Adorno, Foucault and the Critique of the West Deborah Cook, 2018-11-27 The alliance of critical theory between Frankfurt and Paris Adorno Foucault and the Critique of the West argues that critical theory continues to offer valuable resources for critique and contestation during this turbulent period To assess these resources it examines the work of two of the twentieth century's more prominent social theorists Theodor W Adorno and Michel Foucault Although Adorno was situated squarely in the Marxist tradition that Foucault would occasionally challenge Deborah Cook demonstrates that their critiques of our current predicament are complementary in important respects Among other things these critiques converge in their focus on the historical conditions economic in Adorno and political in Foucault that gave rise to the racist and authoritarian tendencies that continue to blight the West Cook also shows that when Adorno and Foucault plumb the economic and

McCarthy, 2015-06-12 The Routledge Handbook of Political Ecology presents a comprehensive and authoritative examination of the rapidly growing field of political ecology. Located at the intersection of geography, anthropology, sociology, and environmental history, political ecology is one of the most vibrant and conceptually diverse fields of inquiry into nature-society relations within the social sciences. The Handbook serves as an essential guide to this rapidly evolving intellectual landscape. With contributions from over 50 leading authors, the Handbook presents a systematic overview of political ecology's origins, practices, and core concerns, and aims to advance both ongoing and emerging debates. While there are numerous edited volumes, textbooks, and monographs under the heading political ecology, these have tended to be relatively narrow in scope, either as collections of empirically based, mostly case study research on a given theme, or broad overviews of the field aimed at undergraduate audiences. The Routledge Handbook of Political Ecology is the first systematic, comprehensive overview of the field. With authors from North and South America, Europe, Australia, and elsewhere, the Handbook of Political Ecology provides a state-of-the-art examination of political ecology, addresses ongoing and emerging debates in this rapidly evolving field, and charts new agendas for research, policy, and activism. The Routledge Handbook of Political Ecology introduces political ecology as an interdisciplinary academic field. By presenting a state-of-the-art examination of the field, it will serve as an invaluable resource for students and scholars. It not only critically reviews the key debates in the field but also develops them. The Handbook will serve as an excellent resource for graduate and advanced undergraduate teaching and is a key reference text for geographers, anthropologists, sociologists, environmental historians, and others working in and around political ecology.

Commodification of Global Agrifood Systems and Agro-Ecology Yıldız Atasoy, 2017-05-18 This book explores the shifting relations of food provisioning in Turkey from a comparative, global political economy perspective. It offers in-depth ethnographic analysis, interviews, and historical insights into the ambiguities and diversities that simultaneously affect the changing conditions of food and agriculture in Turkey. Specific issues examined include the commodification of land, food, and labour; the expansion and deepening of industrial standardization; the expansion of a supermarket model; and concomitant changes in, as well as the simultaneous co-existence of traditional methods of production and marketing. Contrasting observations are drawn from diverse locales to provide examples of convergence, divergence, and cohabitation in relation to transnationally advocated industrial models.

Commodification of Global Agrifood Systems and Agro Ecology employs a form of comparative perspective that allows the particular processes of restructuring of agrifood relations in Turkey to be simultaneously distinguished from yet related to changes taking place in global power dynamics Y ld z Atasoy explores agrifood transformation in Turkey with a unique approach that considers a plurality of intertwined normative influences ontological beliefs cultural religious narratives political struggles and critical interpretive positions Based on original research the book treats changes in food provisioning as an analytical thread capable of uncovering how the normative acceptability of capitalized agriculture and techno scientific innovation is entangled with processes of class formation growing inter capitalist competition and Islamic politics Such processes in turn frame income wealth generation landscape management agro ecological dynamics and labour practices as well as the taste and smell of place The Routledge Atlas of South Asian Affairs Robert W. Bradnock,2015-10-14 South Asia has developed from a group of newly independent post Colonial states of at most secondary importance to the wider world to its current position as a region of central strategic importance to both global economic development and world peace and stability This Atlas highlights the global significance of South Asia in relation to economic geopolitical and strategic interests It provides a coherent descriptive and analytical account of the key elements of the complex societies that make up the region and its component countries Illustrated with more than 100 original maps and offering concise entries on key issues the book is structured thematically in these sections Global Context Geographical Environments Historical Evolution of South Asia Key Issues in modern South Asia Economy and Security Designed for use in teaching undergraduate and graduate classes and seminars in geography history economics anthropology international relations political science and the environment as well as regional courses on the South Asia this book is also a comprehensive reference source for libraries and decision makers focusing on South Asia The Philippine Archipelago Yves Boquet,2017-04-19 This book presents an updated view of the Philippines focusing on thematic issues rather than a description region by region Topics include typhoons population growth economic difficulties agrarian reform migration as an economic strategy the growth of Manila the Muslim question in Mindanao the South China Sea tensions with China and the challenges of risk vulnerability and sustainable development
