With an appendix. Increasingly, students worldwide are seeking post-secondary education to acquire new skill-sets and credentials. There is an explosion of community college models that provide educational opportunities and alternative pathways for students who do not fit the traditional higher educational profile. This book focuses on economic models to help local and national economies develop strong workforce training, humanitarian models to bring about social mobility and peace, transformative models to help institutions expand and keep up with societal needs, and newly created models that respond to the educational and training needs of a constantly changing world. These models seek to capture the imagination of those who are committed to learning about what works in higher

education and in particular, the impact community college models are having on the changing nature of world social, political and economic landscapes. With contributors representing 30 countries, this book presents an international perspective. This book provides a unique insight into the learning experiences of career change professionals in teacher education. Many studies have provided a brief glimpse into the experiences of people making a career change into teaching, but this book offers an in-depth analysis of the day to day struggles and triumphs of a small group of career change students studying teacher education in Australia. This study locates teacher professional learning within a sociocultural research paradigm, highlighting the importance of social, cultural and institutional contexts in learning. Learning to become a teacher is not merely the acquisition of a set of technical skills and propositional knowledge, but a far more complex personal struggle to construct a new professional identity. This book uncovers some of the trials, tribulations and joys of becoming a teacher for those who have already worked in other careers. It examines the impact of previous career experiences on the construction of a new professional identity as a teacher. This process is discussed using the conceptual framework of learning within communities of practice. Firstly, a broad-brush picture is presented through

analysis and discussion of extensive quantitative data obtained via an on-line survey, after which a small group of survey respondents provide a more nuanced exploration of their experiences as student teachers. This is followed by three case studies that delve more deeply into the experiences, frustrations and joys of being an 'expert novice' in teacher education. These case studies examine the stories of three career changers who provide personal insights into what it is like to be an experienced professional embarking on a new journey as a novice student teacher. Paying for College Without Going Broke includes a foreword by Bill Clinton as well as in-depth line-by-line strategies for filling out 2016-2017 aid forms including the required federal FAFSA form. The effective use of school resources is a policy priority across OECD countries. The OECD Reviews of School Resources explore how resources can be governed, distributed, utilised and managed to improve the quality, equity and efficiency of school education. This book describes in vivid detail how a newly independent nation with neither a history of technical education nor industry, developed in a short period of time a world-class system of technical and vocational education that helped it make rapid progress in its manufacturing and industrial sector. The economy and the education sector both developed in parallel, with each complementing the other, utilizing strategies and making the decisions that were to bring the country quickly to advanced status. Studies show that premature investment in higher education at the expense of technical and vocational education has created many leaders but few doers, leading to high

unemployment. The Singapore Technical Vocational Education and Training (TVET) story demonstrates how governmental support helped changed the image of technical and vocational education to one equal with higher education, yet including bridges and ladders to allow everyone to maximize their potential. Contents: The Colonial Legacy The Adrenalin of Independence Vocational Training Takes Off The Role of the Economic Development Board in Technical Education Polytechnics Come of Age The Transformation of TVET The Labour Movement and Worker Upgrading Connecting TVET with Higher Education Preparing for a Skills-Based Future Key Lessons for Policy-Makers Readership: Professional researchers, government officials, as well as the general public.
