"The rise and fall of Venice's empire is an irresistible story and [Roger] Crowley, with his rousing descriptive gifts and scholarly attention to detail, is its perfect chronicler."—The Financial Times The New York Times bestselling author of *Empires of the Sea* charts Venice's astounding five-hundred-year voyage to the pinnacle of power in an epic story that stands unrivaled for drama, intrigue, and sheer opulent majesty. *City of Fortune* traces the full arc of the Venetian imperial saga, from the ill-fated Fourth Crusade, which culminates in the sacking of Constantinople in 1204, to the Ottoman-Venetian War of 1499-1503, which sees the Ottoman Turks supplant the Venetians as the preeminent naval power in the Mediterranean. In between are three centuries of Venetian maritime dominance, during which a tiny city of "lagoon dwellers" grow into the richest place on earth. Drawing on firsthand accounts of pitched sea battles, skillful negotiations, and diplomatic maneuvers, Crowley paints a vivid picture of this avaricious, enterprising people and the bountiful lands that came under their dominion. From the opening of the spice routes to the clash between Christianity and Islam, Venice played a leading role in the defining conflicts of its time—the reverberations of which are still being felt today. "[Crowley] writes with a racy briskness that lifts sea battles and sieges off the page."—The New York Times "Crowley chronicles the peak of Venice's past glory with Wordsworthian sympathy, supplemented by impressive learning and infectious enthusiasm."—The Wall Street Journal *NOW A NETFLIX LIMITED SERIES—from producer and director Shawn Levy (*Stranger Things*) starring Mark Ruffalo, Hugh Laurie, and newcomer Aria Mia Loberti* Winner of the Pulitzer Prize and National Book Award finalist, the beloved instant New York Times bestseller and New York Times Book Review Top 10 Book about a blind French girl and a German boy whose paths collide in occupied France as both try to survive the devastation of World War II. Marie-Laure lives with her father in Paris near

the Museum of Natural History where he works as the master of its thousands of locks. When she is six, Marie-Laure goes blind and her father builds a perfect miniature of their neighborhood so she can memorize it by touch and navigate her way home. When she is twelve, the Nazis occupy Paris, and father and daughter flee to the walled citadel of Saint-Malo, where Marie-Laure's reclusive great uncle lives in a tall house by the sea. With them they carry what might be the museum's most valuable and dangerous jewel. In a mining town in Germany, the orphan Werner grows up with his younger sister, enchanted by a crude radio they find. Werner becomes an expert at building and fixing these crucial new instruments, a talent that wins him a place at a brutal academy for Hitler Youth, then a special assignment to track the Resistance. More and more aware of the human cost of his intelligence, Werner travels through the heart of the war and, finally, into Saint-Malo, where his story and Marie-Laure's converge. Doerr's "stunning sense of physical detail and gorgeous metaphors" (San Francisco Chronicle) are dazzling. Deftly interweaving the lives of Marie-Laure and Werner, he illuminates the ways, against all odds, people try to be good to one another. Ten years in the writing, *All the Light We Cannot See* is a magnificent, deeply moving novel from a writer "whose sentences never fail to thrill" (Los Angeles Times). _____ 'Full of fun, longing and wit ... a debut of spirit and imagination, loaded with intelligent charm' - Ali Smith 'A touching and engrossing story ... an assured debut' - The Times 'A colourful and peripatetic view of politics in Pakistan ... an interesting and promising novel' - Guardian _____ BY THE ACCLAIMED WINNER OF THE WOMEN'S PRIZE FOR FICTION SHORTLISTED FOR THE JOHN LLEWELLYN RHYS PRIZE _____ Hasan is eleven years old. He loves cricket, pomegranates, the night sky, his clever, vibrant artistic mother and his etymologically obsessed lawyer father, and he adores his next-door neighbour Zehra. One early summer morning, while lazing happily on the roof, Hasan watches a young boy flying a yellow kite fall to his death. Soon after, Hasan's idyllic, sheltered family life is shattered when his beloved uncle Salman, a dissenting politician, is arrested and charged with treason... Set in a land ruled by an oppressive military regime, this eloquent, charming and quietly political novel vividly recreates the confusing world of a young boy on the edge of adulthood, and beautifully illustrates the transformative power of the imagination. Bishop Samuel Vagalas Kanco's testimony is more than just the biography of a man, or an examination of his preaching. *The Witch Doctor and The Man: City Under the Sea* penetrates deeply into the very essence of Bishop Kanco's life and ministry. Witnessing the power of the Holy Spirit's anointing in his life and work, you will find this book fascinating and empowering. As a young man in Ghana, Vagalas Kanco was a high level wizard in his tribe. Fortunately, Jesus Christ intervened to rescue him from the kingdom of darkness shortly before he

inherited, from his father, the position of fourth generation witch doctor. The Bishop's testimony tells of a high-powered confrontation between Satan, the lord of darkness, and Jesus Christ, the Lord of Lords. Kanco exposes the lies, subterfuges, and half-truths Satan uses to entice people down dark and dangerous back alleys. With characteristic creativity and skill, Bishop Kanco strips away the veneer of our modern society, to expose the evil of Satan and his many demonic minions, evil that often disguises itself as good. His testimony is a landmark study of the power of God. There's an honest terror here that will instruct you. So, read and grow in your understanding of this mighty warrior of God. Bishop Samuel Vagalas Kanco received his Doctorate of Ministry from Southeastern Seminary in Savannah, GA. He currently oversees The Lord's Vineyard Church, International (Box 816, Medina, Accra, Ghana, Africa) in Africa, England, and Canada, and also ministers worldwide in a miracle ministry, teaching and healing God's people. He has appeared on many international television and radio programs. DigiCat Publishing presents to you this special edition of "The Old Man and the Sea" by Ernest Hemingway. "An immersive, mildly gonzo and depressingly well-timed book about the drenching effects of global warming, and a powerful reminder that we can bury our heads in the sand about climate change for only so long before the sand itself disappears." (Jennifer Senior, New York Times) A New York Times Critics' Top Book of 2017 One of Washington Post's 50 Notable Works of Nonfiction in 2017 One of Booklist's Top 10 Science Books of 2017 What if Atlantis wasn't a myth, but an early precursor to a new age of great flooding? Across the globe, scientists and civilians alike are noticing rapidly rising sea levels, and higher and higher tides pushing more water directly into the places we live, from our most vibrant, historic cities to our last remaining traditional coastal villages. With each crack in the great ice sheets of the Arctic and Antarctica, and each tick upwards of Earth's thermometer, we are moving closer to the brink of broad disaster. By century's end, hundreds of millions of people will be retreating from the world's shores as our coasts become inundated and our landscapes transformed. From island nations to the world's major cities, coastal regions will disappear. Engineering projects to hold back the water are bold and may buy some time. Yet despite international

efforts and tireless research, there is no permanent solution—no barriers to erect or walls to build—that will protect us in the end from the drowning of the world as we know it. *The Water Will Come* is the definitive account of the coming water, why and how this will happen, and what it will all mean. As he travels across twelve countries and reports from the front lines, acclaimed journalist Jeff Goodell employs fact, science, and first-person, on-the-ground journalism to show vivid scenes from what already is becoming a water world. Seaquake. It was the most dreaded of all undersea phenomena. If strong enough, it would set up chain-reaction pressures that could shatter any dome and cost inestimable lives. But the Krakatoan Dome has been specifically designed to cope with the tremors of its seaquake-prone area. The trouble was, all of a sudden, there were more quakes than any of the experts had counted on... quakes that no one could possibly have forecast because they hadn't come from natural causes. The Sub-Sea Academy had assigned Cadet Jim Eden to the Krakatoan Dome to find out what was going on, and for very special reasons. First, he was more at home in the underwater world than almost anyone else. But, even more important, they sent Jim because his Uncle was suspected of being the heinous saboteur! The Intergovernmental Panel on Climate Change (IPCC) is the leading international body for assessing the science related to climate change. It provides policymakers with regular assessments of the scientific basis of human-induced climate change, its impacts and future risks, and options for adaptation and mitigation. This IPCC Special Report on the Ocean and Cryosphere in a Changing Climate is the most comprehensive and up-to-date assessment of the observed and projected changes to the ocean and cryosphere and their associated impacts and risks, with a focus on resilience, risk management response options, and adaptation measures, considering both their potential and limitations. It brings together knowledge on physical and biogeochemical changes, the interplay with ecosystem changes, and the implications for human communities. It serves policymakers, decision makers, stakeholders, and all interested parties with unbiased, up-to-date, policy-relevant information. Twenty-five years after *Jesus' Son*, a haunting new collection of short stories on mortality and transcendence, from National Book Award winner and two-time Pulitzer Prize finalist Denis Johnson NATIONAL BESTSELLER • NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY Dwight Garner, *The New York Times* • Maureen Corrigan, NPR's *Fresh Air* • *Chicago Tribune* • *Newsday* • *New York* • *AV Club* • *Publishers Weekly* "Ranks with the best fiction published by any American writer during this short century."—*New York* "A posthumous masterpiece."—*Entertainment Weekly* NAMED ONE OF THE BEST BOOKS OF THE YEAR BY *The New York Times Book Review* • *The Washington Post* • NPR • *The Boston Globe* • *New York Public Library* • *Kirkus Reviews* • *Bloomberg* *The Largesse of the Sea Maiden* is the long-awaited new story collection from Denis Johnson. Written in the luminous prose that made him one of the most beloved and

important writers of his generation, this collection finds Johnson in new territory, contemplating the ghosts of the past and the elusive and unexpected ways the mysteries of the universe assert themselves. Finished shortly before Johnson's death, this collection is the last word from a writer whose work will live on for many years to come. Praise for *The Largesse of the Sea Maiden* "An instant classic."—*Newsday* "Exceptional luminosity . . . hits a powerful vein."—*The New York Times Book Review* "Grace and oblivion are inextricably yoked in these transcendent stories. . . . [Johnson's] gift is to extract the beauty in all that brokenness."—*The Wall Street Journal* "Nobody ever wrote like Denis Johnson. Nobody ever came close. . . . We're just left with this miraculous book, these perfect stories, the last words from one of the world's greatest writers."—NPR This book presents and discusses a strategy which includes four approaches to dealing with the risk of sea-level rise and other water hazards. It also offers opportunities for cities to explore urban extensions such as marine estates, aquatic food production systems, new sea related industries, maritime transport developments, new oceanic tourist attractions, and the designation of additional coastal ecological zones. The urban interface between Sea and Cities generates, therefore, both burning issues and valuable opportunities and raises the question of whether it is possible to solve the former by exploiting the latter? *A Lost Race* novel of an Atlantean remnant beneath the ocean off the Azores. Andre Laurie was the only writer to have co-authored a book, *Salvage from the Cynthia*, with Jules Verne. NEW YORK TIMES BESTSELLER. SEMI-FINALIST FOR THE PEN/DIAMONSTEIN-SPIELVOGEL AWARD FOR ART OF THE ESSAY. One of *Amazon*, *Buzzfeed*, *ELLE*, *Electric Literature* and *Pop Sugar's* Best Books of 2018. Named one of the Best Books of October and Fall by *Amazon*, *Buzzfeed*, *TIME*, *Vulture*, *The Millions* and Vol. 1 *Brooklyn*. "Hilarious, nimble, and thoroughly illuminating." —Colson Whitehead, author of *The Underground Railroad* A globe-spanning, ambitious book of essays from one of the most enthralling storytellers in narrative nonfiction In his highly anticipated debut essay collection, *Impossible Owls*, Brian Phillips demonstrates why he's one of the most iconoclastic journalists of the digital age, beloved for his ambitious, off-kilter, meticulously reported essays that read like novels. The eight essays assembled here—five from Phillips's *Grantland* and *MTV* days, and three new pieces—go beyond simply chronicling some of the modern world's most uncanny, unbelievable, and spectacular oddities (though they do that, too). Researched for months and even years on end, they explore the interconnectedness of the globalized world, the consequences of history, the power of myth, and the ways people attempt to find meaning. He searches for tigers in India, and uncovers a multigenerational mystery involving an oil tycoon and his niece turned stepdaughter turned wife in the Oklahoma town where he grew up. Through each adventure, Phillips's remarkable voice becomes a character itself—full of verve, rich with offhanded humor, and revealing unexpected vulnerability. Dogged, self-aware, and radiating a contagious

enthusiasm for his subjects, Phillips is an exhilarating guide to the confusion and wonder of the world today. If John Jeremiah Sullivan's *Pulphead* was the last great collection of *New Journalism* from the print era, *Impossible Owls* is the first of the digital age. Longlisted for the National Book Award for Young People's Literature! From the *New York Times* and USA Today bestselling author of the *Shatter Me* series comes a powerful, heartrending contemporary novel about fear, first love, and the devastating impact of prejudice. It's 2002, a year after 9/11. It's an extremely turbulent time politically, but especially so for someone like Shirin, a sixteen-year-old Muslim girl who's tired of being stereotyped. Shirin is never surprised by how horrible people can be. She's tired of the rude stares, the degrading comments—even the physical violence—she endures as a result of her race, her religion, and the hijab she wears every day. So she's built up protective walls and refuses to let anyone close enough to hurt her. Instead, she drowns her frustrations in music and spends her afternoons break-dancing with her brother. But then she meets Ocean James. He's the first person in forever who really seems to want to get to know Shirin. It terrifies her—they seem to come from two irreconcilable worlds—and Shirin has had her guard up for so long that she's not sure she'll ever be able to let it down. Originally published in 1978, Josef Konvitz provides a broad comparative study of European port cities since the Renaissance by examining how they were built and rebuilt in the context of urban industrialization. Konvitz argues that as seafaring became more critical to Western civilization, intellectuals and rulers placed more importance on urban planning. Planning looked different, of course, in various European cities. In Paris, riverside planning was patched into the existing frame of the city, whereas Scandinavian towns on the Baltic were over-designed to accommodate a degree of maritime trade unsustainable for cities writ large. In the eighteenth century, city planning fell out of vogue, and new solutions were introduced to help solve the problems created by urban development. With a series of helpful maps, Konvitz's book is an important source for urban historians of early modern Europe. The year is 2276. Oceans have risen. Oil has run out long ago. The human population has skyrocketed to over 14 billion people. Decades and hundreds of years of pollution, bad waste management, and limiting food resources have caused countless natural disasters and diseases, damaging our world. The worldwide Great Plague of 2083 disturbed world governments that if another such outbreak occurred, the extinction of humanity would be imminent. The solution? Oceania. A city lying over two miles beneath the surface was supposed to be the secret experimental human civilization under the sea. Only the best and the brightest from each country around the world was selected to move there. Everyone the top of their respective fields holding the highest degrees possible for their profession. So, what happens when a bored, yet curious fourteen-year-old girl named Allie trespasses on a restricted government beach with direct access to the city? She stumbles upon a boy her age from Oceania, who was convinced that his city held the only human survivors on earth.

Curiosity getting the best of her, Allie accepts his invitation to visit it. She discovers a world so different from her own that she can't help but visit it again and again, turning her boring summer with her grandmother into an adventure of a lifetime. But will Allie and the boy's friendship ruin the secrecy of the experimental city Oceania? Or will Allie be discovered as an outsider on one of their frequent trips to Oceania and be barred from ever leaving? *Oceania: The Underwater City* is a young adult sci-fi novel packed with exploratory underwater adventures, science, and more. It is a story about friendship, courage, and finding one's place in the world. The New York Times bestselling author of *The House of the Spirits* and *A Long Petal of the Sea* tells the story of one unforgettable woman—a slave and concubine determined to take control of her own destiny—in this sweeping historical novel that moves from the sugar plantations of Saint-Domingue to the lavish parlors of New Orleans at the turn of the 19th century “Allende is a master storyteller at the peak of her powers.”—Los Angeles Times

The daughter of an African mother she never knew and a white sailor, Zarité—known as Tété—was born a slave on the island of Saint-Domingue. Growing up amid brutality and fear, Tété found solace in the traditional rhythms of African drums and the mysteries of voodoo. Her life changes when twenty-year-old Toulouse Valmorain arrives on the island in 1770 to run his father's plantation, Saint Lazare. Overwhelmed by the challenges of his responsibilities and trapped in a painful marriage, Valmorain turns to his teenaged slave Tété, who becomes his most important confidant. The indelible bond they share will connect them across four tumultuous decades and ultimately define their lives. "Welcome to the coral reef--a giant city under the sea. Here you'll discover how tiny coral polyps form stony skeletons that become large 'buildings' rising up from the ocean floor. You'll also find out how clownfish, parrotfish, and other colorful residents depend on the reef--and on one another--to survive"--P. [4] of cover. Brooke knows the rules. Everyone in the city outside the wall does. If you never cause any trouble, you never disappear. Even after her father's mysterious death, she's always known she'll do whatever it takes to live a good life and earn her place on the land one day. But when the watchmen suddenly start following her every move, it doesn't matter if she's done anything wrong. Now she needs to find out why they are watching before she vanishes without a trace. *The City on the Sea*, book one in the *City on the Sea Series*, is the thrilling first installment to this futuristic dystopian series. Climate change and rising sea levels have forced humanity to survive on the ocean in order to protect the precious bit of land remaining. This richly descriptive and darkly beautiful story will make you wonder if you have what it takes to live in the city on the sea. "Stefan Al provides an accessible overview of typical strategies for designing an urban shoreline to respond to flooding, with a strong emphasis on past and present Dutch approaches. Numerous illustrations make it useful for non-designers, as well as students of design. I recommend the book to planners and designers who are looking for an introduction to strategies for coastal

design." Kristina Hill, Associate Professor, University of California, Berkeley "Adapting Cities to Sea Level Rise is a frank typological exploration that synthesizes civil engineering, landscape, and urban design considerations into an accessible reference that highlights the adaptive and maladaptive tendencies of design. Rich with case studies, the book provides critical insights into the nuances shaping the life cycle of design interventions." Jesse M. Keenan, Faculty of Architecture, Harvard University, Graduate School of Design "With his book, Stefan Al presents an inspiring and extensive toolbox of strategies that cities can embrace to adapt to sea level rise. Al looks across the world optimistically: yes we can do it! And we must, since there is no time to waste. Adaptation is different in every place, and this book shows us how to maximize opportunities if only we work together in a truly inclusive and comprehensive way." Henk Ovink, Special Envoy for International Water Affairs, Kingdom of The Netherlands, Sherpa to the UN and World Bank High Level Panel on Water, and Principal for Rebuild by Design. "Although the beauty and diversity of reef species may appear as marvelous decoration, this biodiversity is important for the survival of the reef community. The various ecological, or functional, roles performed by different species provide a degree of social security enabling the reef community as a whole to sustain itself through time."--From book jacket. When Jim Eden's uncle, the inventor of a valuable undersea device, disappears while testing a new undersea mining process, Eden heads for the undersea mining colony to investigate on his own. Original. Now with an Historical Afterword by Ron Miller Includes the original illustrations Featured in Ron Miller's *The Conquest of Space Book Series*. Ó Andre Laurie tells the story of intrepid French submariners who discover the sole survivors of Atlantis living within a crystal dome on the ocean floor. English edition published in 1896. At the publisher's request, this title is sold without DRM (Digital Rights Management). In a world flooded and irradiated by a nearly forgotten cataclysm from generations passed, all that remains of civilization clings to life in two war-torn, city-sized submarines. For fifty years, the only peace between them had come from separation. Now, young council woman Ralla Gattley has uncovered mysteries that will bring these two factions face-to-face, initiating a series of events that will forever change their undersea world. She didn't expect to meet Thom Vargas, a bored fisherman and aspiring drunk who merely wants to climb one rung on the social ladder. Little did he know that single step may well put the fate of the world in his hands. The harrowing story of five men who were sent into a dark, airless, miles-long tunnel, hundreds of feet below the ocean, to do a nearly impossible job—with deadly results A quarter-century ago, Boston had the dirtiest harbor in America. The city had been dumping sewage into it for generations, coating the seafloor with a layer of “black mayonnaise.” Fisheries collapsed, wildlife fled, and locals referred to floating tampon applicators as “beach whistles.” In the 1990s, work began on a state-of-the-art treatment plant and a 10-mile-long tunnel—its endpoint stretching farther from civilization than the earth's deepest ocean

trench—to carry waste out of the harbor. With this impressive feat of engineering, Boston was poised to show the country how to rebound from environmental ruin. But when bad decisions and clashing corporations endangered the project, a team of commercial divers was sent on a perilous mission to rescue the stymied cleanup effort. Five divers went in; not all of them came out alive. Drawing on hundreds of interviews and thousands of documents collected over five years of reporting, award-winning writer Neil Swidey takes us deep into the lives of the divers, engineers, politicians, lawyers, and investigators involved in the tragedy and its aftermath, creating a taut, action-packed narrative. The climax comes just after the hard-partying DJ Gillis and his friend Billy Juse trade assignments as they head into the tunnel, sentencing one of them to death. An intimate portrait of the wreckage left in the wake of lives lost, the book—which Dennis Lehane calls “extraordinary” and compares with *The Perfect Storm*—is also a morality tale. What is the true cost of these large-scale construction projects, as designers and builders, emboldened by new technology and pressured to address a growing population's rapacious needs, push the limits of the possible? This is a story about human risk—how it is calculated, discounted, and transferred—and the institutional failures that can lead to catastrophe. Suspenseful yet humane, *Trapped Under the Sea* reminds us that behind every bridge, tower, and tunnel—behind the infrastructure that makes modern life possible—lies unsung bravery and extraordinary sacrifice. The miraculous account of the man who survived alone and adrift at sea longer than anyone in recorded history. For fourteen months, Alvarenga survived constant shark attacks. He learned to catch fish with his bare hands. He built a fish net from a pair of empty plastic bottles. Taking apart the outboard motor, he fashioned a huge fishhook. Using fish vertebrae as needles, he stitched together his own clothes. Based on dozens of hours of interviews with Alvarenga and interviews with his colleagues, search and rescue officials, the medical team that saved his life and the remote islanders who nursed him back to health, this is an epic tale of survival. Print run 75,000. Magnificent coral formations create a lovely and mysterious ocean home for schools of anemones, sharks, and barracuda in this photo essay by one of the world's leading underwater photographers. Flounders hide in the sandy bottom and predators lurk at the edges while a sea turtle swims through to lay her eggs on the beach beyond. Colorful and dramatic photos bring to the reader the wonders of a very special undersea realm. Jeremy Dodge knew the Earth would face starvation if it were not for the new science of “aquaculture.” With the world's population numbering many billions, only the extra food being cultivated on the bottom of the sea could feed everyone. But, like the rest of the surface-dwellers, Jeremy did not know what a vicious monopoly underwater cultivation had become. That is, until the dreadful moment when he himself was kidnaped and dragged beneath the depths. And there he was to learn that just making his own escape would not be enough—he would have to save mankind from the tyranny of a new race of water-breathing human

monsters! Sam's life was perfect. She knew whom she was and what she wanted to do. All she had to do was to get the young prince to the Swinton School. However, getting him there proved to be more difficult than she had ever imagined. All she had to do was outrun the wolves, outsmart the pirates, survive the torture chamber of western China, save her son from his stepmother and make a king out of a boy. Easy Right? The trip that was supposed easy became the journey of a lifetime. New Atlantis

The year is 2062, and mankind has finally begun colonization and taming of the planet's final frontier, Earth's oceans. This is the story of the largest of these cities beneath the sea. An open port of call for merchants, traders, diplomats and thieves. Over five thousand men women and children call this technological marvel, located almost one mile beneath the ocean's surface, home. This is New Atlantis. City Beneath the Sea

The United States Navy's most sophisticated submarine has been hi-jacked by a band of mercenary soldiers, who want to sell it's technological secrets to an unknown secret organization. But first, the new captain of the submarine has some old scores to settle with Miles Walker, the founder and builder of New Atlantis. Can Walker save his undersea city from destruction at the hands of his worst enemy, and will the price be his own life? This book discusses the identification of, solutions to, and management of threats to high population coastal cities and their seaports from global warming, climate change and endemic hazards. These include prevention of sea water intrusion of freshwater coastal aquifers, emplacement of barriers that mitigate the threats from sea level rise, and inundation of urban centers plus those from storm surges that cause flooding and salination of inshore terrain. The book assesses mitigation of the effects of extreme weather events such as drought, and major flooding from heavy rainfall on coastal urban centers, or on associated drainage basins. It also considers how coastal cities can counter vulnerabilities from other physical hazards (e.g., earthquakes - building codes) and health hazards (e.g., pollution, public health response - preparedness) that may be related to a city's geological/geographical location and service as a port of entry for goods and travelers (regional and international). The book also cites the high costs of safeguarding citizen and municipal assets, but notes possible sources of potential funding especially from less developed and developing nations. The book is written to give strong background information to students majoring in environmental sciences or those in other majors with interests in the effects of global warming/climate change, and will be of interest to social scientists, think tank personnel, government planners, and lay persons in environmentally oriented organizations. /div Winner of CILIP Kate Greenaway Medal Winner of the TD Canadian Children's Literature Award

A young boy wakes up to the sound of the sea, visits his grandfather's grave after lunch and comes home to a simple family dinner with his family, but all the while his mind strays to his father digging for coal deep down under the sea. Stunning illustrations by Sydney Smith, the award-winning illustrator of Sidewalk Flowers, show the striking contrast between a sparkling

seaside day and the darkness underground where the miners dig. With curriculum connections to communities and the history of mining, this beautifully understated and haunting story brings a piece of Canadian history to life. The ever-present ocean and inevitable pattern of life in a Cape Breton mining town will enthrall children and move adult readers. What secrets lie beneath the deep blue sea? Underworld takes you on a remarkable journey to the bottom of the ocean in a thrilling hunt for ancient ruins that have never been found—until now. Graham Hancock is featured in Ancient Apocalypse, a Netflix original docuseries In this explosive new work of archaeological detection, bestselling author and renowned explorer Graham Hancock embarks on a captivating underwater voyage to find the ruins of a mythical lost civilization hidden for thousands of years beneath the world's oceans. Guided by cutting-edge science, innovative computer-mapping techniques, and the latest archaeological scholarship, Hancock examines the mystery at the end of the last Ice Age and delivers astonishing revelations that challenge our long-held views about the existence of a sunken universe built on the ocean floor. Filled with exhilarating accounts of his own participation in dives off the coast of Japan, as well as in the Mediterranean, the Atlantic, and the Arabian Sea, we watch as Hancock discovers underwater ruins exactly where the ancient myths say they should be—submerged kingdoms that archaeologists never thought existed. You will be captivated by Underworld, a provocative book that is both a compelling piece of hard evidence for a fascinating forgotten episode in human history and a completely new explanation for the origins of civilization as we know it. NAMED A NEW YORK TIMES NOTABLE BOOK OF 2017 #1 New York Times and #1 Wall Street Journal bestseller! A five-hundred-year-old legend. An ancient curse. A stunning medical mystery. And a pioneering journey into the unknown heart of the world's densest jungle. Since the days of conquistador Hernán Cortés, rumors have circulated about a lost city of immense wealth hidden somewhere in the Honduran interior, called the White City or the Lost City of the Monkey God. Indigenous tribes speak of ancestors who fled there to escape the Spanish invaders, and they warn that anyone who enters this sacred city will fall ill and die. In 1940, swashbuckling journalist Theodore Morde returned from the rainforest with hundreds of artifacts and an electrifying story of having found the Lost City of the Monkey God—but then committed suicide without revealing its location. Three quarters of a century later, bestselling author Doug Preston joined a team of scientists on a groundbreaking new quest. In 2012 he climbed aboard a rickety, single-engine plane carrying the machine that would change everything: lidar, a highly advanced, classified technology that could map the terrain under the densest rainforest canopy. In an unexplored valley ringed by steep mountains, that flight revealed the unmistakable image of a sprawling metropolis, tantalizing evidence of not just an undiscovered city but an enigmatic, lost civilization. Venturing into this raw, treacherous, but breathtakingly beautiful wilderness to confirm the discovery, Preston

and the team battled torrential rains, quickmud, disease-carrying insects, jaguars, and deadly snakes. But it wasn't until they returned that tragedy struck: Preston and others found they had contracted in the ruins a horrifying, sometimes lethal-and incurable-disease. Suspenseful and shocking, filled with colorful history, hair-raising adventure, and dramatic twists of fortune, THE LOST CITY OF THE MONKEY GOD is the absolutely true, eyewitness account of one of the great discoveries of the twenty-first century. After thousands of years, so many of us still search for the answer to the mystery of Atlantis. From time to time, archaeologists and historians locate evidence. There have been many locations proposed for the location of Atlantis. Ever since the first recorded history of Atlantis, written by the Greek philosopher Plato over 2,300 years ago, debate has raged as to whether or not Atlantis ever really existed. The existence of Atlantis is supported by the fact that it is described in great details by Plato. In additions, various conditions, events and goods unknown to Plato are also described in detailed and lengthy words. The recent knowledge of late glacial and postglacial sea level rise and land subsidence that occurred almost precisely at the time described by Plato also becomes strong evidence to the truth of the story. Plato describes the Atlantis from point of views of geography, climate, plain layout, city layout, river and channel hydraulics, produces, social structure, customs, mythology and its destruction in details including their dimensions and orientations. These become the subjects of the author to hypothesize that the lost city of Atlantis is in Java Sea. The works include over 5-year research and analysis of textbooks, papers, internet sites and digital data collected by the author as well as some site observations.
