Innovative Mobile and Internet Services in Ubiquitous Computing Leonard Barolli,Fatos Xhafa,Nadeem Javaid,Tomoya Enokido,2018-06-07 This book presents the latest research findings methods and development techniques related to Ubiquitous and Pervasive Computing UPC as well as challenges and solutions from both theoretical and practical perspectives with an emphasis on innovative mobile and internet services With the proliferation of wireless technologies and electronic devices there is a rapidly growing interest in Ubiquitous and Pervasive Computing UPC UPC makes it possible to create a human oriented computing environment where computer chips are embedded in everyday objects and interact with physical world It also allows users to be online even while moving around providing them with almost permanent access to their preferred services Along with a great potential to revolutionize our lives UPC also poses new research challenges

Augmented Reality and Virtual Reality Timothy Jung,M. Claudia tom Dieck,Philipp A. Rauschnabel,2020-03-24 This book features the latest research in the area of immersive technologies presented at the 5th International Augmented and Virtual Reality Conference held in Munich Germany in 2019 Bridging the gap between academia and industry it presents the state of the art in augmented reality AR and virtual reality VR technologies and their applications in various industries such as marketing education healthcare tourism events fashion entertainment retail and the gaming industry The volume is a collection of research papers by prominent AR and VR scholars from around the globe Covering the most significant topics in the field of augmented and virtual reality and providing the latest findings it is of interest to academics and practitioners alike

**Ambient Communications and Computer Systems** Gregorio Martinez Perez,Shailesh Tiwari,Munesh C. Trivedi,Krishn K. Mishra,2018-03-20 This book includes high quality peer reviewed papers from the International Conference on Recent Advancement in Computer Communication and Computational Sciences RACCCS 2017 held at Aryabhata College of Engineering Research Center Ajmer India on September 2 3 2017 presenting the latest developments and technical solutions in computational sciences Data science data and knowledge engineering require networking and communication as a backbone and have a wide scope of implementation in engineering sciences Keeping this ideology in mind the book offers insights that reflect the advances in these fields from upcoming researchers and leading academicians across the globe Covering a variety of topics such as intelligent hardware

and software design advanced communications intelligent computing technologies advanced software engineering the web and informatics and intelligent image processing it helps those in the computer industry and academia use the advances of next generation communication and computational technology to shape real world applications

**5G Mobile Communications** Saad Asif,2018-07-20 This book will help readers comprehend technical and policy elements of telecommunication particularly in the context of 5G It first presents an overview of the current research and standardization practices and lays down the global frequency spectrum allocation process It further lists solutions to accommodate 5G spectrum requirements The readers will find a considerable amount of information on 4G LTE Advanced LTE Advance Pro 5G NR New Radio transport network technologies 5G NGC Next Generation Core OSS Operations Support Systems network deployment and end to end 5G network architecture Some details on multiple network elements end products such as 5G base station small cells and the role of semiconductors in telecommunication are also provided Keeping trends in mind service delivery mechanisms along with state of the art services such as MFS mobile financial services mHealth mobile health and IoT Internet of Things are covered at length At the end telecom sector s burning challenges and best practices are explained which may be looked into for today s and tomorrow s networks The book concludes with certain high level suggestions for the growth of telecommunication particularly on the importance of basic research departure from ten year evolution cycle and having a 20 30 year plan Explains the conceivable six phases of mobile telecommunication s ecosystem that includes R D standardization product network device application development and burning challenges and best practices Provides an overview of research and standardization on 5G Discusses solutions to address 5G spectrum requirements while describing the global frequency spectrum allocation process Presents various case studies and policies Provides details on multiple network elements and the role of semiconductors in telecommunication Presents service delivery mechanisms with special focus on IoT

**Smart Intelligent Computing and Applications** Suresh Chandra Satapathy,Vikrant Bhateja,Swagatam Das,2018-10-01 The proceedings covers advanced and multi disciplinary research on design of smart computing and informatics The theme of the book broadly focuses on various innovation paradigms in system knowledge intelligence and sustainability that may be applied to provide realistic solution to varied problems in society environment and industries The volume publishes quality work pertaining to the scope of the conference which is extended towards deployment of emerging computational and knowledge transfer approaches optimizing solutions in varied disciplines of science technology and healthcare

**Digital Health** Homero Rivas,Katarzyna Wac,2018-01-02 This book presents a comprehensive state of the art approach to digital health technologies and practices within the broad confines of healthcare practices It provides a canvas to discuss emerging digital health solutions propelled by the ubiquitous availability of miniaturized personalized devices and affordable easy to use wearable sensors and innovative technologies like 3D printing virtual and augmented reality and driverless robots and vehicles including drones One of the most significant promises the

digital health solutions hold is to keep us healthier for longer even with limited resources while truly scaling the delivery of healthcare Digital Health Scaling Healthcare to the World addresses the emerging trends and enabling technologies contributing to technological advances in healthcare practice in the 21st Century These areas include generic topics such as mobile health and telemedicine as well as specific concepts such as social media for health wearables and quantified self trends Also covered are the psychological models leveraged in design of solutions to persuade us to follow some recommended actions then the design and educational facets of the proposed innovations as well as ethics privacy security and liability aspects influencing its acceptance Furthermore sections on economic aspects of the proposed innovations are included analyzing the potential business models and entrepreneurship opportunities in the domain *Pressure Vessel Handbook* Eugene F. Megyesy,1977

**Information and Communication Technology for Development for Africa** Fisseha Mekuria,Ethiopia Nigussie,Tesfa Tegegne,2019-08-01 This book constitutes the proceedings of the Second International Conference on Information and Communication Technology for Development for Africa ICT4DA 2019 held in Bahir Dar Ethiopia in May 2019 The 29 revised full papers presented were carefully reviewed and selected from 69 submissions The papers address the impact of ICT in fostering economic development in Africa In detail they cover the following topics artificial intelligence and data science wireless and mobile computing and Natural Language Processing
