Therapeutic Communication Jurgen Ruesch,1961 This volume deals with universal processes of therapeutic communication a term which covers whatever exchange goes on between people who have a therapeutic intent with an emphasis upon the empirical observation of the communicative process Preface

The Nature Fix: Why Nature Makes Us Happier, Healthier, and More Creative Florence Williams,2017-02-07 Highly informative and remarkably entertaining Elle From forest trails in Korea to islands in Finland to eucalyptus groves in California Florence Williams investigates the science behind nature s positive effects on the brain Delving into brand new research she uncovers the powers of the natural world to improve health promote reflection and innovation and strengthen our relationships As our modern lives shift dramatically indoors these ideas and the answers they yield are more urgent than ever

The Paradox of Choice Barry Schwartz,2009-10-13 Whether we re buying a pair of jeans ordering a cup of coffee selecting a long distance carrier applying to college choosing a doctor or setting up a 401 k everyday decisions both big and small have become increasingly complex due to the overwhelming abundance of choice with which we are presented As Americans we assume that more choice means better options and greater satisfaction But beware of excessive choice choice overload can make you question the decisions you make before you even make them it can set you up for unrealistically high expectations and it can make you blame yourself for any and all failures In the long run this can lead to decision making paralysis anxiety and perpetual stress And in a culture that tells us that there is no excuse for falling short of perfection when your options are limitless too much choice can lead to clinical depression In *The Paradox of Choice* Barry Schwartz explains at what point choice the hallmark of individual freedom and self determination that we so cherish becomes detrimental to our psychological and emotional well being In accessible engaging and anecdotal prose Schwartz shows how the dramatic

explosion in choice from the mundane to the profound challenges of balancing career family and individual needs has paradoxically become a problem instead of a solution Schwartz also shows how our obsession with choice encourages us to seek that which makes us feel worse By synthesizing current research in the social sciences Schwartz makes the counter intuitive case that eliminating choices can greatly reduce the stress anxiety and busyness of our lives He offers eleven practical steps on how to limit choices to a manageable number have the discipline to focus on those that are important and ignore the rest and ultimately derive greater satisfaction from the choices you have to make
