

Transactions List

December 16–31, 2022

Complete each of the following transactions in accordance with the seven-step process on pages 11–12 of the *Instructions and Flowcharts* book (step 5). Remember the importance of the flowcharts on pages 18–24 for details as to (a) documents to prepare, (b) approvals and other internal control procedures, (c) accounting entries, and (d) filing. You are to perform the roles of Ray Kramer, Nancy Ford, and Jim Adams. Flowchart page references are included in the third column of the transactions list where appropriate.

Some of the following events require the preparation or modification of documents and some do not. Although documents accompany most business transactions, you are asked to prepare and work with only a representative sample in this project. Each event on the transactions list includes one of three symbols, which determine whether documents from the loose document set in this project must be prepared or used:

Yes

You are required to prepare or modify documents from the loose document set for this event. An accounting entry may or may not be required.

No

You are not required to prepare or modify documents from the loose document set because documents would not normally be prepared or modified for this type of event. An accounting entry is required, with one exception: the annual change in employee pay rates.

No

You are not required to prepare or modify documents from the loose document set, although this type of event would normally require you to do so. These events are included to provide additional practice in recording transactions. An accounting entry is required.

- Hints are provided in boxed areas like this.

Engineering Niall Richard Murphy, Betsy Beyer, Chris Jones, Jennifer Petoff, 2016-03-23 The overwhelming majority of a software system's lifespan is spent in use not in design or implementation. So why does conventional wisdom insist that software engineers focus primarily on the design and development of large scale computing systems? In this collection of essays and articles key members of Google's Site Reliability Team explain how and why their commitment to the entire lifecycle has enabled the company to successfully build, deploy, monitor and maintain some of the largest software systems in the world. You'll learn the principles and practices that enable Google engineers to make systems more scalable, reliable and efficient lessons directly applicable to your organization. This book is divided into four sections: Introduction: Learn what site reliability engineering is and why it differs from conventional IT industry practices; Principles: Examine the patterns, behaviors and areas of concern that influence the work of a site reliability engineer; SRE Practices: Understand the theory and practice of an SRE's day to day work building and operating large distributed computing systems; Management: Explore Google's best practices for training, communication and meetings that your organization can use. **Welding Essentials** William L. A Hugo Award winning Novel Vinge is one of the best visionary writers of SF today. David Brin: Thousands of years in the future humanity is no longer alone in a universe where a mind's potential is determined by its location in space from superintelligent entities in the Transcend to the limited minds of the Unthinking Depths where only simple creatures and technology can function. Nobody knows what strange force partitioned space into these regions of thought but when the warring Straumli realm use an ancient Transcendent artifact as a weapon they unwittingly unleash an awesome power that destroys thousands of worlds and enslaves all natural and artificial intelligence. Fleeing this galactic threat Ravna crash lands on a strange world with a ship hold full of cryogenically frozen children the only survivors from a destroyed space lab. They are taken captive by the Tines an alien race with a harsh medieval culture and used as pawns in a ruthless power struggle. Tor books by Vernor Vinge: Zones of
