It is absolutely packed with practical ideas and activities to help you love maths, and love teaching and/or learning it. It certainly helps to develop an enthusiasm for a subject most adults tend to say "I'm no good at..."? - Early Years Educator 'A wonderful book, packed with practical ideas and activities to help all students love maths.' - Jo Boaler, Professor of Mathematics Education, Stanford University Fostering an enthusiasm for mathematics in young children is a vital part of supporting their mathematical development. Underpinned by subject and pedagogical knowledge, case studies and research-based perspectives, the authors provide clear guidance on how to support young children's learning and understanding in an effective and engaging way. Contemporary approaches to developing essential mathematical learning for young children are explored, including: play, practical activities and talk for mathematics outdoor learning understanding pattern counting, calculation and place value measures and shape problem solving and representing mathematics assessment working with parents. Written for both trainees and practitioners working with children aged 0 to 8 years, including those studying for Early Years and Early Childhood degrees and those on Primary PGCE and Primary Education courses, this book offers mathematical subject knowledge and teaching ideas in one volume. Helen Taylor is Course Leader of PGCE Primary Part-time Mathematics at Canterbury Christ Church University. Andrew Harris is Course Leader of PGCE Modular Mathematics at Canterbury Christ Church University. Bond is the number 1 provider of 11+ practice, helping millions of children pass selective entrance exams. Bond Maths Assessment Papers for 11+-12+ years Book 1 are topic-based practice questions for the 11+ exam. They have been written to cover the core 11+ question types your child will experience in their actual exam, building the skills and confidence for exam success. Bond Maths Assessment Papers 11+-12+ years Book 2 (ISBN: 9780192740199) is also available. Results from national and international assessments indicate that school children in the United States are not learning mathematics well enough. Many students cannot correctly apply computational algorithms to solve problems. Their understanding and use of decimals and fractions are especially weak. Indeed, helping all children succeed in mathematics is an imperative national goal. However, for our youth to succeed, we need to change how we're teaching this discipline. Helping Children Learn Mathematics provides comprehensive and reliable information that will guide efforts to improve school mathematics from pre--kindergarten through eighth grade. The authors explain the five strands of mathematical proficiency and discuss the major changes that need to be made in mathematics instruction, instructional materials, assessments, teacher education, and the broader educational system and answers some of the frequently asked questions when it comes to mathematics instruction. The book concludes by providing recommended actions for parents and caregivers, teachers, administrators, and policy makers, stressing the importance that everyone work together to ensure a mathematically literate society. General syllabus describes two pathways that start in Year 11. Even though both pathways share a common Preliminary course, students taking each pathway have specific learning needs, so we have published two levels of student texts for Year 11. Pathway 1 caters for students who have completed Stage 5.1 by the end of Year 10 and are headed towards the workforce or further training after school. The course encourages the development of practical mathematical skills for life. It supports a vocational pathway that is a content-endorseda but not HSC-examinable. Pathway 2 is the more traditional and academic pathway, covering a revised General Maths course, for students who have completed some or all of Stage 5.2 (especially in algebra and trigonometry), and are heading towards an HSC exam, ATAR and university study. These Teacher's Blackline Masters contain over 100 worksheets from NelsonNet in hardcopy form, spiral-bound for easy photocopying. They include material for both Pathway 1 and Pathway 2 of the new General Mathematics syllabus for Year 11. The Bonus Resource Downloads section on this page contains a PowerPoint presentation "Exploring the new Mathematics General Syllabus" and a summary of course changes written by series editor Robert Yen.
