Austin-Healey Sprite MG Midget Owner's Workshop Manual

1958-1971 948 CC - 1098 CC - 1275 CC Oct 09 2023 344 pages, with more than 200 illustrations and charts, size 5.5 x 8.5 inches.

Originally published under the title 'Sprite and Midget Owner's Manual and Service Manual' by Floyd Clymer just prior to his untimely death in 1970, this revised and updated edition was republished in 2015 by VelocePress. Written in easy to understand language, this is possibly the most user-friendly and comprehensive owner's workshop manual ever published for the 948cc, 1098cc and 1275cc series of Austin-Healey Sprites and MG Midgets. The contents of the original Clymer manual have now been reformatted into three separate sections appropriate to the three different engines that were used in this series of automobiles between 1958 through 1971. There is an engine/chassis 'Model Identification Chart' followed by a 'General Data' section that includes complete technical specifications for each model listed within the 'Model Identification Chart'. There are detailed instructions for the overhaul, service and maintenance of the major mechanical and electrical components for the 948cc, 1098cc and 1275cc engines. In addition, the 1275cc engine section includes comprehensive emission control information and test data. There are also additional wiring diagrams that were not included in the original 1970 publication. Finally, there is a section on 'Increasing Power and Performance' that also includes detailed

step-by-step instructions and illustrations for the installation of a Judson Supercharger. The reproduction of a factory handbook included in the original Clymer publication has been omitted due to the fact that there were numerous variations of the official BMC handbook that were issued during the production run of this series of automobiles. Therefore, it is recommended that this manual be used in conjunction with the 'Owners Handbook' that was issued with your automobile. Out-of-print and unavailable for many years, this book is becoming increasingly more difficult to find on the secondary market and we are pleased to be able to offer this reproduction as a service to all 'Spridget' owners, restorers and enthusiasts worldwide.

SACHS 100cc & 125cc ENGINES 1968-1975 WORKSHOP MANUAL - INCLUDING DATA FOR THE SACHS & DKW MOTORCYCLES THAT UTILIZED THESE ENGINES Sep 15 2021 234 pages and more than 300 illustrations and charts, size 8.25 x 10.75 inches. This manual is a reproduction of the original Floyd Clymer 100cc and 125cc Sachs Engine workshop manual. However, it has been updated with a 1974 illustrated 'List of Spares' for the 100cc and 125cc Sachs engines. In addition, it includes a 1968 illustrated 'Spare Parts List' for the 1968 to 1971 Sachs 'Enduro', 'Cross Country' and 'Moto Cross' motorcycles that was omitted from the later editions. It has also been expanded to include maintenance and repair data for both the leading link and telescopic fork variants of the 1971 to 1975 Sachs/DKW 'Enduro', 'Boondocker', 'Moto-Cross' and 'Hornet' motorcycles plus a 1972

illustrated 'Spare Parts List' for those models. Obviously, this manual evolved in part due to the Sachs acquisition of both Hercules motorcycles in the late 1950's and DKW in 1966. However, it will also be of use to owners of any other motorcycles that utilized this series of 100cc and 125cc Sachs engines. After the end of World War II, several motorcycle manufacturers were merged or absorbed under the Sachs banner and, in 1968 Sachs introduced their 100cc and 125cc 'Enduro', 'Cross Country' and 'Moto Cross' motorcycles for sale in the USA. The significance of the Sachs, Hercules and DKW mergers would soon become apparent as, while the Sachs motorcycles carried the 'Sachs' logo on the engine case, they featured a 'Hercules' identification plate on the steering head. In addition, Sachs ultimately decided to market their 'Enduros' and 'Scramblers' under the DKW badge and the original Sachs 'Enduro', 'Cross Country' and 'Moto Cross' models disappeared from the USA market in late 1971. However, they were replaced by 125cc DKW 'Enduro', 'Boondocker', 'Moto-Cross' and 'Hornet' models that were mechanically identical to the previous Sachs models, a true case of badge engineering. In 1968 when Sachs introduced their 100cc and 125cc series of 2-stroke engines it was not long before the 'off road' and 'competition' world recognized their durability and performance. Consequently, within a short period of time Sachs engines were in use by a large number of other motorcycle manufacturers. Perhaps the most prominent USA manufacturer being Penton Motorcycles who produced their first competition Sachs powered models in 1968. Floyd Clymer quickly realized that there was a need for service and repair information for these engines and he set about preparation of an appropriate manual in early 1969.
