It discusses their various aspects and related case studies from industry, academics, administration, law, finance, and accounting as well as educational technology. The contributors, who are experts in their respective fields and from industry and academia, focus on a gesture-recognition prototype for specially abled people; jurisprudential approach to AI and legal reasoning; automated chatbot for autism spectrum disorder using AI assistance; Big Data analytics and Internet of Things (IoT); role of AI in advancement of drug discovery; development,

opportunities, and challenges of the Fourth Industrial Revolution; legal, ethical, and policy implications of AI; Internet of Health Things for smart healthcare and digital wellbeing; machine learning and computer vision; computer vision-based system for automation and industrial applications; AI-IoT in home-based healthcare; and AI in super-precision human brain and spine surgery. Buttressed with comprehensive theoretical, methodological, well-established, and validated empirical examples, the book covers the interests of a broad audience from basic science to engineering and technology experts and learners. It will be greatly helpful for CEOs, entrepreneurs, academic leaders, researchers, and students of engineering, biomedicine, and master's programs in science as well as the vast workforce and students with technical or non-technical backgrounds. It also serves common public interest by presenting new methods to improve the quality of life in general, with a better integration into society.

**Technocracy** Jan 26 2021 This book identifies the birth, evolution, and intrusive nature of the exploitation of science and technology by a group, accurately and adequately identified as technocrats.

*Covid-19: The Great Reset* Feb 02 2024 "The Corona crisis and the Need for a Great Reset" is a guide for anyone who wants to understand how COVID-19 disrupted our social and economic systems, and what changes will be needed to create a more inclusive, resilient and sustainable world going forward. Thierry Malleret, founder of the Monthly Barometer, and Klaus Schwab, founder and executive Chairman of the World Economic Forum, explore what the root causes of these crisis were, and why they lead to a need for a Great Reset. Theirs is a worrying, yet hopeful analysis. COVID-19 has created a great disruptive reset of our global social, economic, and political systems. But the power of human beings lies in being foresighted and having the ingenuity, at least to a certain extent, to take their destiny into their hands and to plan for a better future. This is the purpose of this book: to shake up and to show the deficiencies which were manifest in our global system, even before COVID broke out.

**The Seventh Sense** Mar 30 2021 NEW YORK TIMES BESTSELLER WASHINGTON POST BESTSELLER Winner of the getAbstract 17th International Book Award "The Seventh Sense is a concept every businessman, diplomat, or student should aspire to master--a powerful idea, backed by stories and figures that will be impossible to forget." -- Walter Isaacson, author of Steve Jobs and Leonardo da Vinci Endless terror. Refugee waves. An unfixable global economy. Surprising election results. New billion-dollar fortunes. Miracle medical advances. What if they were all connected? What if you could understand why? The Seventh Sense is the story of what all of today's successful figures see and feel: the forces that are invisible to most of us but explain everything from explosive technological change to uneasy political ripples. The secret to power now is understanding our new age of networks. Not merely the Internet, but also webs of trade, finance, and even DNA. Based on his years of advising generals, CEOs, and politicians,

Ramo takes us into the opaque heart of our world's rapidly connected systems and teaches us what the losers are not yet seeing--and what the victors of this age already know.

*Overcoming Indifference* Aug 04 2021 Many brief essays by Nobel Prize winners, statesmen, scholars, and CEOs discuss challenges facing world leaders, and potential solutions. Topics include the disintegration of value systems, maintaining global security, overcoming discrimination, sustainability, the new information society, employment, national policy-making, and reengineering the corporation. There is little in the way of bibliographic material and references. Annotation copyright by Book News, Inc., Portland, OR

**Technology Governance** Aug 16 2022 This book is probably one of the first on the subject of Technology Governance. It builds up the concept of governance and IT governance and formalizes the definition of technology. The concept of streams of technology is introduced. The other new concepts introduced are those of speed of business and speed of technology. The concept of technology governance is built on these basic concepts. The necessity of practicing technology governance as against IT governance has been discussed and proven. The shortcomings in the standards, best practices and codes that relate to technology governance are discussed and recommendations have been made to enhance these to cater to technology governance. The book also lays down a reference model for technology governance, a road map for the implementation of technology governance and gives guidance for the assessment of technology governance in an enterprise. This book may prove to be the foundation of the new field of technology governance.

**Shaping the Fourth Industrial Revolution** Nov 30 2023 The Fourth Industrial Revolution is changing everything - from the way we relate to each other, to the work we do, the way our economies work, and what it means to be human. We cannot let the brave new world that technology is currently creating simply emerge. All of us need to help shape the future we want to live in. But what do we need to know and do to achieve this? In *Shaping the Fourth Industrial Revolution*, Klaus Schwab explores how people from all backgrounds and sectors can influence the way that technology transforms our world. Drawing on contributions by more than 200 of the world's leading technology, economic and sociological experts to present a practical guide for citizens, business leaders, social influencers and policy-makers this book outlines the most important dynamics of the technology revolution, highlights important stakeholders that are often overlooked in our discussion of the latest scientific breakthroughs, and explores 12 different technology areas central to the future of humanity. Emerging technologies are not predetermined forces out of our control, nor are they simple tools with known impacts and consequences. The exciting capabilities provided by artificial intelligence, distributed ledger systems and cryptocurrencies, advanced materials and biotechnologies are already transforming society. The actions we take today - and those we don't - will quickly

become embedded in ever-more powerful technologies that surround us and will, very soon, become an integral part of us. By connecting the dots across a range of often-misunderstood technologies, and by exploring the practical steps that individuals, businesses and governments can take, *Shaping the Fourth Industrial Revolution* helps equip readers to shape a truly desirable future at a time of great uncertainty and change.

*Digital Kenya* Nov 18 2022 This book is open access under a CC BY 4.0 license. Presenting rigorous and original research, this volume offers key insights into the historical, cultural, social, economic and political forces at play in the creation of world-class ICT innovations in Kenya. Following the arrival of fiber-optic cables in 2009, *Digital Kenya* examines why the initial entrepreneurial spirit and digital revolution has begun to falter despite support from motivated entrepreneurs, international investors, policy experts and others. Written by engaged scholars and professionals in the field, the book offers 15 eye-opening chapters and 14 one-on-one conversations with entrepreneurs and investors to ask why establishing ICT start-ups on a continental and global scale remains a challenge on the “Silicon Savannah”. The authors present evidence-based recommendations to help Kenya to continue producing globally impactful ICT innovations that improve the lives of those still waiting on the side-lines, and to inspire other nations to do the same.

**Cultivated Building Materials** May 13 2022 NEXT GENERATION BUILDING MATERIALS The 21st century faces a radical change in how we produce construction materials – a shift towards cultivating, breeding, raising, farming, or growing future resources. This book presents innovative industrialized production methods for cultivated building materials, like cement grown by bacteria, bricks made of mushroom mycelium, or bamboo fibers as reinforcement for concrete. Spanning from scientific research to product development and architectural application, this book builds a bridge between the academic and the professional world of architecture. The book describes the challenges, strategies, and goals in the first part, followed by a second part on bamboo, A cultivated building material and a number of examples in the third part which form the bridge from cultivated materials to building products.

**A Revolution in Language** May 01 2021 What is the relationship between the ideas of the Enlightenment and the culture and ideology of the French Revolution? This book takes up that classic question by concentrating on changing conceptions of language and, especially, signs during the second half of the eighteenth century. The author traces, first, the emergence of a new interest in the possibility of gestural communication within the philosophy, theater, and pedagogy of the last decades of the Old Regime. She then explores the varied uses and significance of a variety of semiotic experiments, including the development of a sign language for the deaf, within the language politics of the Revolution. *A Revolution in Language* shows not only that many key revolutionary thinkers were unusually preoccupied by questions of language, but also that prevailing

assumptions about words and other signs profoundly shaped revolutionaries' efforts to imagine and to institute an ideal polity between 1789 and the start of the new century. This book reveals the links between Enlightenment epistemology and the development of modern French political culture.

**Stakeholder Capitalism** Mar 03 2024 Reimagining our global economy so it becomes more sustainable and prosperous for all Our global economic system is broken. But we can replace the current picture of global upheaval, unsustainability, and uncertainty with one of an economy that works for all people, and the planet. First, we must eliminate rising income inequality within societies where productivity and wage growth has slowed. Second, we must reduce the dampening effect of monopoly market power wielded by large corporations on innovation and productivity gains. And finally, the short-sighted exploitation of natural resources that is corroding the environment and affecting the lives of many for the worse must end. The debate over the causes of the broken economy—laissez-faire government, poorly managed globalization, the rise of technology in favor of the few, or yet another reason—is wide open. *Stakeholder Capitalism: A Global Economy that Works for Progress, People and Planet* argues convincingly that if we don't start with recognizing the true shape of our problems, our current system will continue to fail us. To help us see our challenges more clearly, Schwab—the Founder and Executive Chairman of the World Economic Forum—looks for the real causes of our system's shortcomings, and for solutions in best practices from around the world in places as diverse as China, Denmark, Ethiopia, Germany, Indonesia, New Zealand, and Singapore. And in doing so, Schwab finds emerging examples of new ways of doing things that provide grounds for hope, including: Individual agency: how countries and policies can make a difference against large external forces A clearly defined social contract: agreement on shared values and goals allows government, business, and individuals to produce the most optimal outcomes Planning for future generations: short-sighted presentism harms our shared future, and that of those yet to be born Better measures of economic success: move beyond a myopic focus on GDP to more complete, human-scaled measures of societal flourishing By accurately describing our real situation, *Stakeholder Capitalism* is able to pinpoint achievable ways to deal with our problems. Chapter by chapter, Professor Schwab shows us that there are ways for everyone at all levels of society to reshape the broken pieces of the global economy and—country by country, company by company, and citizen by citizen—glue them back together in a way that benefits us all.

*Shaping the Future of the Fourth Industrial Revolution* May 05 2024 World Economic Forum Founder and Executive Chairman Klaus Schwab offers a practical companion and field guide to his previous book, *The Fourth Industrial Revolution*. Today, technology is changing everything--how we relate to one another, the way we work, how our economies and governments function, and even what it means to be human. One need not

look hard to see how the incredible advances in artificial intelligence, cryptocurrencies, biotechnologies, and the internet of things are transforming society in unprecedented ways. But the Fourth Industrial Revolution is just beginning, says Schwab. And at a time of such tremendous uncertainty and such rapid change, he argues it's our actions as individuals and leaders that will determine the trajectory our future will take. We all have a responsibility - as citizens, businesses, and institutions - to work with the current of progress, not against it, to build a future that is ethical, inclusive, sustainable and prosperous. Drawing on contributions from 200 top experts in fields ranging from machine learning to geoengineering to nanotechnology, to data ethics, Schwab equips readers with the practical tools to leverage the technologies of the future to leave the world better, safer, and more resilient than we found it.

**Higher Education in the Era of the Fourth Industrial Revolution** May 25 2023 This open access collection examines how higher education responds to the demands of the automation economy and the fourth industrial revolution. Considering significant trends in how people are learning, coupled with the ways in which different higher education institutions and education stakeholders are implementing adaptations, it looks at new programs and technological advances that are changing how and why we teach and learn. The book addresses trends in liberal arts integration of STEM innovations, the changing role of libraries in the digital age, global trends in youth mobility, and the development of lifelong learning programs. This is coupled with case study assessments of the various ways China, Singapore, South Africa and Costa Rica are preparing their populations for significant shifts in labour market demands – shifts that are already underway. Offering examples of new frameworks in which collaboration between government, industry, and higher education institutions can prevent lagging behind in this fast changing environment, this book is a key read for anyone wanting to understand how the world should respond to the radical technological shifts underway on the frontline of higher education.

**The Fourth Industrial Revolution** Sep 28 2023 From social media to the Internet of Things, digital fabrication to robotics, virtual reality to synthetic biology, new technologies are racing forward across the board. Together they are ripping up the rule book for people, firms, and governments alike. Mastering this so-called Fourth Industrial Revolution is the theme of the World Economic Forum's 2016 Annual Meeting, for which this special collection serves as background reading. Klaus Schwab kicks things off with an overview of the topic, followed by sections on the technological trends driving the revolution; those trends' economic, social, and political impacts; and the resulting challenges for policy. Drawn from the pages of Foreign Affairs and the pixels of ForeignAffairs.com, the articles feature world-class experts explaining crucial issues clearly, directly, and authoritatively. We hope you enjoy the collection and come back for more.

Blockchain Revolution Oct 18 2022 Blockchain technology is powering our future. As the technology behind cryptocurrencies like bitcoin and Facebook's Libra, open software platforms like Ethereum, and disruptive companies like Ripple, it's too important to ignore. In this revelatory book, Don Tapscott, the bestselling author of Wikinomics, and his son, blockchain expert Alex Tapscott, bring us a brilliantly researched, highly readable, and essential book about the technology driving the future of the economy. Blockchain is the ingeniously simple, revolutionary protocol that allows transactions to be simultaneously anonymous and secure by maintaining a tamperproof public ledger of value. Though it's best known as the technology that drives bitcoin and other digital currencies, it also has the potential to go far beyond currency, to record virtually everything of value to humankind, from birth and death certificates to insurance claims, land titles, and even votes. Blockchain is also essential to understand if you're an artist who wants to make a living off your art, a consumer who wants to know where that hamburger meat really came from, an immigrant who's tired of paying big fees to send money home to your loved ones, or an entrepreneur looking for a new platform to build a business. And those examples are barely the tip of the iceberg. As with major paradigm shifts that preceded it, blockchain technology will create winners and losers. This book shines a light on where it can lead us in the next decade and beyond.

Teaching in the Fourth Industrial Revolution Oct 30 2023 In this visionary book, written by six internationally recognized Global Teacher Prize finalists, the authors create a positive and hope-filled template for the future of education. They address the hard moral, ethical and pedagogical questions facing education today so that progress can serve society, rather than destroying it from within our classrooms. This blueprint for education finally brings forward what has always been missing in education reform: a strong collective narrative with authentic examples from teachers on the front line. It is a holistic, personalized approach to education that harnesses the disruptions of the Fourth Industrial Revolution to better shape the future for the next generation, and ensure that every child can benefit from the ongoing transformations. A great read for anyone who has an interest in educating our youth for these uncertain times, highlighting why teachers will always matter.

The Encyclopaedia Britannica Mar 11 2022

**Content Analysis** Jan 21 2023 The Second Edition of *Content Analysis: An Introduction to Its Methodology* is a definitive sourcebook of the history and core principles of content analysis as well as an essential resource for present and future studies. The book introduces readers to ways of analyzing meaningful matter such as texts, images, voices - that is, data whose physical manifestations are secondary to the meanings that a particular population of people brings to them. Organized into three parts, the book examines the conceptual and methodological aspects of content analysis and also traces several paths through content analysis protocols. The author has completely revised and updated the

Second Edition, integrating new information on computer-aided text analysis. The book also includes a practical guide that incorporates experiences in teaching and how to advise academic and commercial researchers. In addition, Krippendorff clarifies the epistemology and logic of content analysis as well as the methods for achieving its aims. Intended as a textbook for advanced undergraduate and graduate students across the social sciences, *Content Analysis, Second Edition* will also be a valuable resource for practitioners in a variety of disciplines.

**Shaping the Future of the Fourth Industrial Revolution** Apr 04 2024 World Economic Forum Founder and Executive Chairman Klaus Schwab offers a practical companion and field guide to his previous book, *The Fourth Industrial Revolution*. Today, technology is changing everything--how we relate to one another, the way we work, how our economies and governments function, and even what it means to be human. One need not look hard to see how the incredible advances in artificial intelligence, cryptocurrencies, biotechnologies, and the internet of things are transforming society in unprecedented ways. But the Fourth Industrial Revolution is just beginning, says Schwab. And at a time of such tremendous uncertainty and such rapid change, he argues it's our actions as individuals and leaders that will determine the trajectory our future will take. We all have a responsibility - as citizens, businesses, and institutions - to work with the current of progress, not against it, to build a future that is ethical, inclusive, sustainable and prosperous. Drawing on contributions from 200 top experts in fields ranging from machine learning to geoenvironment to nanotechnology, to data ethics, Schwab equips readers with the practical tools to leverage the technologies of the future to leave the world better, safer, and more resilient than we found it.

*Shaping the Fourth Industrial Revolution* Jun 01 2021

[The Genesis of German Conservatism](#) Jul 03 2021 Although Conservative parties did not exist in Germany until after the Napoleonic Wars, there did emerge, around 1770, traceable organized political activity and intellectual currents of a clearly Conservative character. The author argues that this movement developed as a response to the challenge of the Enlightenment in the fields of religion, socioeconomic affairs, and politics- and that this response antedated the impact of the French Revolution. Believing that Conservatism cannot be treated properly as a specialized phenomenon, or simply as an intellectual movement, Professor Epstein correlates it with the political and social forces of the time. Originally published in 1966. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

**Foundations For Fintech** Jun 25 2023 In the digital era, emerging technologies such as artificial intelligence, big data, and blockchain have revolutionized various ways of people's daily lives and brought many opportunities and challenges to the industries. With the increasing demand for talents in the fintech realm, this book serves as a good guide for practitioners who are seeking to understand the basics of fintech and applications of different technologies. This book covers important knowledge in statistics, quantitative methods, and financial innovation to lay the foundation for fintech. It is especially useful for people who are relatively new to this area and would like to become professionals in fintech. Bundle set: Global Fintech Institute-Chartered Fintech Professional Set I

*The Fourth Industrial Revolution* Jun 06 2024 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

Great Power Politics in the Fourth Industrial Revolution Dec 20 2022 Why and how will the fourth industrial revolution impact great power politics? Here, Glenn Diesen utilizes a neoclassical approach to great power politics to assess how far the development of AI, national and localized technological ecosystems and cyber-warfare will affect great power politics in the next century. The reliance of modern economies on technological advances, Diesen argues, also compels states to intervene radically in economics and the lives of citizens, as automation radically alters the economies of tomorrow. A

groundbreaking attempt to contextualize the fourth industrial revolution, and analyse its effects on politics and international relations.

*The Foreign Policy of the Third Reich* Jul 15 2022 In this short outline history of Hitler's foreign policy, Professor Hildebrand contends that the National Socialist Party achieved popularity largely because it integrated all the political, economic and socio-political expectations prevailing in Germany since Bismarck. Thus, foreign policy under Hitler was a logical extension of the aims of the newly created German nation-state of 1871. Trading on his domestic economic successes, Hitler relied on the traditional methods of power politics-backing diplomacy with force. Had he pursued expansionist aims alone, using specific lighting wars as threats or instruments of conquest he might have been more successful. As it was, the scheme went awry when the first phase-European hegemony-was overtaken by and forced to run parallel with the second and third phases: American intervention and "racial purification." The ideology became too great a burden to bear, stimulating internal resistance, and the Allies of course determined to wage total for a total surrender.

**Summary of Klaus Schwab & Nicholas Davis's Shaping the Future of the Fourth Industrial Revolution** Jul 27 2023 Get the Summary of Klaus Schwab & Nicholas Davis's Shaping the Future of the Fourth Industrial Revolution in 20 minutes. Please note: This is a summary & not the original book. "Shaping the Future of the Fourth Industrial Revolution" by Klaus Schwab and Nicholas Davis explores the transformative impact of emerging technologies like AI, robotics, and biotechnologies. Building on the digital advancements of the Third Industrial Revolution, these technologies promise to reshape industries, economies, and societies. The book emphasizes the importance of understanding the interconnectedness of these technologies to make informed decisions about their development and implementation...

**Recreating Asia** Feb 27 2021 The World Economic Forum is an international organization committed to improving the state of the world. It provides a framework for the world's leaders to address global issues. This work offers an insight into how Asia is managing its own political change and national governance challenges. It is based on discussions held during the East Asia Economic Summit, which took place in Hong Kong, October 2001. The summit, an annual event of the WEF, brings together around 800 business leaders, heads of state and government ministers, commentators and experts.

The Revolution in Development Economics Aug 28 2023 For decades, development economists believed that central planning, not economic freedom, was the key to economic growth in developing countries. In 1956 Gunnar Myrdal, winner of the Nobel Prize in economics in 1974, wrote, "The special advisers to underdeveloped countries who have taken the time and trouble to acquaint themselves with the problem all recommend central planning as the first condition of progress." While the argument that

socialism is the key to growth in the developing world appears obviously unreasonable today -- given the collapse of command-and-control economies around the globe -- it was, when Myrdal wrote, the academic consensus. Only a few economists doubted such arguments and proposed alternatives. Foremost among them was Peter Bauer, author of such classics as *The Economics of Under-Developed Countries* and *Dissent on Development*. This book contains 20 essays, many of which were originally published in the *Cato Journal*, and a foreword by Václav Klaus, former prime minister of the Czech Republic.

Revolution for Nature Jun 13 2022 One of Germany's leading environmental thinkers explains his holistic alternative to the “incomplete Enlightenment” of the dominant western world view—to join together as global citizens and consumers, treating all purchasing choices as ethical, and withdrawing our spending from an economic system which threatens the very foundations of life on earth. *Revolution for Nature* combines a provocative historical and philosophical analysis with practical recommendations both for the lifestyle changes of reformed consumers, and for the political constitution of the Nature State of the future.

**Woodrow Wilson, Revolutionary Germany, and Peacemaking, 1918-1919** Feb 19 2023 Woodrow Wilson, *Revolutionary Germany, and Peacemaking, 1918-1919: Missionary Diplomacy and the Realities of Power*

*The Internalized Revolution* Apr 23 2023 This book, originally published in 1992, traces the discourse on the French Revolution in Germany and its contributors investigate the processes and results of adopting or rejecting the values of the French Revolution in Germany and reinterprets its documents in terms of their internalization. One of the questions discussed is whether the French Revolution is part of Germany’s progressive tradition, that is, whether it has been repressed or whether it constitutes a viable counter-discourse within the political culture. The first successful revolution in Germany – the ‘Velvet Revolution’ of Autumn 1989 does not fit the definition of ‘classic revolutions, but it ended in a change of power in Germany and in that respect, this book is an anatomy of German political consciousness before 1989.

**Germany 1916-23** Jan 01 2024 During the last four decades the German Revolution 1918/19 has only attracted little scholarly attention. This volume offers new cultural historical perspectives, puts this revolution into a wider time frame (1916-23), and coheres around three interlinked propositions: (i) acknowledging that during its initial stage the German Revolution reflected an intense social and political challenge to state authority and its monopoly of physical violence, (ii) it was also replete with »Angst«-ridden wrangling over its longer-term meaning and direction, and (iii) was characterized by competing social movements that tried to cultivate citizenship in a new, unknown state.

**Modigliani** Nov 06 2021 Amedeo Modigliani (1884?1920) moved to Paris as a 22-year-

old art student and is regarded as probably the last true bohémien in Montmartre. The exhibition catalogue to mark the 100th anniversary of his death shows him for the first time as a leading member of the avant-garde who carried the revolution of Primitivism well into the 20th century.00Modigliani's famous nudes, unusual portraits and unique sculptures are contrasted with works by Pablo Picasso, Constantin Brâncusi and André Derain as well as artefacts from so-called 'primitive' cultures. In doing so the volume focuses in particular on Modigliani's lifelong study of the art of Primitivism, which also interested the artist friends who influenced his work. Some 100 works are on view, including numerous main works by Modigliani from the great museums and most important private collections from America to Asia.00Exhibition: Albertina, Wien, Austria (17.09.2021 - 09.01.2022).

The First Global Revolution Mar 23 2023

**Papal Primacy** Apr 11 2022 Papal primacy has grown with the Church, and it remains a reality embedded in the Church as a living community begins to change.
