

Installation and Initial Start-Up

To obtain warranty coverage, please fill out and return the warranty registration card now.

Inspection

Inspect the UPS upon receipt. Notify the carrier and dealer if there is damage. The packaging is recyclable; save it for reuse or dispose of it properly.

Placement

Install the UPS in a protected area that is free of excessive dust and has adequate air flow. Do not operate the UPS where the temperature and humidity is outside the specified limits.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the warranty.

Connect to Utility

Operating Instructions

Switch On — Switch Off

With the UPS plugged in, press and release the on/off test button to supply power to the loads.

The loads are immediately powered while the UPS performs a self-test. Press and release the button again to turn off power to the loads. It may be convenient to use the UPS as a master on/off switch for the protected equipment.

The on-line LED illuminates when the UPS is supplying utility power to the loads.

Self-test

The UPS performs a self-test automatically when turned on. Read every two weeks (frequency for default). Automatic self-test warns maintenance requirements by eliminating the need for periodic manual self-tests.

During the self-test, the UPS briefly operates the loads on-battery. If the UPS passes the self-test, it returns to on-line operation.

If the UPS fails the self-test it immediately returns to on-line operation and lights the replace battery LED.

The loads are not affected by a failed test. Recharge the battery overnight and perform the self-test again. If the replace battery LED is still on, replace the battery using the **Replacing the Battery** procedure.

Storage

Storage Conditions

Store the UPS covered and upright in a cool, dry location, with its battery fully charged. Before storing, charge the UPS for at least 4 hours. Disconnect any cables connected to the computer interface port to avoid unnecessarily draining the battery.

Extended storage

A1 -15 to +35 °C (+5 to +95 °F), charge the UPS's battery every 6 months.
A4 +30 to +45 °C (+85 to +113 °F), charge the UPS's battery every 3 months.

Check the Site Wiring Fault Indicator

Caution: If the site wiring fault indicator lights, get a qualified electrician to correct the building wiring.

Connect the Loads

Plug the loads into the output connections on the rear of the UPS. To use the UPS as a master on/off switch, make sure that all of the loads are switched on.

Caution: Do not connect a laser printer to the UPS.

Connect Telephone/Network Surge Suppression (Optional)

Connect a single line telephone or a modems-to-10Base-Tx network cable into the RJ-45/RJ-11 telephone/network surge protector IN jack on the back of the UPS. Connect from the OUT jack with telephone cable (supplied) or network cabling (not supplied) to a fax modem or network port.

Connect Computer Interface Port (Optional)

PowerChute® plus power management software is included with this UPS. Connect the supplied interface cable to the 9-pin computer interface port on the back panel of the UPS. Connect to the computer. See software documentation for installation instructions.

Charge the Battery

The UPS charges its battery whenever it is connected to utility power. The battery will charge fully during the first 4 hours of normal operation. Do not expect full runtime during this initial charge period.

Replace Battery

If the battery fails a self-test, the UPS emits short beeps for one minute and the replace battery LED illuminates.

The UPS repeats the alarm every five hours. Perform the self-test procedure to confirm replace battery conditions. The alarm stops when the battery passes the self-test.

Shutdown Mode

If there is no power, the host connected to the computer interface port can command the UPS to shut down. This is normally done to preserve battery capacity after a controlled shutdown of the protected system. In shutdown mode the UPS stops supplying power to the load. The online and overload LED indicators flash alternately or, if the UPS has shutdown due to a low battery, the UPS will beep once every 4 seconds for approximately 18 seconds. When line power is restored, the UPS will return to on-line operation.

Cold Start

Major: Cold start is not a normal operating condition.

When the UPS is off and there is no utility power, it is possible to cold start the UPS to power the loads from the UPS's battery.

Press and hold the on/off test button until the UPS begins beeping.
Release the on/off test button during the beeping to start the UPS.
