Students at Risk of School Failure José Jesús Gázquez, José Carlos Núñez, 2018-10-18

The main objective of this Research Topic is to determine the conditions that place students at risk of school failure identifying student and context

variables In spite of the fact that there is currently little doubt about how one learns and how to teach in some countries of the developed world there is still there is a high rate of school failure Although the term school failure is a very complex construct insofar as its causes consequences and development from the field of educational psychology the construct student engagement has recently gained special interest in an attempt to deal with the serious problem of school failure School engagement builds on the anatomy of the students involvement in school and describes their feelings behaviors and thoughts about their school experiences So engagement is an important component of students school experience with a close relationship to achievement and school failure Children who self set academic goals attend school regularly and on time behave well in class complete their homework and study at home are likely to interact adequately with the school social and physical environments and perform well in school In contrast children who miss school are more likely to display disruptive behaviors in class miss homework frequently exhibit violent behaviors on the playground fail subjects be retained and if the behaviors persist quit school Moreover engagement should also be considered as an important school outcome eliciting more or less supportive reactions from educators For example children who display school engaged behaviors are likely to receive motivational and instructional support from their teachers The opposite may also be true But what makes student engage more or less The relevant literature indicates that personal variables e g sensory motor neurodevelopmental cognitive motivational emotional behavior problems learning difficulties addictions social and or cultural variables e g negative family conditions child abuse cultural deprivation ethnic conditions immigration or school variables e g coexistence at school bullying cyberbullying may concurrently hinder engagement preventing the student from acquiring the learnings in the same conditions as the rest of the classmates

Educational Interpreting Elizabeth A. Winston, 2004 This incisive book explores the current state of educational interpreting and how it is failing deaf students The contributors all renowned experts in their field include former educational interpreters teachers of deaf students interpreter trainers and deaf recipients of interpreted education *Educational Interpreting* presents the salient issues in three distinct sections Part 1 focuses on deaf students their perspectives on having interpreters in the classroom the language myths that surround them the accessibility of language to them and their cognition Part 2 raises questions about the support and training that interpreters receive from the school systems the qualifications that many interpreters bring to an interpreted education and the accessibility of everyday classrooms for deaf students placed in such environments Part 3 presents a few of the possible suggestions for addressing the concerns of interpreted education and focuses primarily on the interpreter The contributors discuss the need to 1 define the core knowledge and skills interpreters must have and 2 develop standards of practice and assessment They also stress that interpreters cannot effect the necessary changes alone unless and until administrators parents teachers and students recognize the inherent issues of access to education through mediation little will change for deaf students
