Frozen in Time Ali Sparkes, 2013-06-06 1956 Freddy and Polly are used to helping their father with his experiments. So they don't mind being put into cryonic suspension having their hearts frozen until their father wakes them up again. They know it will only be for an hour or two so there's nothing to worry about. Present Day Ben and Rachel have resigned themselves to a long boring summer. Then they find a hidden underground vault in the garden containing two frozen figures, a boy and a girl. And when Rachel accidentally presses a button, something unbelievable happens. Can Polly and Freddy adapt to the twenty-first century? Will their bodies survive having been in suspension for so long? And most important of all, what happened to their father and why did he leave them frozen in time?

Seven Myths About Education Daisy Christodoulou, 2014-03-14 In this controversial new book Daisy Christodoulou offers a thought-provoking critique of educational orthodoxy. Drawing on her recent experience of teaching in challenging schools, she shows through a wide range of examples and case studies just how much classroom practice contradicts basic scientific principles. She examines seven widely held beliefs which are holding back pupils and teachers: Facts prevent understanding; Teacher-led instruction is passive; The 21st century fundamentally changes everything; You can always just look it up; We should teach transferable skills; Projects and activities are the best way to learn; Teaching knowledge is indoctrination. In each accessible and engaging chapter Christodoulou sets out the theory of each myth, considers its practical implications and shows the worrying prevalence of such practice. Then she explains exactly why it is a myth with reference to the principles of modern cognitive science. She builds a powerful case explaining how governments and educational organisations around the world have let down teachers and pupils by promoting and even mandating evidence-less theory and bad practice. This blisteringly incisive and urgent text is essential reading for all teachers, teacher training students, policy makers, head teachers, researchers and academics around the world.

Learning without School Ross Mountney, 2008-11-15 While some people look back on school as the best days of your life, for others the experience can be unpleasant and gruelling. *Learning without School* is a practical handbook for parents who want to educate their children at home but are unsure that they have the skills and know-how required to give their child the best education possible. This book explains what home education is, the advantages and disadvantages of choosing this route, how to begin home educating, what you need to do and how to help your child adjust, and how home education affects children's social skills and friendships. It also covers technical aspects such as the curriculum, core subjects, exams and timetables. Ross Mountney also considers children with learning difficulties or special needs and how to approach home education differently.

for this group of children Each chapter contains a summary of key points useful websites hints and tips and real life case studies This practical guide offers indispensable support for parents who are considering home education for their child and includes a broad philosophy of education that will interest all parents and professionals involved in education and child welfare

The Armed Forces Covenant in action? Great Britain: Parliament: House of Commons: Defence Committee, 2013-07-18 A series of Ofsted inspections on Army Apprenticeships conducted in 2013 rated the overall effectiveness as good This was an improvement over the last inspection in 2009 rated as satisfactory now called requires improvement Some 28 per cent of Army recruits were less than 18 years of age Further information is needed on why the Army is so dependent on recruiting personnel under the age of 18 years compared to the other two Services and whether steps are being taken to reduce this dependency Of those recruited in 2012 35 per cent of the Army were rated at entry level 2 for literacy that of a 7 to 8 year old and 39 per cent had a literacy level of an eleven year old If as the MoD states it has to recruit personnel at whatever level of attainment is available then it should boost remedial action when recruitment entry standards are particularly low In light of changes brought about by Future Force 2020 it may be that recruiting personnel with higher levels of attainment would better meet the future needs of the Armed Forces Whilst the Committee recognises that some recruits may not be eager to take further academic exams the MoD should encourage more recruits to undertake English and Maths GCSEs which would stand them in good stead for future employment The MoD has carried out some useful pilot projects with paramedic training and should identify more potential projects to ensure that vital skills paid for by the MoD are not lost to the country
