The Global Airline Industry Peter Belobaba, Amedeo Odoni, Cynthia Barnhart, 2015-07-06 Extensively revised and updated edition of the bestselling textbook provides an overview of recent global airline industry evolution and future challenges Examines the perspectives of the many stakeholders in the global airline industry including airlines airports air traffic services governments labor unions in addition to passengers Describes how these different players have contributed to the evolution of competition in the global airline industry and the implications for its future evolution Includes many facets of the airline industry not covered elsewhere in any single book for example safety and security labor relations and environmental impacts of aviation Highlights recent developments such as changing airline business models growth of emerging airlines plans for modernizing air traffic management and opportunities offered by new information technologies for ticket distribution Provides detailed data on airline performance and economics updated through 2013

Aircraft Operating Leasing Donal Patrick Hanley, 2017-03-08 Although aircraft leasing is comparatively young as a commercial activity less than forty years old in practical terms already well over a quarter of the world's commercial aircraft fleet is leased The legal significance of aircraft leasing is therefore growing very quickly Bringing together the laws affecting both air travel and leasing can however be challenging This book is the first to assume this task in a major focused way thus providing invaluable expert guidance to practitioners handling aircraft lease agreements as well as to legal academics and students In this second edition the author examines the aircraft operating lease from both a legal and practical point of view and contextualizes it in light of the latest public and private international air law agreements case law statutes and regulations from a variety of jurisdictions and current literature in the field the obligations and rights of each party failure to meet delivery condition before delivery standby letters of credit and guarantees regulatory constraints concerning aircraft registration or foreign remittances manufacturer's warranties possession and replacement of parts and engines sub leasing damage to the aircraft and other loss to lessor liability for damage to third parties safety issues and lessor's liability for acts of the airline the events that will entitle the lessor to terminate the contract and recover its asset issues pertaining to enforcement of remedies and governing law The format broadly follows that of a typical aircraft operating lease The author flags the principal legal issues to be considered in developing a standard form aircraft operating lease and makes recommendations in that regard His approach balances the desired commercial outcome with the legal or more theoretical mandate to apply the law to disputes that may arise An immensely useful supplement sets out a real example of a form of aircraft operating lease for a used aircraft as used by a leading commercial aircraft leasing company As a detailed examination of each part of the lease with particular reference to the impact on each term of relevant case law statutes regulations and international treaties this work greatly enhances understanding of the legal and practical aspects of the aircraft operating lease

Open Skies for Africa Charles E Schlumberger,2010-06-23 In Africa where poor roads ports and railways often constrain efficient transportation air transport holds great potential as a lever for economic growth and development Yet Africa has suffered several decades of inefficient air services Uncompetitive flag carriers set up by newly independent African states offered primarily intercontinental flights while the domestic air service market remained underdeveloped and underserved The 1999 pan African treaty on liberalization of access to air transport markets the Yamoussoukro Decision attempted to address these shortcomings Yet a decade later only partial liberalization has been achieved Open Skies for Africa Implementing the Yamoussoukro Decision reviews progress made in carrying out the treaty and suggests ways in which the liberalization process can be encouraged The book analyzes the completed and still pending steps toward implementation of the Yamoussoukro Decision both on a pan African level and within various regions Special focus is given to the challenges posed by the poor aviation safety and security standards that exist in most African countries Finally the book measures the impact that certain policy steps of the Yamoussoukro Decision have had and evaluates the economic significance of air transportation and its full liberalization in Africa The book concludes that the process of liberalizing African air services must continue and provides policy recommendations for the way forward

Safer Healthcare Charles Vincent,René Amalberti,2016-01-13 The authors of this book set out a system of safety strategies and interventions for managing patient safety on a day to day basis and improving safety over the long term These strategies are applicable at all levels of the healthcare system from the frontline to the regulation and governance of the system There have been many advances in patient safety but we now need a new and broader vision that encompasses care throughout the patient s journey The authors argue that we need to see safety through the patient s eyes to consider how safety is managed in different contexts and to develop a wider strategic and practical vision in which patient safety is recast as the management of risk over time Most safety improvement strategies aim to improve reliability and move closer toward optimal care However healthcare will always be under pressure and we also require ways of managing safety when conditions are difficult We need to make more use of strategies concerned with detecting controlling managing and responding to risk Strategies for managing safety in highly standardised and controlled environments are necessarily different from those in which clinicians constantly have to adapt and respond to changing circumstances This work is supported by the Health Foundation The Health Foundation is an independent charity committed to bringing about better health and health care for people in the UK The charity s aim is a healthier population in the UK supported by high quality health care that can be equitably accessed The Foundation carries out policy analysis and makes grants to front line teams to try ideas in practice and supports research into what works to make people s lives healthier and improve the health care system with a particular emphasis on how to make successful change happen A key part of the work is to make links between the knowledge of those working to deliver health and health care with research evidence and analysis The aspiration is to create a virtuous circle using what works on the ground to inform effective policymaking and vice versa Good health and health care are vital for a flourishing society Through sharing what is known collaboration and building people s skills and knowledge the Foundation aims to make a difference and contribute to a healthier population

Eye Banking T. Bredehorn, Gernot Duncker, W. John Armitage, 2009-01-01 Corneal transplantation has been performed with increasing success for more than 100 years. In the last 20 years, standards, outcomes, and developments in the field of corneal transplantation and eye banking have been discussed at the annual meetings of the European Eye Bank Association (EEBA) to share and promote good practice and guarantee a high level of safety for the recipients. The EEBA standards for donor selection and eye banking provide professional advice and guidance to eye banks and corneal surgeons. This book highlights the history and development of eye banking and all significant steps, including the donation, processing, and distribution of corneas for transplantation. Additional contributions on the sclera, amnion, and retinal pigment epithelium provide further insights into ocular surgery and the future potential for transplantation. This book contributes the essentials in eye banking activities for ophthalmologists and eye bankers, as well as for regulatory and legislative authorities.

The Air Transportation Industry Rosario Macario, Eddy Van de Voorde, 2021-11-16 The aviation sector consists of various actors such as airlines, ground handling companies, and others, all with conflicting priorities. In order to understand how these actors position themselves in an increasingly competitive market, *The Air Transportation Industry: Economic Conflict and Competition* analyzes all the market segments in detail, examining such issues as which industrial economic structure drives decisions, the main economic problems, the consequences for negotiations between different actors, impacts on the global aviation market, and much more. This book covers the entire aviation sector, including strategies, regulation, resilience, privatization, airport slot management, and more. It examines how economic and strategic struggles underlie the current market structure, both for aviation as a whole and for the constituent actors: carriers, authorities, and handlers. It examines the ways market and nonmarket approaches impact the competitiveness of the air transport industry, offering a complete mapping of the economic actions between actors of the air transport industry. This volume will help readers gain insight into the possible strategic choices and the mutual competitive strength within the future aviation market. Contains contributions from well-known aviation scholars. Includes numerous case studies throughout that explore a wide range of topics. Focuses on applied knowledge with clearly structured chapters examining topics from a global perspective. Addresses the ongoing consequences of COVID-19 on the air transportation industry, examining potential strategic responses in the event of subsequent pandemics.
