

Engineering Formula Sheet

Statistics

Mean

$$\mu = \frac{\sum x_i}{n}$$

μ = mean value
 $\sum x_i$ = sum of all data values (x_1, x_2, x_3, \dots)
 n = number of data values

Standard Deviation

$$\sigma = \sqrt{\frac{\sum (x_i - \mu)^2}{n}}$$

σ = standard deviation
 x_i = individual data value (x_1, x_2, x_3, \dots)
 μ = mean value
 n = number of data values

Probability

Frequency

$$f_x = \frac{n_x}{n}$$

$$P_x = \frac{f_x}{f_s}$$

f_x = relative frequency of outcome x
 n_x = number of events with outcome x
 n = total number of events
 P_x = probability of outcome x
 f_s = frequency of all events

Binomial Probability (order doesn't matter)

$$P_k = \frac{n!(p^k)(q^{n-k})}{k!(n-k)!}$$

P_k = binomial probability of k successes in n trials
 p = probability of a success
 $q = 1 - p$ = probability of failure
 k = number of successes
 n = number of trials

Mode

Place data in ascending order.
 Mode = most frequently occurring value

If two values occur at the maximum frequency the data set is *bimodal*.
 If three or more values occur at the maximum frequency the data set is *multi-modal*.

Median

Place data in ascending order.
 If n is odd, median = central value
 If n is even, median = mean of two central values

n = number of data values

Range

$$\text{Range} = x_{\text{max}} - x_{\text{min}}$$

x_{max} = maximum data value
 x_{min} = minimum data value

Independent Events

$$P(A \text{ and } B \text{ and } C) = P_A P_B P_C$$

$P(A \text{ and } B \text{ and } C)$ = probability of independent events A and B and C occurring in sequence
 P_A = probability of event A

Mutually Exclusive Events

$$P(A \text{ or } B) = P_A + P_B$$

$P(A \text{ or } B)$ = probability of either mutually exclusive event A or B occurring in a trial
 P_A = probability of event A
 $\sum x_i$ = sum of all data values (x_1, x_2, x_3, \dots)
 n = number of data values

Conditional Probability

$$P(A|D) = \frac{P(A) \cdot P(D|A)}{P(A) \cdot P(D|A) + P(\sim A) \cdot P(D|\sim A)}$$

$P(A|D)$ = probability of event A given event D
 $P(A)$ = probability of event A occurring
 $P(\sim A)$ = probability of event A not occurring
 $P(D|\sim A)$ = probability of event D given event A did not occur

Project Lead The Way Principles Of Engineering Formula Sheet

Principles of Engineering Brett Handley, Craig Coon, David M. Marshall, 2012 PRINCIPLES OF ENGINEERING International Edition will help readers better understand the engineering concepts mathematics and scientific principles that form the foundation of the Project Lead the Way PLTW Principles Of Engineering course Important concepts and processes are explained throughout using full color photographs and illustrations Appropriate for high school students the mathematics covered includes algebra and trigonometry Strong pedagogical features to aid comprehension include Case Studies boxed articles such as Fun Facts and Points of Interest Your Turn activities suggestions for Off Road Exploration connections to STEM concepts Career Profiles Design Briefs and example pages from Engineers Notebooks Each chapter concludes with questions designed to test the reader s knowledge of information presented in the chapter along with a hands on challenge or exercise that compliments the content and lends itself to exploration Key vocabulary terms are highlighted throughout the book and emphasized in margin definitions Engineering Formulas Kurt Gieck, 1971 *Principles of Engineering* Brett A. Handley, 2012

Chemical Engineering Design Gavin Towler, Ray Sinnott, 2012-01-25 Chemical Engineering Design Second Edition deals with the application of chemical engineering principles to the design of chemical processes and equipment Revised throughout this edition has been specifically developed for the U S market It provides the latest US codes and standards including API ASME and ISA design codes and ANSI standards It contains new discussions of conceptual plant design flowsheet development and revamp design extended coverage of capital cost estimation process costing and economics and new chapters on equipment selection reactor design and solids handling processes A rigorous pedagogy assists learning with detailed worked examples end of chapter exercises plus supporting data and Excel spreadsheet calculations plus over 150 Patent References for downloading from the companion website Extensive instructor resources including 1170 lecture slides and a fully worked solutions manual are available to adopting instructors This text is designed for chemical and biochemical engineering students senior undergraduate year plus appropriate for capstone design courses where taken plus graduates and lecturers tutors and professionals in industry chemical process biochemical pharmaceutical petrochemical sectors New to this edition Revised organization into Part I Process Design and Part II Plant Design The broad themes of Part I are flowsheet development economic analysis safety and environmental impact and optimization Part II contains chapters on equipment design and selection that can be used as supplements to a lecture course or as essential references for students or practicing engineers working on design projects New discussion of conceptual plant design flowsheet development and revamp design Significantly increased coverage of capital cost estimation process costing and economics New chapters on equipment selection reactor design and solids handling processes New sections on fermentation adsorption membrane separations ion exchange and chromatography Increased coverage of batch processing food

pharmaceutical and biological processes All equipment chapters in Part II revised and updated with current information Updated throughout for latest US codes and standards including API ASME and ISA design codes and ANSI standards Additional worked examples and homework problems The most complete and up to date coverage of equipment selection 108 realistic commercial design projects from diverse industries A rigorous pedagogy assists learning with detailed worked examples end of chapter exercises plus supporting data and Excel spreadsheet calculations plus over 150 Patent References for downloading from the companion website Extensive instructor resources 1170 lecture slides plus fully worked solutions manual available to adopting instructors

Totem Kevin Mays,2015-08-25 If you need extraordinary results from your team you need this book In Totem Dr Kevin Mays unlocks the power of human dynamics laying out a step by step process for creating exceptional teams By bringing to light the underlying forces that define a team s culture the ground breaking Totem model provides the framework to enable your team to solve problems communicate and execute in world class style A story brings the Totem to life Join Frank Zepher as he escapes his corporate stress leaving his executive team to navigate the waters of change in his absence Venturing west Frank reunites with his old college buddies to embark on an epic white water journey of discovery After a near death experience destroys their raft the team is forced to reevaluate its approach to attacking the river In the process they discover the timeless system that assures optimal performance on their team the Totem During the day the team uses the Totem model to survive the river while at night they discuss how the model applies to their teams back at work The story is filled with real world examples from teams across industries seeking to improve This page turner of a story concludes with a detailed outline of the Totem process complete with an assessment for your own team so that you can easily apply the Totem principles and open the door to unprecedented results

The Nature of Expertise Michelene T.H. Chi,Robert Glaser,Marshall J. Farr,2014-01-02 Due largely to developments made in artificial intelligence and cognitive psychology during the past two decades expertise has become an important subject for scholarly investigations The Nature of Expertise displays the variety of domains and human activities to which the study of expertise has been applied and reflects growing attention on learning and the acquisition of expertise Applying approaches influenced by such disciplines as cognitive psychology artificial intelligence and cognitive science the contributors discuss those conditions that enhance and those that limit the development of high levels of cognitive skill

Teaching Engineering, Second Edition Phillip C. Wankat, Frank S. Oreovicz,2015-01-15 The majority of professors have never had a formal course in education and the most common method for learning how to teach is on the job training This represents a challenge for disciplines with ever more complex subject matter and a lost opportunity when new active learning approaches to education are yielding dramatic improvements in student learning and retention This book aims to cover all aspects of teaching engineering and other technical subjects It presents both practical matters and educational theories in a format useful for both new and experienced teachers It is organized to start with specific practical teaching applications and then leads to psychological and

educational theories The practical orientation section explains how to develop objectives and then use them to enhance student learning and the theoretical orientation section discusses the theoretical basis for learning teaching and its impact on students Written mainly for PhD students and professors in all areas of engineering the book may be used as a text for graduate level classes and professional workshops or by professionals who wish to read it on their own Although the focus is engineering education most of this book will be useful to teachers in other disciplines Teaching is a complex human activity so it is impossible to develop a formula that guarantees it will be excellent However the methods in this book will help all professors become good teachers while spending less time preparing for the classroom This is a new edition of the well received volume published by McGraw Hill in 1993 It includes an entirely revised section on the Accreditation Board for Engineering and Technology ABET and new sections on the characteristics of great teachers different active learning methods the application of technology in the classroom from clickers to intelligent tutorial systems and how people learn

Engineering Fundamentals: An Introduction to Engineering, SI Edition Saeed Moaveni, 2011-01-01 Specifically designed as an introduction to the exciting world of engineering ENGINEERING FUNDAMENTALS AN INTRODUCTION TO ENGINEERING encourages students to become engineers and prepares them with a solid foundation in the fundamental principles and physical laws The book begins with a discovery of what engineers do as well as an inside look into the various areas of specialization An explanation on good study habits and what it takes to succeed is included as well as an introduction to design and problem solving communication and ethics Once this foundation is established the book moves on to the basic physical concepts and laws that students will encounter regularly The framework of this text teaches students that engineers apply physical and chemical laws and principles as well as mathematics to design test and supervise the production of millions of parts products and services that people use every day By gaining problem solving skills and an understanding of fundamental principles students are on their way to becoming analytical detail oriented and creative engineers Important Notice Media content referenced within the product description or the product text may not be available in the ebook version *Engineering World*, 1921 [The Railway Engineer](#), 1917 **Social Science Research** Anol Bhattacharjee, 2012-04-01 This book is designed to introduce doctoral and graduate students to the process of conducting scientific research in the social sciences business education public health and related disciplines It is a one stop comprehensive and compact source for foundational concepts in behavioral research and can serve as a stand alone text or as a supplement to research readings in any doctoral seminar or research methods class This book is currently used as a research text at universities on six continents and will shortly be available in nine different languages **The Railway Engineer** Lawrence Saunders, S. R. Blundstone, 1917 [Improving Adult Literacy Instruction](#) National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Learning Sciences: Foundations and Applications to Adolescent and Adult Literacy, 2012-04-26 A high level of literacy in both print and digital media is required

for negotiating most aspects of 21st century life including supporting a family education health civic participation and competitiveness in the global economy Yet more than 90 million U S adults lack adequate literacy Furthermore only 38 percent of U S 12th graders are at or above proficient in reading Improving Adult Literacy Instruction synthesizes the research on literacy and learning to improve literacy instruction in the United States and to recommend a more systemic approach to research practice and policy The book focuses on individuals ages 16 and older who are not in K 12 education It identifies factors that affect literacy development in adolescence and adulthood in general and examines their implications for strengthening literacy instruction for this population It also discusses technologies for learning that can assist with multiple aspects of teaching assessment and accommodations for learning There is inadequate knowledge about effective instructional practices and a need for better assessment and ongoing monitoring of adult students proficiencies weaknesses instructional environments and progress which might guide instructional planning Improving Adult Literacy Instruction recommends a program of research and innovation to validate identify the boundaries of and extend current knowledge to improve instruction for adults and adolescents outside school The book is a valuable resource for curriculum developers federal agencies such as the Department of Education administrators educators and funding agencies
