Algebra through practice : a collection of problems in algebra with solutions. 6. Rings, fields and modules T. S. Blyth,Thomas Scott Blyth,1985 Problem solving is an art that is central to understanding and ability in mathematics With this series of books the authors have provided a selection of problems with complete solutions and test papers designed to be used with or instead of standard textbooks on algebra For the convenience of the reader a key explaining how the present books may be used in conjunction with some of the major textbooks is included Each book of problems is divided into chapters that begin with some notes on notation and prerequisites The majority of the material is aimed at the student of average ability but there are some more challenging problems By working through the books the student will gain a deeper understanding of the fundamental concepts involved and practice in the formulation and so solution of other algebraic problems Later books in the series cover material at a more advanced level than the earlier titles although each is within its own limits self contained
