**A Girl's Story** Apr 11 2022 WINNER OF THE 2022 NOBEL PRIZE IN LITERATURE Another masterpiece of remembering from Annie Ernaux, the Man Booker International Prize–shortlisted author of *The Years*. In *A Girl's Story*, Annie Ernaux revisits the season 50 years earlier when she found herself overpowered by another's will and desire. In the summer of 1958, 18-year-old Ernaux submits her will to a man's, and then he moves on, leaving her without a "master," bereft. Now, 50 years later, she realizes she can obliterate the intervening years and return to consider this young woman that she wanted to forget completely. And to discover that here, submerged in shame, humiliation, and betrayal, but also in self-discovery and self-reliance, lies the origin of her writing life.

*Trajectories of State Formation across Fifteenth-Century Islamic West-Asia* Sep 04 2021 The concept, practice, institution and appearance of 'the state' have been hotly debated ever since the emergence of history as a discipline within modern scholarship. The field of medieval Islamic history, however, has remained aloof from most of these debates. Rather it tends to take for granted the particularity of dynastic trajectories within slow-changing bureaucratic contexts. *Trajectories of State Formation* promotes a more critical and connected understanding of state formation in the late medieval Sultanates of Cairo and of the Timurid, Turkmen and Ottoman dynasties. Projecting seven case studies onto a broad canvas of European and West-Asian research, this volume presents a trans-dynastic reconstruction, interpretation and illustration of statist trajectories across fifteenth-century Islamic West-Asia. The contributors are: Georg Christ, Kristof D'hulster, Jan Dumolyn, Albrecht Fuess, Dimitri J. Kastritsis, Beatrice Forbes Manz, John L. Meloy, Jo Van Steenberg, and Patrick Wing.

*Change.edu* May 13 2022 It's no wonder American higher education is facing a crisis. While low-income students can't find a spot in their local community colleges for lack of funding, public four-year universities are spending staggering sums on luxurious residence halls, ever-bigger football stadiums, and obscure research institutes. We have cosseted our most advantaged students even as we deny access to the working adults who urgently need higher education to advance their careers and our economy. In *Change.edu: Rebooting for the new talent economy* Andrew S. Rosen clearly and entertainingly details how far the American higher education system has strayed from the goals of access, quality, affordability, and accountability that should characterize our system, and offers a prescription to restore American educational pre-eminence. To change, our system will have to end its reflexive opposition to anything new and different. Rosen describes how each new wave of innovation and expansion of educational access—starting with the founding of Harvard in 1636, and continuing with the advent of land-grant colleges in the 19th century, community colleges in the 20th century and private sector colleges over the last two decades—has been met with misunderstanding and ridicule. When colleges like the University of California, Cornell and Purdue were founded, they were scorned as "pretenders to the title of university" – language that tracks later criticisms of community colleges and most recently for-profit colleges. Avoiding that condescension is just one of the reasons colleges have come under the sway of "Harvard Envy" – schools that were founded to expand access feel an inexorable tug to become more prestigious and exclusive. Even worse, the competition for the best students has led universities to turn themselves into full-fledged resorts; they've built climbing walls, French bistros and 20-person hot-tubs to entice students to their campuses. How can America address an incentive system in higher education that is mismatched to the challenges of the years ahead? In *Change.edu*, Rosen outlines "seven certainties" of education in the coming 25 years, and presents an imperative for how our system must prepare for the coming changes. He proposes a new "playbook" for dealing with the change ahead, one that will enable American higher education to regain its global primacy and be a catalyst for economic growth in the 21st century.

**The Reign of Philip the Fair** Aug 28 2023 The reign of Philip the Fair marks both the culmination of the medieval French monarchy and the beginning of the transition from the medieval to the modern period. In this long-awaited study of Philip's reign, Joseph R. Strayer discusses the king's personality, his quarrels with the Church and with neighboring rulers, and his relations with his subjects. He also examines developments in the French administrative system. In studying the decision-making process and the careers of hundreds of royal officials, the author determines how increases in royal power and in the effectiveness and complexity of the administration were achieved. He also considers how these changes affected the possessing classes and how Philip made them acceptable or at least tolerable to the politically conscious segment of the population. As Professor Strayer shows, under Philip, the balance of loyalty swung away from the local authorities and the Church Universal and toward the secular, sovereign state. The central administration grew so strong, and its efficiency so improved, that it became the model for many other European states. Joseph R. Strayer retired from Princeton University as Dayton-Stockton Professor of History in 1973. He is the author of numerous books and articles, including *On the Medieval Origins of the Modern State* and *Medieval Statecraft and the Perspectives of History* (both Princeton books). Originally published in 1980. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

**A Century in Books** Dec 08 2021 It all began atop a drugstore in Princeton, New Jersey, in November 1905. From its modest beginnings, Princeton University Press was to become one of the world's most important scholarly publishers, embracing a wealth of disciplines that have enriched our cultural, academic, and scientific landscape. Both as a tribute to our authors and to celebrate our centenary, Princeton University Press here presents *A Century in Books*. This beautifully designed volume highlights 100 of the nearly 8,000 books we have published. Necessarily winnowed from a much larger list, these books best typify what has been most lasting, most defining, and most distinctive about our publishing history--from Einstein's *The Meaning of Relativity* (1922) to the numerous mathematical and other works that marked the Press's watershed decade of the 1940s, including von Neumann and Morgenstern's *Theory of Games and Economic Behavior*; from milestones of literary criticism by Erich Auerbach and Northrop Frye to George Kennan's Pulitzer Prize-winning book on Soviet-American relations; from Milton Friedman and Anna Jacobson Schwartz's *A Monetary History of the United States, 1867-1960* to more recent landmarks such as L. Luca Cavalli-Sforza, Paolo Menozzi, and Alberto Piazza's *The History and Geography of Human Genes* and Robert Shiller's *Irrational Exuberance*. In addition to succinct descriptions of the 100 titles and a short introduction on the history of the Press, the book features five essays by prominent scholars and writers: Michael Wood discusses the impact on Princeton University Press of intellectuals who fled Nazi Germany and authored many influential books. Anthony Grafton recounts our rich publishing tradition in history, politics, and culture. Sylvia Nasar traces our evolution into a leading voice in economics publishing. Daniel Kevles reflects on Einstein, a figure of special importance to Princeton. And Lord Robert May writes on our long-standing tradition of publishing in mathematics and science. *A Century in Books* is more than a celebration of 100 years of publishing at Princeton University Press--it is a treasure trove of 100 years of books that have added to the richness of twentieth-century intellectual life.

**Virtual Private Networks** Jun 01 2021 VPNs enable any enterprise to utilize the Internet as its own secure private network. In this book, two leading VPN implementers offer a start-to-finish, hands-on guide to constructing and operating secure VPNs. Going far beyond the theory found in most books, Ruixi Yuan and Tim Strayer present best practices for every aspect of VPN deployment, including tunneling, IPsec, authentication, public key infrastructure, and network/service management. Strayer and Yuan begin with a detailed overview of the fundamental concepts and architectures associated with enterprise VPNs, including site-to-site VPNs, remote access VPNs, and extranets. They compare all options for establishing VPN tunnels across the Internet, including PPTP, L2F, and L2TP. Next, they present in-depth coverage of implementing IPsec; establishing two-party or trusted third-party authentication; building a robust public key infrastructure; and managing access control. The book includes expert coverage of VPN gateway configuration, provisioning, and management; Windows and other VPN clients; and network/service management, including SLAs and network operations centers. Finally, the authors preview the future of VPNs, showing how they may be enhanced to provide greater quality of service and network intelligence. For all networking and IT professionals, security specialists, consultants, vendors, and service providers responsible for building or operating VPNs.

**Freshwater Ecology** Jan 09 2022 Freshwater ecosystems are under increasing pressure as human populations grow and the need for clean water intensifies. The demand for ecologists and environmental managers who are trained in basic freshwater ecology has never been greater. Students and practitioners new to the field of freshwater ecology and management need a text that provides them with an accessible introduction to the key questions while still providing sufficient background on basic scientific methods. Gerry Closs, Barbara Downes and Andrew Boulton have written a text that meets the requirements of these students. Following an introduction to scientific methodology and its application to the study of ecology, several key concepts in freshwater

ecology are reviewed using a wide range of scientific studies into fundamental and applied ecological questions. Key ecological questions that are explored in a freshwater context include the role of animal dispersal and predators on freshwater community structure and the impact of pollutants and introduced species on freshwater ecosystems. This book represents the only freshwater ecology textbook that is specifically aimed at an introductory level. It will also be a useful primer for students who have not previously taken a specialized freshwater course but who require an accessible overview of the subject. General reviews on the methods of science, influence of scale, and the main features of freshwater systems. Coverage of several fundamental and applied ecological questions. A logical structure in each chapter that builds from a general observation of an ecological pattern, to an exploration of the various scientific approaches that can be used to investigate such patterns. Suggested further reading lists for each chapter.

**Anne-Marie the Beauty** Mar 30 2021 Another thought-provoking master class in how we perform life by the award-winning novelist and playwright Yasmina Reza. "I was bored with my husband," says Anne-Marie, the irrepressible voice of Anne-Marie la Beauté, "but you know, boredom is part of love." Mostly she is speaking here of her more famous friend and colleague, the French actress Giselle Fayolle, in whose shadow she has spent her career. "My life was a near miss," she adds, before explaining that she enunciated well because "I loved to say the words." A very short novel with the power and resonance of a much longer one, Anne-Marie la Beauté is a profound and moving act of remembrance, a clear-eyed assessment of the hard-edged nature of fame, a meditation on aging--and a wonderfully observant and comic exploration of human foibles. In short, another thought-provoking master class in how we perform life by the peerless Yasmina Reza.

**On the Medieval Origins of the Modern State** Dec 20 2022 The modern state, however we conceive of it today, is based on a pattern that emerged in Europe in the period from 1100 to 1600. Inspired by a lifetime of teaching and research, *On the Medieval Origins of the Modern State* is a classic work on what is known about the early history of the European state. This short, clear book explores the European state in its infancy, especially in institutional developments in the administration of justice and finance. Forewords from Charles Tilly and William Chester Jordan demonstrate the perennial importance of Joseph Strayer's book, and situate it within a contemporary context. Tilly demonstrates how Strayer's work has set the agenda for a whole generation of historical analysts, not only in medieval history but also in the comparative study of state formation. William Chester Jordan's foreword examines the scholarly and pedagogical setting within which Strayer produced his book, and how this both enhanced its accessibility and informed its focus on peculiarly English and French accomplishments in early state formation.

**Meiobenthology** Oct 06 2021 Meiobenthology is the science of the tiny animals that live in huge numbers in all aquatic sediments. This fully revised and enlarged second edition emphasizes new discoveries and developments in this field. Major progress has been made in three general areas: - Systematics, diversity and distribution, - Ecology, food webs, and energy flow, - Environmental aspects, including studies of anthropogenic impacts. The meiobenthos of polar and tropical regions, deep-sea bottoms and hydrothermal vents are now studied in more detail. The high number of species found to survive under such extreme conditions puts them at the forefront of biodiversity studies. Molecular screening methods enable large numbers to be analyzed upon applying reasonable effort. The aim of this book is to synthesize these modern scientific achievements such that meiobenthology can play a key role in aquatic research and in assessing the health of our environment.

**Anna Politkovskaya** Jul 27 2023 The deeply researched and partly imagined story of the fearless, internationally recognized journalist who was assassinated for believing that 'words can save lives.' Say No to Fear, part of the *They Said No* series of histories, tells the story of Anna Politkovskaya's courageous life narrated from the perspective of her longtime mentor and friend, the dissident writer Vassily Pachoutinsev. From their first meeting when she was a young literature student writing about poet Marina Tsvetaeva to her rise as an internationally recognized journalist, through Vassily we see Anna develop from junior reporter, to covering social issues after the fall of the Soviet Union, to becoming a fearless defender of human rights. Throughout the author brings the history to life by including key conversations that might have happened between them at pivotal moments in Politkovskaya's life. A scathing critic of the second Chechen war, Politkovskaya published most of her political work while working at the *Novaya Gazeta*, a newspaper at the forefront of the fight for free expression in Russia. For their outspokenness several members of its staff were murdered, presumably silenced by Russia's Vladimir Putin and Chechen leader Ramzan Kadyrov. Even after a poisoning attack and a mock execution, Politkovskaya persisted, adamant in her fight for her children's and grandchildren's world, critiquing the situation in Chechnya and Putin until her assassination in 2006. The narrator, Pachoutinsev, explains how her legacy lives on, inspiring those in pursuit of justice and the truth both in Russia and abroad.

**Mixed Magic** Jul 03 2021 *Mixed Magic: Global-local dialogues in fairy tales for young readers* considers retellings and adaptations from a 'glocal' context: a framework focused on the reciprocal and cross-cultural exchange between global processes and local practices and their potential transformative effects. The study examines an eclectic range of retellings from the East and West from the 19th century until the present, among them orientalized picturebook versions of *Beauty and the Beast* and *Bluebeard*; Disney's animated classics; Asian versions of Hans Christian Andersen's *The Little Mermaid*; Gene Luen Yang's graphic novel *American Born Chinese*; and the fantasy films of Hayao Miyazaki. Drawing on theories of globalization, cognitive narratology, subjectivity, and eastern thought, the book reveals new implications for intertextual analysis. This beautifully illustrated volume is the first sustained study of the effects of global-local and East-West interchanges on representations of self and Others in children's literature and folklore studies.
