The Panasonic LUMIX LX100 is a compact zoom camera designed with the enthusiast and advanced photographer in mind. For those shooters looking for a very capable camera with a small profile—especially when compared to a DSLR—the LX100 hits the mark, and it does so without compromise in quality. With its Four Thirds sensor, its 24–75mm focal range, and its Leica f/1.7–2.8 lens, the LX100 has received much high praise. In fact, DP Review awarded the camera its highest ever score in its camera class and called it “one of the best photographers’ cameras on the market and probably the best zoom compact ever made.” In addition, the inclusion of 4k video and 4k photo mode put the LX100 in a class by itself.
