Case Studies Scott Stout, Zhendi Wang, 2017-10-22 *Oil Spill Environmental Forensics Case Studies* includes 34 chapters that serve to present various aspects of environmental forensics in relation to real world oil spill case studies from around the globe. Authors representing academic, government, and private researcher groups from 14 countries bring a diverse and global perspective to this volume. *Oil Spill Environmental Forensics Case Studies* addresses releases of natural gas, methane, automotive gasoline, and other petroleum fuels, lubricants, vegetable oils, paraffin waxes, bitumen, manufactured gas plant residues, urban runoff, and of course crude oil, the latter ranging from light Bakken shale oil to heavy Canadian oil sands oil. New challenges surrounding forensic investigations of stray gas in the shallow subsurface, volatiles in air, dissolved chemicals in water, including passive samplers and biological tissues associated with oil spills, are included, as are the effects and long term oil weathering, long term monitoring in urbanized and non urbanized environments, fate and transport, forensic historical research, new analytical and chemical data processing and interpretation methods. Presents cases in each chapter on the application of specific oil spill environmental forensic techniques. Features chapters written by international experts from both academia and industry. Includes relevant concepts and theories elucidated for each theme.

Tobakkonacht -- The Antismoking Endgame Michael J. McFadden, 2013-10-01 *TobakkoNacht: The Antismoking Endgame* is a frontal attack on the misuse of science and language to promote unjustified levels of smoking bans and taxes. The author, trained in statistics and propaganda analysis at Pennsylvania's Wharton School, dissects the scary antismoking studies that have made headlines over the past ten years. He shows clearly in each case how the data and language have been juggled to reach and promote the conclusions of those handing out the grant money, and backs up his arguments with solid science, clearly explained at a level that will satisfy both laymen and professionals. The book isn't all business, though. It opens with a dystopian future tale of an Endgame in which the antismoking movement has gained full power and smokers are generally treated as near criminals. The author explores the roots that could bring such a fiction into being and looks at the world that could be created, a very sad world indeed. The pseudo science used to push goals like outdoor smoking bans is also attacked with satire and with short essays taking the form of Letters To The Editor, focusing on all the microarguments used by antismoking crusaders, playing with their scientific instruments, and by fanatics who'd happily apply the same methodology to reducing automobile and alcohol use. A few more formal communications showing how to approach local and national governmental bodies are also offered, again with the benefit of exposing false arguments while showing how to effectively attack the authoritative sources that seek to silence the opposition with their prestige while pushing for ever wider bans and ever higher taxes. The book concludes with a strong section painting a path toward a winning endgame for those in the Free Choice movement, pointing to the weaknesses of the current crop of smoking prohibitionists and suggesting how they can best be countered.

TobakkoNacht can best be summed up like this: It shows how the denormalization of smokers has warped science and ripped holes in our social fabric while transforming a worthy public health effort into a destructive social force assaulting our lives.

our families and our communities and it shows how to fight back
David L. Parkhurst, Donald C. Thorstenson, L. Niel Plummer, 1990
McFadden, 2004-05 The true horror of 1984 is not what was done to Winston Smith The true horror was that the vast majority of the populace was happy content and believed that what their government was doing was right That quote introduces what Britain's Numberwatch has called the most astonishing political saga since the rise of Adolph Hitler
Dissecting Antismokers' Brains examines the psychology and motivations that drive antismoking advocates while also analyzing their general abuse of language and science The combination offers readers a solid foundation for understanding modern efforts to ban tax and harass smokers into nonexistence Published in 2004 Brains remains ahead of its time with a startling freshness in its ideas and theories The propaganda methods exposed here in their early development have grown and are being used even more intensively in the ads press releases and guidebooks of antismoking advocacy groups today The modern stonewalling techniques examined in the author's follow up volume *TobakkoNacht: The Antismoking Endgame* are shown in their birthing forms in his early communications with advocates and the callous abuse of our love for children continues to be exploited as ads show evil wisps of smoke seeking out open windows to attack babies in their nurseries
McFadden's warnings of future campaigns to deny jobs and medical care to smokers to extend smoking bans to apartments and outdoor spaces and to apply similar conditioning nudging techniques to the control of alcohol and fast foods have proven far too true For those seeking an in depth but comfortably readable examination of the foundations of the antismoking movement this book is essential Its focus on the combination of psychology propaganda analysis and the misuse of science makes it a solid volume for college courses in the areas of social change scientific ethics political manipulation and the use and limits of governmental control over citizen behavior At the same time its meticulous deconstruction of the basic scientific and statistical arguments fueling government imposed smoking bans makes it accessible to anyone who's ever wondered how smoking has moved to being regularly presented as both an antisocial and even immoral character trait **Dissecting Antismokers' Brains** remains an indispensable volume for anyone disturbed by wishing to understand or wanting to fight the growth of governmental control over personal life choices and behaviors
