Practical Font Design for Graphic Designers David Bergsland,2011-10-21 This is the Fontographer version of Practical Font Design In it I guide you through the process of designing several fonts while discussing the options and decisions you need to make as you do so It is an effort to let you inside the head of an experienced font designer The goal is to get you up and running with your own designs as quick as possible with a good solid conceptual understanding of the entire process of font design Why do you want to use Fontographer For the fun of it When I received the opportunity to go back to my roots and see what the new Fontographer was like I was a little concerned I had just spent nine years painfully teaching myself to letterspace by hand to write OpenType features and to become accustomed to the tool set of FontLab Don t get me wrong FontLab is a great program and I am grateful for what I have learned There are still a few features of FontLab that as a professional font designer I cannot do without But I was taken by surprise Fontographer brought the fun back It is still the same marvelous program with which I first learned to design fonts The drawing interface is still clean clear and elegant I still works the way I have learned to work over the past two decades of digital graphic design I found pure joy in drawing again Fontographer is a wonderful drawing experience It has been a real joy to experience that fun again After nearly a decade in FontLab font design is fun again To quote from the book Fontographer is an application which appeals to experienced graphics designers with a background in PostScript illustration especially those with FreeHand experience from version 7 and earlier The majority of designers working in the mid 1990s had a copy of Fontographer It came free with the FreeHand Graphics Studio first released in 1995 and everyone probably used it at least a little Fontographer had and still has a unique and intuitive set of drawing tools that enable amateurs of that era to enter the world of font design I m talking amateurs in the sense that John Baskerville considered himself an amateur as I also consider myself though I am certainly not in Baskerville s league For me font design is a beloved sideline with which I indulge myself It s become a treasured tool I use in my current trade book writing designing and production Please help me by emailing me with your comments typos
