Teaching Secondary Geography as If the Planet Matters Dec 29 2022 This thought-provoking text looks at how Geography teachers can develop approaches to curriculum and learning which help students understand the nature of the contemporary world.

Learning to Teach Geography in the Secondary School Sep 25 2022 Learning to Teach Geography in the Secondary School has become the widely recommended textbook for student and new teachers of geography. It helps you acquire a deeper understanding of the role, purpose and potential of geography within the secondary curriculum, and provides the practical skills needed to design, teach and evaluate stimulating and challenging lessons. It is grounded in the notion of social justice and the idea that all students are entitled to a high quality geography education. The very practical dimension provides you with support structures through which you can begin to develop your own philosophy of teaching, and debate key questions about the nature and purpose of the subject in school. Fully revised and updated in light of extensive changes to the curriculum, as well as to initial teacher education, the new edition considers the current debates around what we mean by geographical knowledge, and what's involved in studying at Masters level. Key chapters explore the fundamentals of teaching and learning geography: Why we teach and what to teach

Understanding and planning the curriculum Effective pedagogy Assessment Developing and using resources Fieldwork and outdoor learning Values in school geography Professional development Intended as a core textbook and written with university and school-based initial teacher education in mind, Learning to Teach Geography in the Secondary school is essential reading for all those who aspire to become effective, reflective teachers. Praise for previous editions of Learning to Teach Geography in the Secondary School... 'This is a practical and visionary book, as well as being superbly optimistic. It has as much to offer the experienced teacher as the novice and could be used to reinvigorate geography departments everywhere. Practical activities and ideas are set within a carefully worked out, authoritative, conceptual framework.' - The Times Educational Supplement 'This is a modern, powerful, relevant and comprehensive work...a standard reference for many beginning teachers on geography initial teacher training courses.' - Educational Review

Geography in Secondary Schools May 02 2023 Gaining a better sense of how pupils conceive school geography is crucial if we are to understand the ways in which their ideas and values mediate learning processes. Geography in Secondary Schools explores how pupils experience geography lessons, what they think geography as a school subject is about, and what it means to them. School geography aims to help young people think about the world and their place in it in a distinctive - geographical - way. However very little is known about the kinds of thinking and values they associate with the subject. Researchers are increasingly taking young people's ideas seriously as important and worthy of investigation in their own right. In this book, Nick Hopwood takes such an approach to explore the relationships between pupils and geography as a school subject. He follows six pupils through their geography lessons for a period of three months, discussing their learning

experiences in depth with them. Their participation in class, written work, and comments made in interviews form the basis for a detailed investigation of their ideas.

Powerful Geography Apr 08 2021 In recent years the emphasis has shifted away from a focus on pedagogy (the how of teaching) and towards curriculum (the what of teaching). Ofsted's revised inspection framework reflects this shift, and their plans to -deep dive- into subject areas - meaning that teachers and department heads now need a much greater understanding of curricular structures - leave many educators having to think about their subject in new ways. Luckily for geography teachers, however, bestselling author Mark Enser provides plenty of insightful, subject-specific guidance in this all-encompassing book. Mark explores both the purpose of the geography curriculum and its various applications in practice. He details how teachers can take their students' learning beyond the acquisition of knowledge to transform how they see the world. He also tackles the changing nature of school geography, shares a variety of case studies, and offers his take on how best to facilitate geographical enquiry and fieldwork. The first part of the book considers the issue of purpose by looking at the role of the school in society and then shows the place that geography occupies within it. It also considers the history of the subject so as to help geography teachers better understand where they stand today, and concludes by discussing how the concepts of powerful

knowledge and GeoCapabilities can help them find their way again. The second part is a practical guide which illustrates how to put this theory of curriculum purpose into practice. It explores the steps which must be taken to create a powerful geography curriculum by deciding on content and places to be studied, putting the components into a sequence and then using all this to do geography. It will also discuss the extent to which teachers need to consider the future and respond to the concerns of the wider world when planning the curriculum. Suitable for department heads and classroom teachers of geography in secondary schools and subject leads in primary schools. Powerful Geography was Highly Commended in the Geographical Association Awards 2022.

Learning Progressions in Geography Education Jan 18 2022 This book informs an international audience of teachers, scholars and policymakers about the development of learning progressions for primary and secondary geography education in various countries and regions of the world. The book represents an important contribution to learning progressions research and practice. The different chapters explore how curriculum standards and frameworks in different countries portray progress and sophistication in the learning of geography. The book compares educational systems and how teachers and curriculum developers use the concept of "learning progression" to guide educational practices. As an approach to educational research, learning progressions offer considerable

potential for understanding how children develop understanding of geographic concepts and practices across grade bands and in relation to national geography standards. The book analyzes the general conditions of learning progressions within the context of a globalized world. Important themes are addressed such as: knowledge acquisition in formal education; measuring learning progressions in informal settings; learning progressions for one curriculum standard or several standards; conditions to assess progression in the learning of facts, concepts, and skills; and multiple pathways for understanding or learning geography. The contributing authors are experienced scientists in the field from all around the world giving specific insights into the practices of their countries. The book appeals to K-12 teachers, school administrators, policymakers, researchers in geography education, professors and lecturers at universities around the world.

EBOOK: Teaching Geography 11-18: A Conceptual Approach Sep 13 2021 "This is a must read for all 11-18 geography educators. It argues for a new geography curriculum founded on a set of major concepts that are profoundly relevant to 21st century life. For years, books on 11-18 geography education have focussed on classroom techniques, new pedagogic technologies and alternative modes of student assessment. Not this one. 'Teaching Geography 11-18' digs deep. It

offsite.creighton.edu

asks not only what geography is for, but bases its answer on a set of key concepts able to sustain an exciting and relevant curriculum. It also grounds its many arguments in the latest geographical research, thus re-establishing the broken connection between geography teaching in schools and that in higher education". Professor Noel Castree, University of Manchester, UK This engaging and stimulating book aims to radically re-shape and sharpen debates in geography education by taking an entirely fresh approach to both the subject and its place in secondary education. Key questions addressed in this book include: What is the place of geography within the secondary school curriculum? To what extent does school geography reflect and engage with contemporary issues and theories from the wider subject? What are the issues, challenges and opportunities of a concept-led approach to teaching geography? What are the implications of ICT, media and technology for the future of geography teaching in schools? Influenced by the revised national curriculum for geography which has reduced the prescribed content to be covered, this book offers an objective view of the concept-led approach. The new focus on concepts represents a significant shift in how geography is to be taught in schools, yet there has been little extended discussion of what a 'concept-led' approach to teaching and learning would entail. This book fills that void by examining geography's key concepts, and providing teachers with a theoretically robust and practical approach to curriculum planning using a concept-led approach. This is essential reading for all secondary geography teachers, trainee teachers and anyone involved with education and curriculum planning.

Learning to Teach Geography in the Secondary School Feb 16 2022 Learning to Teach Geography in the Secondary School has become the widely recommended textbook for student and new teachers of geography. Progress in Geography: Key Stage 3, Second Edition Aug 13 2021 Put progression at the heart of your curriculum with this hugely popular KS3 course from David Gardner, a leading authority in the Geography community. Fully reviewed and updated - with three new units - this forward-thinking

offsite.creighton.edu

course will fascinate young geographers, incorporating many diverse voices and exploring 'big ideas' such as place, the Earth's systems, the impact of colonialism and the complexities of development.

Choose the most cost-effective course. With 180 ready-made lessons in a single book, Progress in Geography provides a full three-year KS3. The free accompanying Progression Framework maps progress from Year 7 to Year 9, across the National Curriculum and towards the GCSE Assessment Objectives.

Ensure progress in geographical skills, knowledge and understanding. Every lesson and every unit builds upon prior learning and links to future learning, fully embedding geographical enquiry. Each double-page spread represents one lesson, with rich geographical resources, up-to-date data and case studies for pupils to interpret, analyse and evaluate.

Align with Ofsted's expectations.. Ideal for formative assessment, lesson activities create a stepped approach to enquiry learning, guiding pupils through the geographical data as they answer each lesson's enquiry question. End-of-unit review lessons create a reflection point, facilitating medium-term summative assessment and giving a broader view of progress.

Lay firm foundations for GCSE. Key vocabulary, command words and concepts are introduced gradually, preparing pupils for the content and question types they will encounter at GCSE, with a particular focus on analysis and evaluation, plus newly added decision-making activities.
