REA's All Access test prep is a must-have for students taking the AP® U.S. History exam! Each of the three parts of this report provides a somewhat different perspective on U.S. students' knowledge and understanding of U.S. history. Part 1 summarizes the assessment performance of approximately 16,000 fourth-, eighth-, and twelfth-grade students based on the National Assessment of Educational Progress U.S. history proficiency scale. Chapter 1 uses this measure to summarize the levels of proficiency displayed by students in the 1988 assessment, offering an overview and examples of their knowledge and understanding. Chapter 2 compares U.S. history proficiency across the grades and across subpopulations defined by race/ethnicity, gender, region, and other characteristics. Part 2 of the report takes a closer look at the assessment results. The chapters in this section provide information not only on the results of the assessment of students in grades 4,8, and 12, but also on trends in the performance of approximately 2,300 eleventh-grade students, based on a special study conducted in 1986 and 1988. Chapter 3 explores students' knowledge of historical periods, chronology, documents, and persons, while chapter 4 summarizes their familiarity with the historical contexts of political and economic life as well as of cultural, social, and family life. Part 3 describes the amount and nature of social studies and U.S. history instruction reported by students who participated in the 1988 assessment and in the special trend assessment. Chapter 5 summarizes the extent of students' instruction in these subjects, and chapter 6 reports on various aspects of this instruction--particularly the topics studied and the prevalence of various instructional activities. Many tables of statistical data are included. The framework recognizes that U.S. history includes powerful ideas, common and diverse traditions, economic developments, technological and scientific innovations, philosophical debates, religious movements, and the interconnection of all these forces. The teaching of history should introduce students to the process of historical inquiry. This process requires critical examination of evidence, thoughtful consideration of conflicting claims, and careful weighing of facts and hypotheses. Historical inquiry provides experience in the kind of reasoned and informed decisionmaking that should characterize each citizen's participation in their American democracy. The framework organizes U.S. history into four central themes. Each theme is described briefly and more fully in chapter two of the framework. This document contains the following chapters: (1) U.S. History in Elementary, Middle, and High Schools; (2) The Framework for the 2010 NAEP U.S. History Assessment; and (3) Desired Attributes of the Assessment and Its Exercises and Items. Appendices include: (1) NAEP U.S. History Framework--Staff, Committee Members, and Subcontractors; and (2) Released Items From the NAEP U.S. History Assessment. (Contains 5 tables.) The assessment of young children's development and learning has recently taken on new importance. Private and government organizations are developing programs to enhance the school readiness of all young children, especially children from economically disadvantaged homes and communities and children with special needs. Well-planned and effective assessment can inform teaching and program improvement, and contribute to better outcomes for children. This book affirms that assessments can make crucial contributions to the improvement of children's well-being, but only if they are well designed, implemented effectively, developed in the context of systematic planning, and are interpreted and used appropriately. Otherwise, assessment of children and programs can have negative consequences for both. The value of assessments therefore requires fundamental attention to their purpose and the design of the larger systems in which they are used. Early Childhood Assessment addresses these issues by identifying the important outcomes for children from birth to age 5 and the quality and purposes of different techniques and instruments for developmental assessments. Whether he is comparing how students and historians interpret documentary evidence or analyzing children's drawings, Wineburg's essays offer rough maps of how ordinary people think about the past and use it to understand the present. These essays acknowledge the role of collective memory in filtering what we learn in school and shaping our historical thinking. Measuring History complements the cases presented in Wise Social Studies Practices (Yeager & Davis, 2005). Yeager and Davis highlight the rich and ambitious teaching that can occur in the broad context of state-level testing. In this book, the chapter authors and I bring the particular state history tests more to the fore and examine how teachers are responding to them. At the heart of Measuring History are cases of classroom teachers in seven states (Florida, Kentucky, Michigan, New York, Texas, Mississippi, and Virginia) where new social studies standards and new, and generally high-stakes, state-level history tests are prominent. In these chapters, the authors describe and analyze the state's testing efforts and how those efforts are being interpreted in the context of classroom practice. The results both support and challenge prevailing views on the efficacy of testing as a vehicle for educational reform. Catherine Horn (University of Houston) and I lay the groundwork for the case studies through a set of introductory chapters that examine the current environment, the research literature, and the technical qualities of history tests. The 71 tests in this assessment package have been designed around the primary goal of A History of US: understanding information, not memorizing. Each test checks understanding of chapter content, which is coordinated with the teaching guides for each volume of the A History of US set. A portion of the questions assess knowledge of key facts and chronology. The rest of the questions require students to use critical thinking skills such as making comparisons, synthesizing information, and drawing conclusions. Social History Assessment is the first resource to offer practical guidance about interpreting the social history. Author Arlene Bowers Andrews provides rich resources to assist helping professionals as they gather and-most importantly-interpret information about social relationships in the lives of individuals. Key Features: Focuses on interpreting and making meaning of the social history: Humans are complex creatures. Their biology, psychology, and social relations affect their thoughts, emotions, behaviors, and sensations. This book particularly addresses the personal social history, that is, the interpersonal relationships that have influenced the development of the person during the life course. Offers comprehensive guidance on composing a social history: In addition to numerous case examples and a variety of helpful tools such as genograms and ecomaps, the chapters cover ethical issues, core theories of human behavior in the social environment, tips for comprehensively gathering information about and describing the social history, and guidance regarding interpreting the history. Reaches a multidisciplinary audience: Whether the professional comes from social work, psychology, counseling, psychiatry, nursing, or another health or human service discipline, exploring the client's origins helps build rapport and lays the foundation for mutual client-professional assessment. This book offers a common understanding across disciplines of what constitutes an informative social history, with theoretically grounded interpretation, to benefit multidisciplinary teamwork and the client. Intended Audience: This is an ideal supplemental text for a variety of advanced undergraduate and graduate courses in Social Work Practice, Direct Practice, Interviewing, Human Behavior in the Social Environment,

Author Bruce VanSledright argues that traditional and typical standardized testing approaches are seldom up to the task of measuring the more complex understandings students are asked to attain, as they cannot fully assess what the student knows. Rather, he points forward along a path toward changes in learning, teaching, and assessing that closely aligns with the Common Core State Standards. He delves into the types of history knowledge the standards require, illustrates how they can be applied in-use in history learning contexts, and theorizes how the standards might fit together cognitively to produce deep historical understandings among students in teaching-learning contexts. By providing a variety of assessment strategies and items that align with the standards, and identifying rich, useful assessment rubrics applicable to the different types of assessments, he offers an important resource for social studies teachers and curriculum writers alike. Contains twenty document-based essay questions covering a variety of issues in U.S. History designed for the middle school classroom. A world history textbook chronicling the rise of Western and Eastern civilizations. Includes photos, art, illustrated charts, vocabulary exercises, and review questions. New technologies have radically transformed our relationship to information in general and to little bits of information in particular. The assessment of history learning, which for a century has valued those little bits as the centerpiece of its practice, now faces not only an unprecedented glut but a disconnect with what is valued in history education. More complex processes—historical thinking, historical consciousness or historical sense making—demand more complex assessments. At the same time, advances in scholarship on assessment open up new possibilities. For this volume, Kadriye Ercikan and Peter Seixas have assembled an international array of experts who have, collectively, moved the fields of history education and assessment forward. Their various approaches negotiate the sometimes-conflicting demands of theoretical sophistication, empirically demonstrated validity and practical efficiency. Key issues include articulating the cognitive goals of history education, the relationship between content and procedural knowledge, the impact of students' language literacy on history assessments, and methods of validation in both large scale and classroom assessments. New Directions in Assessing Historical Thinking is a critical, research-oriented resource that will advance the conceptualization, design and validation of the next generation of history assessments. Every few years in the United States, history teachers go through what some believe is an embarrassing national ritual. A representative group of students sit down to take a standardized U.S. history test, and the results show varied success. Sizable percentages of students score at or below a "basic" understanding of the country's history. Pundits seize on these results to argue that not only are students woefully ignorant about history, but history teachers are simply not doing an adequate job teaching historical facts. The overly common practice of teaching history as a series of dates, memorizing the textbook, and taking notes on teachers' lectures ensues. In stark contrast, social studies educators like Bruce A. VanSledright argue instead for a more inquiry-oriented approach to history teaching and learning that fosters a sense of citizenship through the critical skills of historical investigation. Detailed case studies of exemplar teachers are included in this timely book to make visible, in an easily comprehensible way, the thought processes of skilled teachers. Each case is then unpacked further to clearly address the question of what history teachers need to know to teach in an investigative way. The Challenge of Rethinking History Education is a must read for anyone looking for a guide to both the theory and practice of what it means to teach historical thinking, to engage in investigative practice with students, and to increase students' capacity to critically read and assess the nature of the complex culture in which they live.
