In her beloved Little House books Laura Ingalls Wilder tells of her pioneer childhood growing up on the frontier. Because the Ingallses often lived far away from any stores and because they had little money, Laura and her family had to make most of their own household items using whatever materials were available. Now with MY LITTLE HOUSE CRAFTS BOOK you can share a part of Laura's pioneer days by learning how to make the same things that she and her family made for their little homes on the frontier. Inside this book are easy step by step instructions for 18 crafts taken straight from the pages of Laura's Little House books. All you need to get started are a few simple supplies and you're on your way to making fun and useful pioneer crafts that you'll cherish forever.

The Little House Cookbook Barbara M. Walker, 1979-09-20. Laura Ingalls Wilder grew up on the prairie where food was something one worked for; cooking was a big part of daily life and mealtime was a chance to gather with family and give thanks. By watching Pa hunt and farm and by helping Ma prepare the food, Laura learned the pleasures that come from a family working together. Laura also experienced the joy that comes from sharing food made with love and care with family and friends. Here are over 100 unique recipes celebrating the foods and cooking techniques of Laura's pioneer childhood. Taken from dishes described in the beloved Little House books, these recipes were carefully researched by Barbara M. Walker and tested in her own kitchen. From pancake men and pumpkin pie to vanity cakes and ice cream, these recipes give adults and children alike the chance to experience a taste of Laura's childhood, reminding us of the connection between the food on the table and the work involved in getting it there. Continuous Productive Urban Landscapes Andre Viljoen, Joe Howe, 2012-05-04. This book on urban design extends and develops the widely accepted compact city solution. It provides a design proposal for a new kind of sustainable urban landscape: Urban Agriculture. By growing food within an urban rather than exclusively rural environment, urban agriculture would reduce the need for industrialized production, packaging, and transportation of foodstuffs to the city-dwelling consumers. The revolutionary and innovative concepts put forth in this book have potential to shape the future of our cities; quality of life within them. Urban design is shown in practice through international case studies, and the arguments presented are supported by quantified economic, environmental, and social justifications.

Davis, 2011-01-04 With her characteristic brilliance grace and radical audacity Angela Y Davis has put the case for the latest abolition movement in American life the abolition of the prison As she quite correctly notes American life is replete with abolition movements and when they were engaged in these struggles their chances of success seemed almost unthinkable For generations of Americans the abolition of slavery was sheerest illusion Similarly the entrenched system of racial segregation seemed to last forever and generations lived in the midst of the practice with few predicting its passage from custom The brutal exploitative dare one say lucrative convict lease system that succeeded formal slavery reaped millions to southern jurisdictions and untold miseries for tens of thousands of men and women Few predicted its passing from the American penal landscape Davis expertly argues how social movements transformed these social political and cultural institutions and made such practices untenable In *Are Prisons Obsolete* Professor Davis seeks to illustrate that the time for the prison is approaching an end She argues forthrightly for decarceration and argues for the transformation of the society as a whole **Green Enough** Leah Segedie, 2018-03-20 A real no holds barred take on making smart healthy choices for you and your family In *Green Enough* Mamavation blogger Leah Segedie uncovers the truth behind the food and household products that are misleadingly labeled all natural and healthy but are actually filled with chemicals and toxins From furniture to packaged food Leah guides you through detoxifying your home diet and lifestyle showing you how to make the best choices possible She exposes the brands and products that contain toxic and hormone disrupting ingredients and gives guidelines on choosing safer products and organic produce that are free from toxic and persistent pesticides She instructs you on making the move to meat dairy and eggs that are free of antibiotics GMOs growth hormones and dangerous pathogens She explains at what phases of childhood children are the most vulnerable and need more protection And she includes delicious and kid approved recipes to help you detoxify your cooking routine It's not about being perfect or 100% clean none of us are it's about being green enough [Women, Race, & Class](#) Angela Y.
