Live Coding Feb 12 2022 The first comprehensive introduction to the origins, aspirations, and evolution of live coding. In the last few decades, live coding has emerged as a dynamic creative practice gaining attention across cultural and technical fields—from music and the visual arts through to computer science. *Live Coding: A User's Manual* is the first comprehensive introduction to the practice, and a broader cultural commentary on the potential for live coding to open up deeper questions about contemporary cultural production and computational culture. This multi-authored book—by artists and musicians, software designers, and researchers—provides a practice-focused account of the origins, aspirations, and evolution of live coding, including expositions from a wide range of live coding practitioners. In a more conceptual register, the authors consider liveness, temporality, and knowledge in relation to live coding, alongside speculating on the practice's future forms.

User Localization Strategies in the Face of Technological Breakdown May 30 2023 This book examines Ghana's use of the fingerprint biometric technology in order to further conversations about localization championed by technical communication scholars. Localization, in this case, refers to the extent to which users demonstrate their knowledge of use by subverting and reconfiguring the purpose of technology to solve local problems. Dorpenyo argues that the success of a technology depends on how it meets the users' needs and the creative efforts users put into use situations. In *User Localization Strategies in the Face of Technological Breakdown*, Dorpenyo advocates studying how users of technological systems construct knowledge about the technology and develop local strategies to solve technological breakdowns. By analyzing technical documents and interview transcripts, the author identifies and advances three user localization strategies: linguistic localization, subversive localization, and user-heuristic experience localization, and considers how biometric systems can become a tool of marginalization.

Writing: A User Manual Mar 08 2024 You are a writer and you have a killer book idea. When your project starts to take off you will find yourself managing a writhing tangle of ideas, possibilities and potential potholes. How do you turn your inspiration into a finished novel? *Writing a User's Manual* offers practical insight into the processes that go into writing a novel, from planning to story development, research to revision and, finally, delivery in a form which will catch the eye of an agent or publisher. David Hewson, a highly productive and successful writer of popular fiction with more than sixteen novels in print in twenty or so languages, shows how to manage the day to day process of writing. Writers will learn how to get the best out of software and novel writing packages such as Scrivener, which help you view your novel not as one piece of text, but as individual linked scenes, each with their own statistics, notes and place within the novel structure. As you write, you will need to assemble the main building blocks to underpin your artistry : story structure; genre - and how that affects what you write; point of view; past, present or future tense; software for keeping a book journal to manage your ideas, research and outlining; organization and more. The advice contained in this book could mean the difference between finishing your novel, and a never-ending work in progress. An essential tool for writers of all kinds. Foreword by Lee Child.

The Art of Scientific Writing Jan 14 2022 Für die meisten Wissenschaftler heißt es: "Schreib' oder stirb!", aber nur die wenigsten wurden sich deshalb als passionierte oder gar brillante Schreibkünstler bezeichnen. Um all jenen zur Hilfe zu kommen, die beim Abfassen wissenschaftlicher Texte auch auf den Schreibstil achten mochten, haben sich drei erfahrene Vielschreiber zusammengetan und diesen einzigartigen Leitfaden über das Verfassen wissenschaftlicher Texte erstellt. Das Schwergewicht liegt dabei auf der richtigen Schreibtechnik, der Verwendung formaler Standards und vor allem einer klaren und unmissverständlichen Darstellung wissenschaftlicher Sachverhalte. Diese lang erwartete neue Auflage eines Klassikers wurde von den Autoren vollständig überarbeitet, um den zum Teil dramatischen Veränderungen in der Form wissenschaftlicher Kommunikation des letzten Jahrzehnts gerecht zu werden. Durch seinen umfangreichen Anhang und ausführlichen Index ist dieses Buch darüber hinaus ein unverzichtbares Nachschlagewerk, das jeder Verfasser wissenschaftlicher Texte, egal ob angehender Student oder etablierter Wissenschaftler, immer zur Hand haben

The Sustainable City XI Sep 02 2023 Covering the proceedings of the 11th International Conference on Urban Regeneration and Sustainability held in Alicante, Spain, this volume addresses the multidisciplinary aspects of urban planning; a result of the increasing size of cities, the amount of resources and services required and the complexity of modern society. Most of the earth's population live in cities and the process of urbanisation still continues to generate problems originating from the drift of the population towards them. These problems can be resolved by cities becoming efficient habitats, saving resources in a way that improves the standard of living. The process faces a number of challenges related to reducing pollution and improving main transportation and infrastructure systems. These challenges can contribute to the development of social and economic imbalances and require the development of new solutions. Large cities are probably the most complex mechanisms to manage, nevertheless they represent a productive ground for architects, engineers, city planners, and social and political scientists able to conceive new ideas and time them according to technological advances and human requirements. The Sustainable City XI follows a succession of very successful international conferences and covers the following fields: Urban planning and design; Urban development and management; Urban conservation and regeneration; The community and the city; Eco-town planning; Landscape planning and design; Environmental management; Sustainable energy and the city; Transportation Quality of life; Socio-economic and political considerations; Cultural quarters and interventions; Waterfront development; Case studies – sustainable practices; Architectural issues; Cultural heritage issues; Appropriate technologies for smart cities; Planning for resilience; Disaster and emergency response; Urban safety and security; Waste management; Urban infrastructure and Urban metabolism.

Small-Scale Public Transportable and Pre-Fabricated Buildings Dec 05 2023 This book investigates the design, operation and use of contemporary transportable buildings, and explores how functional performance can be assessed in small-scale examples for public use alongside their relationship to other design elements. The research focuses on three case studies, Chengdu Hualin Elementary School, Exxopolis and Kredod, that do not require a

high-technology building environment or complex construction skills. Transportable buildings are defined as those that are transported in a number of parts for assembly on site. Contemporary transportable buildings respond to ecological issues, social impacts, technological innovation and economic demands. They can be used to measure a society's development in environmental sustainability, innovation and economic growth through various forms. Small-scale transportable buildings fulfil many temporary habitation needs in diverse roles, such as non-emergency transitional housing, ephemeral exhibition buildings and seasonal entertainment facilities. Small-Scale Public Transportable and Pre-Fabricated Buildings will be a useful research text for academics and students in architecture, design and sustainable building performance.
