

5.4 Control terminal specifications

Isolation of control circuits

The control terminals of the Commander SE drive are double-insulated from the power electronics and single-insulated from the status relay contacts. Providing that the voltage on the status relay contacts does not exceed 110V, the control terminals meet the requirements for SELV in EN50178. However, in the event of a serious fault in the drive, the safety barriers could be breached. The installer must ensure that the external control circuits are insulated from human contact by at least one layer of insulation rated for use at the AC supply voltage. If the control circuits are to be connected to other circuits classified as SELV e.g. a personal computer, an additional isolating barrier must be included in order to maintain SELV classification. Ensure that the correct fuses are installed at the drive input, and that the drive is connected to the correct supply voltage.

5.4.1 Default configuration

All outputs (+24V, +10V, Digital output and Analog output) could be permanently damaged if a negative voltage greater than -1V is applied to them.

Deploying Feminism Stéfanie von Hlatky,2022-09-23 A detailed account based on fieldwork and interviews of how Women Peace and Security norms are militarized and put at the service of operational effectiveness International organizations and governments want to increase women s participation in military operations and peacebuilding Gender equality is increasingly seen as the antidote to conflict a key factor in achieving stability While feminist activism inspired the emergence of these norms on gender and conflict they were institutionalized through the Women Peace and Security WPS agenda with the military at the forefront of those changes In Deploying Feminism St fanie von Hlatky tells the story of how the military has been delegated authority to advance gender equality as part of their activities while simultaneously tackling increasingly complex threats Drawing upon fieldwork and interviews she illustrates how NATO the world s foremost alliance has even embedded these ideas in the planning and execution of its

missions For troops deployed on NATO missions this often means seeking out women in their operating area to improve intelligence gathering activities While this helps the mission does it help women and conflict affected communities Because of the military s focus on operational effectiveness above all else von Hlatky argues that there is a distortion of WPS norms as gender equality concerns fade into the background Looking at NATO s ongoing operations in Iraq Kosovo and the Baltics Deploying Feminism details the process by which Women Peace and Security norms are militarized and put at the service of operational effectiveness Further it shows why an adjustment is necessary for gender equality to become a true planning priority
