Acid Rain, Killer Rain

The writer engages the reader with references to common activities.

Every time you turn on the television or take a ride in a car, you could be contributing to a problem called acid rain. In this essay, you'll learn how acid rain is created, the effects of acid rain and more importantly, what we all can do to prevent it.

The writer includes a catchy title.

The writer lets the reader know what the rest of the paper will be about.

The writer uses subheads to help organize the paper.

How is acid rain created?

Acid rain forms when the gases that are given off by burning fuels, such as coal and gasoline, mix with rain. Many power plants burn fuels in order to create the electricity that we use in our homes and offices every day. Cars and trucks also send these gases into the air when they burn gasoline. When rain mixes with these gases, harmful substances called acids form. This is acid rain.

The writer explains what acid rain is.

The writer states the main ideas in the form of questions.

What are the effects of acid rain?

Acid rain damages everything that it touches. It poisons our rivers, ponds, lakes, streams and oceans along with all the life in them. It pollutes our soil and crops, weakens trees and can even kill fish and plants. Acid rain also eats away at buildings and statues.

The writer shows the effects of acid rain.

The writer suggests ways we can prevent acid rain.

How can we prevent acid rain?

We need to cut down on the pollution that gets into our air. Turn off lights, televisions and other electrical appliances if you are not using them. Walk or take a bike whenever possible. If you are traveling a long distance, take a bus or train to save fuel.

As research shows, acid rain harms our environment. But people everywhere can take small steps now to help protect our environment for future generations.

The writer makes an important point about how acid rain can be reduced.

The Political Classroom Diana E. Hess,Paula McAvoy,2014-11-13 WINNER 2016 Grawemeyer Award in Education Helping students develop their ability to deliberate political questions is an essential component of democratic education but introducing political issues into the classroom is pedagogically challenging and raises ethical dilemmas for teachers Diana E Hess and Paula McAvoy argue that teachers will make better professional judgments about these issues if they aim toward creating political classrooms which engage students in deliberations about questions that ask How should we live together Based on the findings from a large mixed method study about discussions of political issues within high school classrooms The Political Classroom presents in depth and engaging cases of teacher practice Paying particular attention to how political polarization and social inequality affect classroom dynamics Hess and McAvoy promote a coherent plan for providing students with a nonpartisan political education and for improving the quality of classroom deliberations

Why They Can't Write John Warner,2018-12-03 An important challenge to what currently masquerades as conventional wisdom regarding the teaching of writing There seems to be widespread agreement that when it comes to the writing skills of college students we are in the midst of a crisis In *Why They Can't Write* John Warner who taught writing at the college level for two decades argues that the problem isn't caused by a lack of rigor or smartphones or some generational character defect Instead he asserts we're teaching writing wrong Warner blames this on decades of educational reform rooted in standardization assessments and accountability We have done no more Warner argues than conditioned students to perform writing related simulations which pass temporary muster but do little to help students develop their writing abilities This style of teaching has made students passive and disengaged Worse yet it hasn't prepared them for writing in the college classroom Rather than making choices and thinking critically as writers must undergraduates simply follow the rules such as the five paragraph essay designed to

help them pass these high stakes assessments In *Why They Can't Write* Warner has crafted both a diagnosis for what ails us and a blueprint for fixing a broken system Combining current knowledge of what works in teaching and learning with the most enduring philosophies of classical education this book challenges readers to develop the skills attitudes knowledge and habits of mind of strong writers **Project-Based Activities, Grades 6 - 8** Schyrlet Cameron,Carolyn Craig,2017-01-03 Build teamwork enhance communication and refine critical thinking with Mark Twain Project Based Activities for sixth eighth grades The exercises in this book require students to collaborate while creating graphic novels virtual systems book trailers school brochures and more To achieve success it is essential to work together to accomplish goals both in and out of the classroom Project Based Activities promotes teamwork while challenging students to create unforgettable story characters utilize informational text write argumentative essays cite sources use explanatory writing write book reviews Mark Twain Media Publishing Company provides engaging supplemental books and eye catching decorations for middle grade and upper grade classrooms This product line is designed by leading educators and features a variety of subjects including history fine arts science language arts social studies government math and positive behavior How to Write a Research Report, Grades 6-8 Mari Lu Robbins,1999-10 Students will learn what a research report is and receive writing prompts to warm up their writing muscles They will investigate reference books and other resources and then choose a topic They will ask important questions Who What When Where Why and How *The I-search Paper* Ken Macrorie,1988 This revised and retitled edition of *Searching Writing* includes two additional I Search papers one by a teacher and a new chapter entitled *The Larger Context* which shows how the I Search concept can work throughout the whole curriculum in school and college As with the first edition *The I Search Paper* is more than just a textbook it s a new form of instructional help a context book that shows students what authority is in matters of learning and invites them to join the author and teacher in the educational movement called *Writing to Learn* To put this book in the hands of all the students in the course is not only to help them carry out an I Search but to introduce them in a delightful way to the resources and tools of intellectual inquiry but one that never forgets the emotional or physical side of human activity This is a rare textbook that treats students as partners in learning It shows what it is to take charge of one s own learning and suggests that this move is one that productive people keep making throughout their lives Mindset Mathematics: Visualizing and Investigating Big Ideas, Grade 6 Jo Boaler,Jen Munson,Cathy Williams,2019-01-09 Engage students in mathematics using growth mindset techniques The most challenging parts of teaching mathematics are engaging students and helping them understand the connections between mathematics concepts In this volume you ll find a collection of low floor high ceiling tasks that will help you do just that by looking at the big ideas at the sixth grade level through visualization play and investigation During their work with tens of thousands of teachers authors Jo Boaler Jen Munson and Cathy Williams heard the same message that they want to incorporate more brain science into their math instruction but they need guidance in the techniques that work best to get across the concepts they

needed to teach So the authors designed Mindset Mathematics around the principle of active student engagement with tasks that reflect the latest brain science on learning Open creative and visual math tasks have been shown to improve student test scores and more importantly change their relationship with mathematics and start believing in their own potential The tasks in Mindset Mathematics reflect the lessons from brain science that There is no such thing as a math person anyone can learn mathematics to high levels Mistakes struggle and challenge are the most important times for brain growth Speed is unimportant in mathematics Mathematics is a visual and beautiful subject and our brains want to think visually about mathematics With engaging questions open ended tasks and four color visuals that will help kids get excited about mathematics Mindset Mathematics is organized around nine big ideas which emphasize the connections within the Common Core State Standards CCSS and can be used with any current curriculum **Research in Education** ,1974 **Summer Bridge Activities®** ,2015-01-15 Workbook Features Ages 11 13 Grades 6 7 160 pages about 8 inches x 10 1 2 inches Reading writing math science social studies and more Includes fun fitness activities Flash cards completion certificate and answer key included Hands On Summer Learning Summer Bridge Activities Workbook helps sixth seventh graders keep their skills sharp during the summer months to prevent summer learning loss through fun practice pages and activities engaging fitness activities and more What s Included This book covers all subjects focusing on writing skills root words factors graphing dictionary skills social studies the scientific method fitness activities and more Flash cards and a completion certificate are included How It Works Each page is numbered by day so kids and parents can track progress and reach monthly learning goals Each activity features clear step by step instructions and practice pages to help sharpen students skills for the school year ahead Just 15 Minutes A Day Two months of learning loss occurs during the summer with the highest losses being in math and spelling This activity book is designed to prevent summer learning loss in just 15 minutes per day through hands on activities Why Summer Bridge Award winning Summer Bridge Activities engage children s creativity and learning potential and keep kids mentally and physically active to prevent summer learning loss and pave the way for a successful new school year ahead *Engaging Students in Disciplinary Literacy, K-6* Cynthia H.
