Six revolving pictures depict the summer and winter animal inhabitants of mountain, lake, seashore, tundra, desert, and forest environments. This open access book focuses on the concepts, tools and techniques needed to successfully model ever-changing time-series data. It emphasizes the need for general models to account for the complexities of the modern world and how these can be applied to a range of issues facing Earth, from modelling volcanic eruptions, carbon dioxide emissions and global temperatures, to modelling unemployment rates, wage inflation and population growth. WINNER OF THE 2016 JEWISH BOOK COUNCIL AWARD FOR CONTEMPORARY JEWISH LIFE AND PRACTICE An inspiring and accessible guide, drawn from Jewish wisdom, for building the inner qualities necessary to work effectively for social justice. The world needs changing—and you 're just the person to do it! It 's a matter of cultivating the inner resources you already have. If you are serious about working for social justice and change, this book will help you bring your most compassionate, wise, and courageous self to the job. Bringing positive social change to any system takes deep self-awareness, caring, determination, and long-term commitment. But polarization, the slow pace of change, and internal conflicts among activists and organizations often leads to burnout and discouragement among the very people needed to make a difference. Changing the World from the Inside Out distills centuries of Jewish wisdom about cultivating and refining the inner life into an accessible program for building the qualities necessary to accomplish sustainable change. Through explorations of deep motivation, inner-drive, and traits like trust and anger, this book engages the reader in a journey of self-development and transformation, demonstrating that sustainable activism is indeed a spiritual practice. Jaffe offers accessible and meaningful guidance for this journey—with exercises, contemplations, and discussion points that can be used individually or in a group. In the Fourth Edition of Cultures and Societies in a Changing World, author Wendy Griswold illuminates how culture shapes our social world and how society shapes culture. Through this book, students will gain an understanding of the sociology of culture and explore stories, beliefs, media, ideas, art, religious practices, fashions, and rituals from a sociological perspective. Cultural examples from multiple countries and time periods will broaden students' global understanding. Students will develop a deeper appreciation of culture and society from this text, gleaning insights that will help them overcome cultural misunderstandings, conflicts, and ignorance and that will help equip them to live their professional and personal lives as effective, wise

citizens of the world. Genre studies and genre approaches to literacy instruction continue to develop in many regions and from a widening variety of approaches. Genre has provided a key to understanding the varying literacy cultures of regions, disciplines, professions, and educational settings. *GENRE IN A CHANGING WORLD* provides a wide-ranging sampler of the remarkable variety of current work. The twenty-four chapters in this volume, reflecting the work of scholars in Europe, Australasia, and North and South America, were selected from the over 400 presentations at SIGET IV (the Fourth International Symposium on Genre Studies) held on the campus of UNISUL in Tubarão, Santa Catarina, Brazil in August 2007—the largest gathering on genre to that date. The chapters also represent a wide variety of approaches, including rhetoric, Systemic Functional Linguistics, media and critical cultural studies, sociology, phenomenology, enunciation theory, the Geneva school of educational sequences, cognitive psychology, relevance theory, sociocultural psychology, activity theory, Gestalt psychology, and schema theory. Sections are devoted to theoretical issues, studies of genres in the professions, studies of genre and media, teaching and learning genre, and writing across the curriculum. The broad selection of material in this volume displays the full range of contemporary genre studies and sets the ground for a next generation of work. In this original text/reference, Bela H. Banathy discusses a broad range of design approaches, models, methods, and tools, together with the theoretical and philosophical bases of social systems design. He explores the existing knowledge bases of systems design; introduces and integrates concepts from other fields that contribute to design thinking and practice; and thoroughly explains how competence in social systems design empowers people to direct their progress and create a truly participative democracy. Based on advanced learning theory and practice, the text's material is enhanced by helpful diagrams that illustrate novel concepts and problem sets that allow readers to apply these concepts. A captivating time, the 60s and 70s now draw more attention than ever. The first substantial work by historians has appeared only in the last few years, and this volume offers an important contribution. These meticulously researched essays offer new perspectives on the Cold War and global relations in the 1960s and 70s through the perspective of the youth movements that shook the U.S., Western Europe, and beyond. These movements led to the transformation of diplomatic relations and domestic political cultures, as well as ideas about democracy and who best understood and promoted it. Bringing together scholars of several countries and many disciplines, this volume also uniquely features the reflections of former activists. A Women changing the world press anthology featuring 33 female business owners making a real difference This is a very different book. It is written for the dreamers of this world-the people who know that something different is possible-but who have never had the tools before., What if I told you that the tools exist? The possibilities you've always dreamed of are possible! This book will provide you with a set of practical and dynamic tools and processes that empowers you to know what is true for you and who you truly BE. What if you, being you, can change everything-your life, relationships, body, money situation. . .and the world? How the World Changed Social Media is the first book in Why We Post, a book series that investigates the findings of anthropologists who each spent 15 months living in communities across the world. This book offers a comparative analysis summarising the results of the research and explores the impact of social media on politics and gender, education and commerce. What is the result of the increased emphasis on visual communication? Are we becoming more individual or more social? Why is public social media so conservative? Why does equality online fail to shift inequality offline? How did memes become the moral police of the internet? Supported by an introduction to the project 's academic framework and theoretical terms that help to account for the findings, the book argues that the only way to appreciate and understand something as intimate and ubiquitous as social media is to be immersed in the lives of the people who post. Only then can we discover how people all around the world have already transformed social media in such unexpected ways and assess the consequences Being a good citizen means standing up for what's right-and here's just the way to start. From the author of *The Gutsy Girl*, this kids' guide to activism is the perfect book for those with a fierce sense of justice, a good sense of humor, and a big heart. This guide features change-maker tips, tons of DIY activities, and stories about the kids who have paved the way before, from famous activists like Malala Yousafzai and

Claudette Colvin to the everyday young people whose habit changes triggered huge ripple effects. So make a sign, write a letter, volunteer, sit-in, or march! There are lots of tactics to choose from, and you're never too young to change the world. This extensive work explores the changing world of religions, faiths and practices. It discusses a broad range of issues and phenomena that are related to religion, including nature, ethics, secularization, gender and identity. Broadening the context, it studies the interrelation between religion and other fields, including education, business, economics and law. The book presents a vast array of examples to illustrate the changes that have taken place and have led to a new world map of religions. Beginning with an introduction of the concept of the "changing world religion map", the book first focuses on nature, ethics and the environment. It examines humankind's eternal search for the sacred, and discusses the emergence of "green" religion as a theme that cuts across many faiths. Next, the book turns to the theme of the pilgrimage, illustrated by many examples from all parts of the world. In its discussion of the interrelation between religion and education, it looks at the role of missionary movements. It explains the relationship between religion, business, economics and law by means of a discussion of legal and moral frameworks, and the financial and business issues of religious organizations. The next part of the book explores the many "new faces" that are part of the religious landscape and culture of the Global North (Europe, Russia, Australia and New Zealand, the U.S. and Canada) and the Global South (Latin America, Africa and Asia). It does so by looking at specific population movements, diasporas, and the impact of globalization. The volume next turns to secularization as both a phenomenon occurring in the Global religious North, and as an emerging and distinguishing feature in the metropolitan, cosmopolitan and gateway cities and regions in the Global South. The final part of the book explores the changing world of religion in regards to gender and identity issues, the political/religious nexus, and the new worlds associated with the virtual technologies and visual media. You want to change the world. You want your work to have meaning. Maybe you're even audacious enough to want saving the world to be fun. What if saving the Earth were a game? Not just any game, but the greatest game we've ever played. This workbook helps social and environmental change professionals learn how to implement powerful techniques from the fields of game design, behavioral psychology, design, data science, and storytelling, that are not only proven to have impact, but also can make your project fun. In a 10-step framework of exercises, tutorials, and case studies, How to Save the World will teach you the art of changing the world - and it's often not what you think. Did you know that just by putting a sign above a recycling bin that showed people the number of cans inside increased the recycling rate by 67 percent? Or when people standing in line at a cafe were told that other customers before them had ordered a vegetarian meal, that this simple intervention doubled the total rate of vegetarian meal orders? As you implement these academically researched and measurement-driven techniques, How to Save the World will drive you to dig into your creativity and unearth your greatest ideas that shift the numbers on the causes you most care about, so you can experience the joy and satisfaction of seeing your work really, actually change the world every single day. Almost any parent you asked would tell you that they want their children to be happy, successful adults. But many of us forget (or never knew to begin with) that lasting personal joy is not necessarily found the way the world says it is--through reaching a certain socioeconomic status, having a certain job, buying a certain house, or having a certain amount in one's bank account. In fact, says Kristen Welch, popular blogger and author of Raising Grateful Kids in an Entitled World, personal satisfaction comes not from grabbing onto things but from holding them with an open hand and, very often, giving them away. In this inspiring book, Welch shows parents how to discover for themselves and instill in their kids the profound joy that comes from sharing what we have been given--our time, our talents, and even what's in our wallets--with those who have less. Through powerful personal stories as well as stories from Scripture, Welch offers a tantalizing alternative to status quo parenting that has the power to impact not only our own families but the entire world. At the end of each chapter, one of the author's kids offers their perspective on what it's like to be raised as a world changer. Savor your food, soothe difficult emotions, and enjoy every moment with powerful mindfulness practices! Do you turn to food when you're feeling bored, depressed, or anxious? Do you

judge your body for not fitting into some ideal shape or size? If so, you aren't alone. Diet culture has sabotaged our relationship with food and our bodies. As a result, many of us are confused—attaching shame to our food choices and judging our bodies. It's time to break free! *Savor Every Bite* offers powerful mindfulness and compassion practices for soothing difficult emotions and cultivating positive coping strategies. From psychologist and mindful eating expert Lynn Rossey, this book provides daily tips and tools for whole-body healing—including how to eat mindfully, move your body in ways that feel delicious, and live with greater ease and joy. With this guide, you'll learn mindfulness skills to help you navigate the difficulties of daily life and cultivate a lasting sense of calm, clarity, and profound happiness. It's time to start savoring your life! A reference guide for change agents, leaders and activists everywhere for business leaders, politicians, policymakers, researchers and thought-leaders, social entrepreneurs, community leaders and philanthropists... in fact, everyone and anyone who knows we need profound change and is frustrated that it's not happening. Across the planet millions of people are working to create a better world for current and future generations. Yet, while we have less than a generation in which to change course in order to prevent serious ecological collapse, our societies are increasingly polarised and our leadership seemingly unable to effectively chart a new course. Despite our best efforts, we are failing to create the change we need at the pace necessary within the available window of time for action. The reason is that our perspectives on what we are doing (and why) are insufficient for the complex issues at hand. To fix the problems, we must first build the capacity to work from a new and higher order of thinking. *Changing The World We Create* explains: the need for a collective change in perspectives, what specifically are the changes required, and the beginnings of how we can make it happen. Problem, solution, execution. This book is the result of two years collaboration between Tomas Björkman (on the basis of his seminal work *The World We Create*) and global change agents Mark Drewell and Björn Larsson. It has been designed to be a short, accessible starting point for your journey into new perspectives that will unlock a better future for us all. There is no guarantee that embracing new perspectives will change the trajectory for humanity. We can however be sure that we will fail, if we do not. Building a better future locally and globally is the topic of this user's guide written by a diverse collaborative of innovators. "Worldchanging" demonstrates that the means for making a difference lie all around. Children live in rapidly changing times that require them to constantly adapt to new economic, social, and cultural conditions. In this book, a distinguished, interdisciplinary group of scholars explores the issues faced by children in contemporary societies, such as discrimination in school and neighborhoods, the emergence of new family forms, the availability of new communication technologies, and economic hardship, as well as the stresses associated with immigration, war, and famine. The book applies a historical, cultural, and life-course developmental framework for understanding the factors that affect how children adjust to these challenges, and offers a new perspective on how changing historical circumstances alter children's developmental outcomes. It is ideal for researchers and graduate students in developmental and educational psychology or the sociology and anthropology of childhood. #1 New York Times Bestseller "Significant...The book is both instructive and surprisingly moving." —The New York Times Ray Dalio, one of the world's most successful investors and entrepreneurs, shares the unconventional principles that he's developed, refined, and used over the past forty years to create unique results in both life and business—and which any person or organization can adopt to help achieve their goals. In 1975, Ray Dalio founded an investment firm, Bridgewater Associates, out of his two-bedroom apartment in New York City. Forty years later, Bridgewater has made more money for its clients than any other hedge fund in history and grown into the fifth most important private company in the United States, according to *Fortune* magazine. Dalio himself has been named to *Time* magazine's list of the 100 most influential people in the world. Along the way, Dalio discovered a set of unique principles that have led to Bridgewater's exceptionally effective culture, which he describes as "an idea meritocracy that strives to achieve meaningful work and meaningful relationships through radical transparency." It is these principles, and not anything special about Dalio—who grew up an ordinary kid in a middle-class Long Island neighborhood—that he believes are the reason behind his success. In *Principles*, Dalio shares what

he ' s learned over the course of his remarkable career. He argues that life, management, economics, and investing can all be systemized into rules and understood like machines. The book ' s hundreds of practical lessons, which are built around his cornerstones of “ radical truth ” and “ radical transparency, ” include Dalio laying out the most effective ways for individuals and organizations to make decisions, approach challenges, and build strong teams. He also describes the innovative tools the firm uses to bring an idea meritocracy to life, such as creating “ baseball cards ” for all employees that distill their strengths and weaknesses, and employing computerized decision-making systems to make believability-weighted decisions. While the book brims with novel ideas for organizations and institutions, Principles also offers a clear, straightforward approach to decision-making that Dalio believes anyone can apply, no matter what they ' re seeking to achieve. Here, from a man who has been called both “ the Steve Jobs of investing ” and “ the philosopher king of the financial universe ” (CIO magazine), is a rare opportunity to gain proven advice unlike anything you ' ll find in the conventional business press.

An urgent and illuminating portrait of forest migration, and of the people studying the forests of the past, protecting the forests of the present, and planting the forests of the future. Forests are restless. Any time a tree dies or a new one sprouts, the forest that includes it has shifted. When new trees sprout in the same direction, the whole forest begins to migrate, sometimes at astonishing rates. Today, however, an array of obstacles—humans felling trees by the billions, invasive pests transported through global trade—threaten to overwhelm these vital movements. Worst of all, the climate is changing faster than ever before, and forests are struggling to keep up. A deft blend of science reporting and travel writing, *The Journeys of Trees* explores the evolving movements of forests by focusing on five trees: giant sequoia, ash, black spruce, Florida torreya, and Monterey pine. Journalist Zach St. George visits these trees in forests across continents, finding sequoias losing their needles in California, fossil records showing the paths of ancient forests in Alaska, domesticated pines in New Zealand, and tender new sprouts of blight-resistant American chestnuts in New Hampshire. Everywhere he goes, St. George meets lively people on conservation ' s front lines, from an ecologist studying droughts to an evolutionary evangelist with plans to save a dying species. He treks through the woods with activists, biologists, and foresters, each with their own role to play in the fight for the uncertain future of our environment. An eye-opening investigation into forest migration past and present, *The Journeys of Trees* examines how we can all help our trees, and our planet, survive and thrive.

Why getting results should be every nonprofit manager's first priority A nonprofit manager's fundamental job is to get results, sustained over time, rather than boost morale or promote staff development. This is a shift from the tenor of many management books, particularly in the nonprofit world. *Managing to Change the World* is designed to teach new and experienced nonprofit managers the fundamental skills of effective management, including: managing specific tasks and broader responsibilities; setting clear goals and holding people accountable to them; creating a results-oriented culture; hiring, developing, and retaining a staff of superstars. Offers nonprofit managers a clear guide to the most effective management skills Shows how to address performance problems, dismiss staffers who fall short, and the right way to exercising authority Gives guidance for managing time wisely and offers suggestions for staying in sync with your boss and managing up This important resource contains 41 resources and downloadable tools that can be implemented immediately. Offers a radical rethinking of Marx's concept of revolution that shows how we can bring about social and political change today. Meet 12 kids who have taken action to change their community, town, country, even the world in this inspiring new book! From donating birthday money to the local animal shelter to planting a billion trees worldwide, these kids stories will inspire you to make a difference! The world is becoming more complex, fraught with increasing possibilities for conflict over national rivalries, economic competition, and cultural and ideological fault lines. This clear-eyed text offers a structured and theoretically grounded way to think about the forces that animate change and the alternative futures they may create. Donald Kelley views both contemporary reality and the future we face through the perspective of four different paradigms that shape our way of thinking about the world: The nation-state paradigm, built on the assumption that the traditional Westphalian nation-state remains the key building block of the

present and the future, which leads us to predict the future in terms of the nature and alignment of nation-states. The economic paradigm, built on the assumption that economic factors are increasingly important, which leads us to see the future in terms of factors such as interdependence, globalization, and trade as well as the growing opposition to these developments and the prioritization of national economic needs. The identity and culture paradigm, built on the distinct identities and cultures of nations and regions, which leads us to view the future in terms of conflicting culture-based communities transcending formal national or economic interests. The ideology paradigm, based on a post-cold war reemergence of ideological conflict within and among nations, which leads us to view a world based on ideology-based conflict. From these paradigms and their interactions, Kelley builds a series of possible alternative futures of the international system. His framework provides a unique way of looking at how and why the world is changing and the many different “ futures ” —some peaceful and productive, some warlike and destructive, and others simply dysfunctional—in which we might live.

Perhaps more unusually, Mr. Dalio has managed to identify metrics from that history that can be applied to understand today. ” —Andrew Ross Sorkin, *The New York Times*

From legendary investor Ray Dalio, author of the #1 New York Times bestseller *Principles*, who has spent half a century studying global economies and markets, *Principles for Dealing with the Changing World Order* examines history ’ s most turbulent economic and political periods to reveal why the times ahead will likely be radically different from those we ’ ve experienced in our lifetimes—and to offer practical advice on how to navigate them well. A few years ago, Ray Dalio noticed a confluence of political and economic conditions he hadn ’ t encountered before. They included huge debts and zero or near-zero interest rates that led to massive printing of money in the world ’ s three major reserve currencies; big political and social conflicts within countries, especially the US, due to the largest wealth, political, and values disparities in more than 100 years; and the rising of a world power (China) to challenge the existing world power (US) and the existing world order. The last time that this confluence occurred was between 1930 and 1945. This realization sent Dalio on a search for the repeating patterns and cause/effect relationships underlying all major changes in wealth and power over the last 500 years. In this remarkable and timely addition to his *Principles* series, Dalio brings readers along for his study of the major empires—including the Dutch, the British, and the American—putting into perspective the “ Big Cycle ” that has driven the successes and failures of all the world ’ s major countries throughout history. He reveals the timeless and universal forces behind these shifts and uses them to look into the future, offering practical principles for positioning oneself for what ’ s ahead. This book examines the impacts of global change on terrestrial ecosystems. Emphasis is placed on impacts of atmospheric, climate and land use change, and the book discusses the future challenges and the scientific frameworks to address them. Finally, the book explores fundamental new research developments and the need for stronger integration of natural and human dimensions in addressing the challenge of global change. This open access book presents the results from the second cycle of the IEA International Civic and Citizenship Education Study (ICCS 2016). Using data from 24 countries in Asia, Europe and Latin America, the study investigates the ways in which young people are prepared to undertake their roles as citizens in a range of countries in the second decade of the 21st century. It also responds to the enduring and emerging challenges of educating young people in a world where contexts of democracy and civic participation continue to change. New developments of this kind include the increase in the use of social media by young people as a tool for civic engagement, growing concerns about global threats and sustainable development, as well as the role of schools in fostering

peaceful ways of interaction between young people. Besides enabling the evaluation of a wide range of aspects of civic and citizenship education, including those related to recent developments in a number of countries, the inclusion of test and questionnaire material from the first cycle of the study in 2009 allows the results from ICCS 2016 to be used to examine changes in civic knowledge, attitudes and engagement over seven years. The central purpose of this collection of essays is to make a creative addition to the debates surrounding the cultural heritage domain. In the 21st century the world faces epochal changes which affect every part of society, including the arenas in which cultural heritage is made, held, collected, curated, exhibited, or simply exists. The book is about these changes; about the decentring of culture and cultural heritage away from institutional structures towards the individual; about the questions which the advent of digital technologies is demanding that we ask and answer in relation to how we understand, collect and make available Europe's cultural heritage. Cultural heritage has enormous potential in terms of its contribution to improving the quality of life for people, understanding the past, assisting territorial cohesion, driving economic growth, opening up employment opportunities and supporting wider developments such as improvements in education and in artistic careers. Given that spectrum of possible benefits to society, the range of studies that follow here are intended to be a resource and stimulus to help inform not just professionals in the sector but all those with an interest in cultural heritage. This Wall Street Journal and USA Today bestseller is filled with true stories about how one small deed can make a world of difference. "Elegant and wise" (Deepak Chopra). "The most uplifting and life-affirming book in years" (Forbes). "This might be the most beautiful book I've ever read. It's lifted my soul and brought me to tears in all the right ways." —Jane Green, author of 18 New York Times bestsellers Named best inspirational book of the year by the Independent Book Publishers Association and chosen as an International Book Awards winner, HumanKind is the heartwarming, feel-good book we all need right now. These inspiring stories will open your heart and rekindle your faith in humanity. You'll meet the mentor who changed a child's life with a single lesson in shoe-tying and see the far-reaching ripple effects of that seemingly small deed. You'll also meet the six-year-old who launched a global kindness movement; the band of seamstress grandmothers who patch clothes and mend hearts for homeless people; the puppy, given as a gift, that touched the lives of thousands of children; and many other heroes. There are also practical tips for making a difference with your own words and deeds, and the resource section lists organizations where you can channel your efforts to create your own ripples of kindness. HumanKind is a great gift to yourself and anyone who's been a source of kindness in your life. It will leave you grateful for what you have, provide a refuge from the negativity that surrounds us, and remind you of what really matters. All author royalties are donated to Big Brothers Big Sisters. In May of 1919, women from around the world gathered in Zurich, Switzerland, and proclaimed, "We dedicate ourselves to peace!" Just months after the end of World War I, the Womens International League for Peace and Freedom--a group led by American progressive Jane Addams and comprising veteran campaigners for social reform--knew that a peaceful world was essential to their ongoing quest for social and economic justice. Alan Dawley tells the story of American progressives during the decade spanning World War I and its aftermath. He shows how they laid the foundation for progressive internationalism in their efforts to improve the world both at home and abroad. Unlike other accounts of the progressive movement--and of American politics in general--this book fuses social and international history. Dawley shows how interventions in Latin America and Europe affected domestic plans for social reform and civic engagement, and he depicts internal battles among progressives between unabashed imperialists like Theodore Roosevelt and their implacable opponents like Robert La Follette. He draws a contrast between Woodrow Wilson's use of force in exporting American ideals and Addams's more cosmopolitan pursuit of economic justice and world peace. In discussing the debate over the League of Nations within the context of turbulent domestic affairs, Dawley brings keen insight into that complicated moment in American history. In striking and original ways, Dawley brings together domestic and world affairs to argue that American progressivism cannot be understood apart from its international context. Focusing on world-historical events of empire, revolution, war, and peace, he shows how American reformers invented a new politics built

around progressive internationalism. Changing the World retrieves the progressive tradition in American politics and makes it available to contemporary debates. The book speaks to anyone seeking to be both a good citizen within the nation and a good citizen of today's troubled world. Today's students will face the unprecedented challenges of a rapidly warming world, including emerging diseases, food shortages, drought, and waterlogged cities. How do we prepare 9.5 billion people for life in the Anthropocene, to thrive in this uncharted and more chaotic future? Answers are being developed in universities, preschools, professional schools, and even prisons around the world. In the latest volume of State of the World, a diverse group of education experts share innovative approaches to teaching and learning in a new era. EarthEd will inspire anyone who wants to prepare students not only for the storms ahead but to become the next generation of sustainability leaders. The education system is in crisis. In a recent survey, the United States was ranked sixteenth in literacy among a group of twenty-three developed nations. The numbers reveal a vicious cycle: a lack of education and literacy reduces a person's chances of economic prosperity, which can ultimately lead to a life of poverty and crime. Yet there is still so much that is good and effective about the American educational system and the way our children learn. Changing the World One Book at a Time serves as a wake-up call to America -- and an impetus to start a literary revolution. Activist, author, lawyer, and speaker James W. Parkinson has spent almost a decade traveling across America speaking to more than 40,000 teachers, mentors, administrators, parents, and students to spread his message of the importance of self-education and literacy. He examines the shortcomings of the country's current system, discusses the researchers, politicians, and educators who are positively influencing and changing the world of education, and shares powerful and poignant stories of the successes. His message is clear: reading is the key to one's achievement in life. This book serves as an inspiration to students who want to take responsibility for their future and their education. Entertaining reading. ” —The Washington Post Anand Giridharadas takes us into the inner sanctums of a new gilded age, where the rich and powerful fight for equality and justice any way they can—except ways that threaten the social order and their position atop it. They rebrand themselves as saviors of the poor; they lavishly reward “ thought leaders ” who redefine “ change ” in ways that preserve the status quo; and they constantly seek to do more good, but never less harm. Giridharadas asks hard questions: Why, for example, should our gravest problems be solved by the unelected upper crust instead of the public institutions it erodes by lobbying and dodging taxes? His groundbreaking investigation has already forced a great, sorely needed reckoning among the world ’ s wealthiest and those they hover above, and it points toward an answer: Rather than rely on scraps from the winners, we must take on the grueling democratic work of building more robust, egalitarian institutions and truly changing the world—a call to action for elites and everyday citizens alike.
