The book is informed by the latest research and theories, but Kirshenbaum's engaging voice gives the information a light touch. Topics range from the kind of kissing men like to do (and is distinct from women) to what animals can teach us about the kiss, whether or not the true art of kissing was lost sometime in the Dark Ages. Drawing upon classical history, evolutionary biology, psychology, anthropology, popular culture, and more, Kirshenbaum's winning book will appeal to both romantics and armchair scientists alike.

Actually, it's about learning and growing and adapting and submitting, but the unifying feature is the kiss. Initially, it contained 49 stories—some accounts of the kiss, some where the kiss is an ancillary detail to a bigger story, some comprised of dialog, a poem, a song, some haikus, and even a single piece of fiction. Nicholas posed a challenge to his co-workers during one of their most mundane tasks: remember the names of everyone they had ever kissed in the mouth. His co-workers were stumped, but Nicholas remembered them all. Good, bad, or other, they all meant something, and potential, intimacy, and the potential for intimacy created lasting impressions. An incurable (and hormonal) young romantic, Nicholas wrote the first chapters as a homage to the 50th (and presumably last) woman he had ever kissed: his wife. The original plan was to write only 49 stories because the 50th story was theirs and theirs alone. It was a story that thought had no ending. But the 50th story is included here, and it is the namesake of the collection.
