Crammed with information, *The Brontës in Context* shows how the Brontës' fiction interacts with the spirit of the time. [The Interaction of Ocean Waves and Wind](#) Peter Janssen, 2004-10-28. This book was published in 2004. *The Interaction of Ocean Waves and Wind* describes in detail the two-way interaction between wind and ocean waves and shows how ocean waves affect weather forecasting on timescales of 5 to 90 days. Winds generate ocean waves but at the same time airflow is modified due to the loss of energy and momentum to the waves; thus momentum loss from the atmosphere to the ocean depends on the state of the waves. This volume discusses ocean wave evolution according to the energy balance equation. An extensive overview of nonlinear transfer is given and as a by-product the role of four-wave interactions in the generation of extreme events such as freak waves is discussed. Effects on ocean circulation are described. Coupled ocean-wave-atmosphere modelling gives improved weather and wave forecasts. This volume will interest ocean wave modellers, physicists and applied mathematicians and engineers interested in shipping and coastal protection. [Lancashire Folk-Lore](#) John Wilkinson, T.T. Harland, 2018-04-05. Reproduction of the original Lancashire Folk Lore by John Harland T.T. Wilkinson. *Environmental Health in Central and Eastern Europe* K.C. Donnelly, Leslie H. Cizmas, 2006-09-12. This book presents the latest research in quantifying complex mixtures in the environment and analyzing their potential impact on human health. Many of the manuscripts reported in these proceedings represent the most up-to-date measurements of population exposures in Central and Eastern Europe. These studies are of value to health and environmental professionals around the world as they develop strategies for assessing exposures, remediating contaminated environments and improving public health.
