Edmonds, 2018-03-01 Learning Financial Accounting can often feel like learning a foreign language to students in particular when terminology and procedure is piled on before core concepts are truly mastered Introductory Financial Accounting for Business is an innovative approach that emphasizes critical thinking over the rote memorization of terms such as debits and credits The sequential learning model employed by the authors helps students see the bottom line consequences of financial statements as it relates to the overall business better preparing them for careers as accountants entrepreneurs and decision makers The authors focus initially on conceptual underpinnings the reasons why we approach procedures the way we do rather than confusing students by front loading the material with over complicated details Author Chris Edmonds has also created a highly popular and widely used series of video lectures which engage students by clearly and charismatically going over each learning objective in a conversational style These videos help reinforce important lessons and are always available for review By developing this stronger foundation students understand Accounting ideas more broadly and are able to ultimately learn procedural applications more quickly and accurately With a straightforward writing style and highly engaging video lectures this dynamic author team leads students down a streamlined learning path focused on critical thinking clarity of concept and applicability of material to the real world
