The book, A Journey of Life with Divine Blessings, is an autobiography of Prof. Dr. G.K. Roy, a pioneer teacher, professor and engineer in technology education in Odisha. The biography depicts his life and times, along with his memories and takes on important events in Odisha, India and the global technical space spanning a period of over five decades through the second half of the twentieth century. It evaluates the case of China's patent law development over the course of the last three decades by drawing on the most up-to-date Chinese language sources. In the process, the volume focuses on China's patent legislation, its achievements and weaknesses, as well as the intrinsic limitations, especially as far as enforcement is concerned. The author pays close attention to the unique societal background in China, a country that did not provide constitutional recognition to private property rights until 2004 and where a property law entered into force as late as 2013, 30 years after the first promulgation of the patent law. Global trade policy makers, IP professionals and businesses will benefit from the insights presented by the chapters as they will help them to appreciate the achievements and the controversies pursuant to China's efforts in patent protection. While serving as a useful case study for countries seeking to leverage patent protection as a driver for economic development,

the book will equally facilitate Chinese legislature to reflect on its patent legislation development, specifically on legislative policy choices. An additional analytical strength of the volume is that it compares the Chinese patent legislation with the American Invents Act and the European Patent Convention. It discovers the differences between the three patent legislations by using the minimum patent protection standards set down by the TRIPS Agreement as the benchmark. The results of the comparisons suggest that China has successfully harmonised its patent legislation with the global patent protection system, and often opts for higher patent protection standards. The book also considers whether China could learn lessons from Japan and India in their respective patent legislation and policy choices. With China undertaking a fourth patent law amendment, the provisions contained in the second draft of the Patent Law 2015, which was published in December 2015, are included in the analysis.
