

The background of the image features several faint, light-colored anatomical sketches of a human torso and limbs, overlaid on a background of handwritten text. The sketches show the ribcage, spine, and various views of the arms and hands. The text is in a cursive, historical style, typical of medical manuscripts.

Selected References in Orthopaedic Trauma Anthony H.C. Ratliff, John H. Dixon, Peter A. Magnussen, S.K. Young, 2012-12-06 In medical writing brevity is the kiss of life Nevertheless most articles are unnecessarily lengthy and publications continue to multiply Pity the poor reader A succession of unduly long articles is bad enough but if each is followed by a plethora of references the effect is positively daunting Even the reader who is impressed by the length of a list may question the author's discrimination Were all those references needed Were they helpful Has the author really read every one All too often we look in vain for evidence of selectivity Here lies the strength of this book The authors have combed the literature and culled it ruthlessly selecting just a few hand picked references on every important aspect of orthopaedic trauma They have ranged widely but chosen narrowly and with a sense of balance And having selected they have also distilled adding a brief and thoughtful commentary on each group of entries The four authors

of varying vintages met at frequent intervals to discuss each section in turn and to debate the value of every inclusion I can almost hear the cut and thrust as well informed views were exchanged and also the sighs of relief as differences were resolved The authors compare their meetings with those of the Editorial Board of the IBIS since these are a delightful mixture of conflict entertainment and enlightenment what a marvellous time they must have had

Trauma and Orthopaedic Classifications Nick G. Lasanianos, Nikolaos K. Kanakaris, Peter V. Giannoudis, 2014-12-12 This illustrated textbook is an essential and invaluable guide to young clinicians and researchers of Trauma and Orthopaedics reporting all classification systems which are currently utilised in the clinical setting It includes classifications relevant to both Elective Orthopaedic Practice and Orthopaedic Trauma Clear graphic illustrations accompany the description of all different classification schemes in a comprehensive manner together with a structured presentation of existing clinical evidence In this manner each chapter of the different anatomical sites and pathologies assists the decision making of the readers regarding treatment strategy as well as informed consent of their patients It is envisaged that this textbook will be a point of reference not only to the surgeons in training residents but also to senior surgeons and academic clinicians
