[Java Concurrency in Practice](#) Tim Peierls,Brian Goetz,Joshua Bloch,Joseph Bowbeer,Doug Lea,David Holmes,2006-05-09 Threads are a fundamental part of the Java platform As multicore processors become the norm using concurrency effectively becomes essential for building high performance applications Java SE 5 and 6 are a huge step forward for the development of concurrent applications with improvements to the Java Virtual Machine to support high performance highly scalable concurrent classes and a rich set of new concurrency building blocks In Java Concurrency in Practice the creators of these new facilities explain not only how they work and how to use them but also the motivation and design patterns behind them However developing testing and
