The Intentional Teacher Jun 06 2024 Here finally is a book that recognizes there is a middle ground where children and adults share responsibility for learning and that the most effective teachers make thoughtful, intentional use of both child-guided and adult-guided experience.

Mindful Teaching with Technology Mar 11 2022 Technology is integral to teaching in the English language arts, whether in-person, hybrid, or remote. In this indispensable guide, Troy Hicks shows how to teach and model "digital diligence"--an alert, intentional stance that helps both teachers and students use technology productively, ethically, and responsibly. Resources and lesson ideas are presented to build adolescents' skills for protecting online privacy, minimizing digital distraction, breaking through "filter bubbles," fostering civil conversations, evaluating information on the internet, creating

meaningful digital writing, and deeply engaging with multimedia texts. Dozens of websites, apps, and other tools are reviewed, with links provided at the companion website; end-of-chapter teaching points and guiding questions facilitate learning and application.

Transforming Teaching Jul 15 2022 Child-centered lesson planning provides a system to strengthen teaching. Great lesson planning helps teachers to choose a range of strategies that match what children are learning and doing-- from directed mini-lessons to facilitated group activities.

*The Thinking Teacher* Feb 02 2024 "Self-directed professional development resource for early childhood teachers. Includes self-assessment tools to help educators reexamine their teaching philosophy and integrate new knowledge and strategies into their practice. Also includes digital content"--

**Making Connections** Nov 18 2022 In this volume the authors document examples of programmes/courses/activities that are designed intentionally to build students' capacity to be integrative thinkers and learners. In doing so they try to analyse and name the learning that is taking place, and so make it visible to the reader. The work is intended as a resource for all those involved in teaching and student learning in Higher Education and beyond. The ultimate goal is to ensure that students in higher education can make meaningful connections within and between disciplines, for example by integrating on-campus and off-campus learning experiences, and tying together and synchronising different perspectives and ways of knowing. This paper contains the following chapters: (1) Drawing on Medical Students' Representations to Illuminate Concepts of Humanism and Professionalism in Newborn Medicine (C. Anthony Ryan); (2) Integrative Learning in a Law and Economics Module (John Considine); (3) Making Connections for Mindful Inquiry: Using Reflective Journals to Scaffold an Autobiographical Approach to Learning in Economics (Daniel Blackshields); (4) Integrative Learning on a Criminal Justice Degree Programme (Sinead Conneely and Walter O'Leary); (5) The Use of Learning Journals in Legal Education as a Means of Fostering Integrative Learning through Pedagogy and Assessment (Shane Kilcommins); (6) Beyond Wikipedia and Google: Web-Based Literacies and Student Learning (James G.R. Cronin); (7) Archetype or for the Archive? Are Case Histories Suitable for Assessing Student Learning? (Martina Kelly, Deirdre Bennett and Suin O'Flynn); (8) The Arts

in Education as an Integrative Learning Approach (Marian McCarthy); (9) Assessing the Role of Integrated Learning in the BSc International Field Geosciences (IFG) at University College Cork, Ireland (Pat Meere); (10) The Confluence of Professional Legal Training, ICT and Language Learning towards the Construction of Integrative Teaching and Learning (Maura Butler); (11) Integrative Learning with High Fidelity Simulation and Problem-Based Learning: An Evaluative Study (Nuala Walshe, Sinead O'Brien, Angela Flynn, Siobhan Murphy and Irene Hartigan); (12) Facilitating Learning through an Integrated Curriculum Design Driven by Problem-Based Learning: Perceptions of Speech and Language Therapy (Catharine Pettigrew); (13) Building Student Attributes for Integrative Learning (Bettie Higgs); and (14) End-Game: Good Beginnings are Not the Only Measure of Success (C. **Intentional Teaching** Apr 23 2023 "Teachers need to begin viewing themselves as facilitators for learning. This book addresses this need."--Patti Grammens, Teacher South Forsyth Middle School, Cumming, GA.

Eight Essential Techniques for Teaching with Intention Feb 19 2023 In her latest book, bestselling author Ann Lewin-Benham describes eight techniques that foster intentional and reflective classroom practice. She presents over 70 novel exercises to help teachers learn to use body, face, hands, voice, eyes, and word choices to precisely convey meaning. Some exercises are for teachers to practice, while others build intention and reflection in children. Dozens of scenarios from typical classroom situations contrast unintentional and intentional teaching behaviors. A self-assessment enables teachers to measure how intentional and reflective they become as they learn to use the eight techniques. This lively and often humorous resource is a companion to Lewin-Benham's Twelve Best Practices for Early Childhood Education, which explains what to teach and why. This new book explains how to teach.

*Intentional Teaching* Jun 25 2023 This book helps educators in all settings to understand the principles of intentional teaching, and highlights how intentional teaching practices can support learning outcomes for children. The book includes shared understandings of intentional teaching through conversation and reflection with many educators. Its purpose is to portray real and meaningful stories to highlight the ways in which educators have been intentional when planning for education and care with children. Discussion explores the confusion that seems to exist among some educators. They misinterpret it and either think there is no need for intentional teaching, think it is formal instruction in a play-based curriculum or are unsure of what it looks like in practice. Through a shared conversation, the author presents practical strategies with insight, humour and common sense which will resonate with educators of all levels.

**Teach Students How to Learn** Dec 20 2022 Co-published with and Miriam, a freshman Calculus student at Louisiana State University, made 37.5% on her first exam but 83% and 93% on the next two. Matt, a first year General Chemistry student at the

University of Utah, scored 65% and 55% on his first two exams and 95% on his third—These are representative of thousands of students who decisively improved their grades by acting on the advice described in this book. What is preventing your students from performing according to expectations? Saundra McGuire offers a simple but profound answer: If you teach students how to learn and give them simple, straightforward strategies to use, they can significantly increase their learning and performance. For over a decade Saundra McGuire has been acclaimed for her presentations and workshops on metacognition and student learning because the tools and strategies she shares have enabled faculty to facilitate dramatic improvements in student learning and success. This book encapsulates the model and ideas she has developed in the past fifteen years, ideas that are being adopted by an increasing number of faculty with considerable effect. The methods she proposes do not require restructuring courses or an inordinate amount of time to teach. They can often be accomplished in a single session, transforming students from memorizers and regurgitators to students who begin to think critically and take responsibility for their own learning. Saundra McGuire takes the reader sequentially through the ideas and strategies that students need to understand and implement. First, she demonstrates how introducing students to metacognition and Bloom's Taxonomy reveals to them the importance of understanding how they learn and provides the lens through which they can view learning activities and measure their intellectual growth. Next, she presents a specific study system that can quickly empower students to maximize their learning. Then, she addresses the importance of dealing with emotion, attitudes, and motivation by suggesting ways to change students' mindsets about ability and by providing a range of strategies to boost motivation and learning; finally, she offers guidance to faculty on partnering with campus learning centers. She pays particular attention to academically unprepared students, noting that the strategies she offers for this particular population are equally beneficial for all students. While stressing that there are many ways to teach effectively, and that readers can be flexible in picking and choosing among the strategies she presents, Saundra McGuire offers the reader a step-by-step process for delivering the key messages of the book to students in as little as 50 minutes. Free online supplements provide three slide sets and a sample video lecture. This book is

written primarily for faculty but will be equally useful for TAs, tutors, and learning center professionals. For readers with no background in education or cognitive psychology, the book avoids jargon and esoteric theory.

**Funds of Knowledge** Sep 16 2022 The concept of "funds of knowledge" is based on a simple premise: people are competent and have knowledge, and their life experiences have given them that knowledge. The claim in this book is that first-hand research experiences with families allow one to document this competence and knowledge, and that such engagement provides many possibilities for positive pedagogical actions. Drawing from both Vygotskian and neo-sociocultural perspectives in designing a methodology that views the everyday practices of language and action as constructing knowledge, the funds of knowledge approach facilitates a systematic and powerful way to represent communities in terms of the resources they possess and how to harness them for classroom teaching. This book accomplishes three objectives: It gives readers the basic methodology and techniques followed in the contributors' funds of knowledge research; it extends the boundaries of what these researchers have done; and it explores the applications to classroom practice that can result from teachers knowing the communities in which they work. In a time when national educational discourses focus on system reform and wholesale replicability across school sites, this book offers a counter-perspective stating that instruction must be linked to students' lives, and

that details of effective pedagogy should be linked to local histories and community contexts. This approach should not be confused with parent participation programs, although that is often a fortuitous consequence of the work described. It is also not an attempt to teach parents "how to do school" although that could certainly be an outcome if the parents so desired. Instead, the funds of knowledge approach attempts to accomplish something that may be even more challenging: to alter the perceptions of working-class or poor communities by viewing their households primarily in terms of their strengths and resources, their defining pedagogical characteristics. Funds of Knowledge: Theorizing Practices in Households, Communities, and Classrooms is a critically important volume for all teachers and teachers-to-be, and for researchers and graduate students of language, culture, and education.

**Teaching for Results** Jan 26 2021 In this revised edition Findley B. Edge explains that many Sunday school teachers fail to achieve better results because 'their teaching aims are too general and often vague.' The solution, he says, is for the teacher to focus on a single objective for each lesson and 'work toward that aim with singleness of purpose.'

**Developmentally Appropriate Practice in Early Childhood Programs Serving Children from Birth Through Age 8, Fourth Edition (Fully Revised and Updated)** Jan 21 2023 The long-awaited new edition of NAEYC's book *Developmentally Appropriate Practice in Early Childhood Programs* is here, fully revised and updated! Since the first edition in 1987, it has been an essential resource for the early childhood education field. Early childhood educators have a professional responsibility to plan and implement intentional, developmentally appropriate learning experiences that promote the social and emotional development, physical development and health, cognitive development, and general learning competencies of each child served. But what is developmentally appropriate practice (DAP)? DAP is a framework designed to promote young children's optimal learning and development through a strengths-based approach to joyful, engaged learning. As educators make decisions to support each child's learning and development, they consider what they know about (1) commonality in children's development and learning, (2) each child as an individual (within the context of their family and community), and (3) everything discernible about the social and cultural contexts for each child, each educator, and the program as a whole. This latest edition of the book is fully revised to underscore the critical role social and cultural contexts play in child development and learning, including new research about implicit bias and teachers' own context and consideration of advances in neuroscience. Educators implement developmentally appropriate practice by recognizing the many assets all young children bring to the early learning program as individuals and as members of families and communities. They

also develop an awareness of their own context. Building on each child's strengths, educators design and implement learning settings to help each child achieve their full potential across all domains of development and across all content areas.

**Powerful Interactions** Jul 03 2021 Make your everyday interactions with children intentional and purposeful with these steps: Be Present, Connect, and Extend Learning.

Building an Intentional School Culture Jun 01 2021 "Charles Elbot and David Fulton get it! They get how dominant a force a school's culture is in assisting—or thwarting—the development of learning and character and how extraordinarily difficult it is to make changes. Unlike most of us, they also get how possible it is to build a desirable school culture. This tidy little volume is the authors' first step in sharing their inventive lesson plans from their successful work as school culture builders. When we take these lessons learned to heart, we too will get it!" —Roland Barth, Professor Emeritus, Graduate School of Education Harvard University Transform your school by shaping a culture based on shared values, beliefs, and behaviors. Based on lessons learned from the authors' work in improving school culture for more than sixty schools across the country, this inspiring guide for school leaders helps create an "intentional school culture" that fosters excellence, builds character, and improves student achievement. The book provides tools, case studies, strategies, and implementation plans for building a strong school culture and offers guidelines for teacher trainings, principal workshops, staff meetings, and district-level use. The authors demonstrate how to: Support students' independent and interdependent thinking and behavior Foster ethical decision making Collaborate with students, parents, and teachers Evaluate and monitor a plan to enhance the existing school culture The authors illustrate how deliberately shaping a school culture cultivates faculty trust, sets the groundwork for raising test scores, and is a critical ingredient in building a successful school.

*Intentional Conceptual Change* Feb 27 2021 This volume brings together a distinguished, international list of scholars to explore the role of the learner's intention in knowledge change. Recent perspectives on learning, however, suggest that the learner can play an active, indeed, intentional role in the process of knowledge restructuring. This volume explores this new, innovative view of conceptual change learning using original contributions drawn from renowned scholars in a variety of disciplines. The volume is intended for scholars or advanced students studying knowledge acquisition and change, including educational psychology, developmental psychology, science education, cognitive science, learning science, instructional psychology, and instructional and curriculum studies.

As Peter Johnston writes, Through this book we have Debbie's teaching mind on loan. She engages us in the details of a teaching life from inside her mind, showing the thinking behind her teaching and the consequences of her actions. *Teaching with Intention* brings us into classrooms of teachers and children Miller has met over the last five years in her work as a literacy consultant. From setting up the classroom environment to the intentional use of language, from comprehension instruction to lesson design, Miller is explicit about what she does and why. At the same time, she encourages teachers to develop their own belief statements concerning teaching and learning and includes key questions to guide them in this important process.
