Quantum Mechanics May 02 2023 Quantum Mechanics: Concepts and Applications provides a clear, balanced and modern introduction to the subject. Written with the student's background and ability in mind the book takes an innovative approach to quantum mechanics by combining the essential elements of the theory with the practical applications: it is therefore both a textbook and a problem solving book in one self-contained volume. Carefully structured, the book starts with the experimental basis of quantum mechanics and then discusses its mathematical tools. Subsequent chapters cover the formal foundations of the subject, the exact solutions of the Schrödinger equation for one and

three dimensional potentials, time-independent and time-dependent approximation methods, and finally, the theory of scattering. The text is richly illustrated throughout with many worked examples and numerous problems with step-by-step solutions designed to help the reader master the machinery of quantum mechanics. The new edition has been completely updated and a solutions manual is available on request. Suitable for senior undergradutate courses and graduate courses.

Things Fall Apart May 10 2021 "A true classic of world literature . . . A masterpiece that has inspired generations of writers in Nigeria, across Africa, and around the world." —Barack Obama "African literature is incomplete and unthinkable without the works of Chinua Achebe." —Toni Morrison Nominated as one of America's best-loved novels by PBS's The Great American Read Things Fall Apart is the first of three novels in Chinua Achebe's critically acclaimed African Trilogy. It is a classic narrative about Africa's cataclysmic encounter with Europe as it establishes a colonial presence on the continent. Told through the fictional experiences of Okonkwo, a wealthy and fearless Igbo warrior of Umuofia in the late 1800s, Things Fall Apart explores one man's futile resistance to the devaluing of his Igbo traditions by British political andreligious forces and his despair as his community capitulates to the powerful new order. With more than 20 million copies sold and translated into fifty-seven languages, Things Fall Apart provides one of the most illuminating and permanent monuments to African experience. Achebe does not only capture life in a pre-colonial African village, he conveys the tragedy of the loss of that world while broadening our understanding of our contemporary realities.

 Next Door Savior May 14 2024 We applaud men for doing good things. We enshrine God for doing great things. But what about a man who does God things? One thing is certain. We can't ignore him. If these moments are factual, if the claim of Christ is actual, then he was, at once, man and

God. The single most significant person who ever lived. Forget MVP. He is the entire league. The head of the parade? Hardly. No one else shares the street. Who comes close? Humanity's best and brightest fade like dime-store rubies next to him. Dismiss him? We can't. Resist him? Equally difficult. Why would we want to? Don't we need a God-man Savior? A just-God Jesus could make us, but not understand us. A just-man Jesus could love us, but never save us. But a God-man Jesus? Near enough to touch. Strong enough to trust. A next door Savior.
