Terry was the smallest - and worst - basketball player on the court. But that didn't stop him. With Doug's help, Terry practiced and practiced until he earned a spot on the team. As they grew up, the best friends supported each other, challenged each other, helped each other become better athletes and better people. Doug was by

Terry's side every step of the way: when Terry received a diagnosis of cancer in his leg, when he was learning to walk - then run - with a prosthetic leg and while he was training for the race of his life, his Marathon of Hope. Written from Doug's perspective, this story shows that Terry Fox's legacy goes beyond the physical and individual accomplishments of a disabled athlete and honors the true value of friendship. It's cookie adventure time! The official Discworld Coloring Book, featuring artwork by acclaimed Discworld artist Paul Kidby! Paul Kidby, Sir Terry Pratchett's artist of choice, designed the UK covers for the Discworld novels since 2002 and is the author of the definitive portfolio volume *The Art of Discworld*. Containing black-and-white line drawings based on his hugely popular artwork with original pieces created exclusively for this book, Terry Pratchett's Discworld Coloring Book features iconic Discworld personalities including Granny Weatherwax, Sam Vimes, Archchancellor Ridcully, Rincewind, Tiffany Aching, and, of course, Death. This is the coloring book that all Discworld fans need! The doctoral thesis argues that the term Subcreation with its revised and broadened definition, in part differing from J.R.R. Tolkien's original term sub-creation, may be used for the discussion of the making of fictional worlds in literary discourse. The successful conception of a

fictional world depends on the reader's willing suspension of disbelief. This depends both on the author and his skilled composition of the world and all its aspects, as well as on the reader's acceptance of this invented fictional world. The author needs to create a narrative with an inner consistency, which is crucial to achieving the effect of the reader's immersion in the fictional world. The fundamental aspects that an author needs to realize to achieve successful Subcreation have been structured into and analysed in four categories: Language and Linguistic Variation, Physiopoeia, Anthropoeia and Mythopoeia. Furthermore, this thesis shows that, as contemporary examples of fantastic literature, both Tad Williams's and Terry Pratchett's fictional worlds are successfully created through the realization of these aspects of Subcreation. Apart from commenting on the success of the subcreative process, this thesis also remarks upon the cultural influences both authors include in their writings. While both may be considered Anglophone in a general categorization, Pratchett's Discworld retains a feeling of 'Britishness' that is not to be found in Williams's Otherland. The thesis proposes several approaches to Subcreation that may be studied subsequently. So, for example, it may be possible to determine the success of an author's Subcreation by collecting empirical data. Apart from literary works this field of studies may also include other media. "McGovern's story is riveting as he investigates his daughter's life, reads her anguished and accusatory diaries, interviews her friends and doctors, sifts through the sordid police and medical records... a family drama of love and loss."—New York Times Rarely has a public figure addressed such difficult, intimate issues with such courage and bravery. In a moving, passionate memoir, former Senator George McGovern recalls the events leading up to his daughter Terry's death as a result of alcoholism. What McGovern learned from Terry is an unforgettable, poignant tale certain to

engender controversy and compassion. Ellen Terry's correspondence was both exuberant and extensive. Her remaining letters provide a fascinating insight into the dynamics of the Victorian theatre, and the difficulties of life for a woman maintaining a successful public persona whilst raising two illegitimate children. The early years of television relied in part on successful narratives of another medium, as studios adapted radio programs like Boston Blackie and Defense Attorney to the small screen. Many shows were adapted more than once, like the radio program Blondie, which inspired six television adaptations and 28 theatrical films. These are but a few of the 1,164 programs covered in this volume. Each program entry contains a detailed story line, years of broadcast, performer and character casts and principal production credits where possible. Two appendices ("Almost a Transition" and "Television to Radio") and a performer's index conclude the book. This first-of-its-kind encyclopedia covers many little-known programs that have rarely been discussed in print (e.g., Real George, based on Me and Janie; Volume One, based on Quiet, Please; and Galaxy, based on X Minus One). Covered programs include The Great Gildersleeve, Howdy Doody, My Friend Irma, My Little Margie, Space Patrol and Vic and Sade. The purpose of this volume is to provide an overview of Terry Speed's contributions to statistics and beyond. Each of the fifteen chapters concerns a particular area of research and consists of a commentary by a subject-matter expert and selection of representative papers. The chapters, organized more or less chronologically in terms of Terry's career, encompass a wide variety of mathematical and statistical domains, along with their application to biology and medicine. Accordingly, earlier chapters tend to be more theoretical, covering some algebra and probability theory, while later chapters concern more recent work in genetics and genomics. The chapters also span continents and

generations, as they present research done over four decades, while crisscrossing the globe. The commentaries provide insight into Terry's contributions to a particular area of research, by summarizing his work and describing its historical and scientific context, motivation, and impact. In addition to shedding light on Terry's scientific achievements, the commentaries reveal endearing aspects of his personality, such as his intellectual curiosity, energy, humor, and generosity.
