Codex Canadensis and the Writings of Louis Nicolas Jul 04 2023 Part art, part science, part anthropology, this ambitious project presents an early Canadian perspective on natural history that is as much artistic and fantastical as it is encyclopedic. Edited and introduced by François-Marc Gagnon, The Codex Canadensis and the Writings of Louis Nicolas showcases an intriguing attempt to document the life of the new world - flora, fauna, and aboriginal. The book brings together for the first time the illustrated Codex Canadensis and The Natural History of the New World, following Gagnon's argument that both can be attributed to Louis Nicolas, a French Jesuit priest who travelled throughout Canada between 1664 and 1675. Histoire Naturelle des Indes Occidentales, originally written in classical French, has been put in modern French by Réal Ouellet and translated into English by Nancy Senior. The Natural History presents a pre-Linnaean botany and pre-Darwinian account of living things, including hundreds of species of plants and vivid descriptions of wildlife. It is thoroughly annotated, focusing on the contemporary identification of species, as the result of a pan-Canadian collaboration of experts in fields from linguistics to biology and botany. The Codex Canadensis, currently in the collection of the Gilcrease Museum in Tulsa, Oklahoma, is reproduced in full and provides both a fascinating visual account of wildlife as Nicolas saw it and a rare example of early Canadian art. Gagnon's introduction profiles Louis Nicolas and analyses connections between his work and European examples of natural illustration from the period. The Codex Canadensis and the Writings of Louis Nicolas shows how the wildlife and native inhabitants of the new world were understood and documented by a seventeenth-century European and makes available fundamental documents in the history and visual culture of early North America.

Piper Green and the Fairy Tree Dec 09 2023 On an island off the coast of Maine, where children ride lobster boats to school, Piper worries that too much good luck can sometimes equal bad luck.

The Inquisitory Oct 15 2021 *The Inquisitory* consists entirely of the interrogation of an old, deaf servant regarding unspecified crimes that may or may not have taken place at his master's French chateau. The servant's replies - which are by turns comic, straightforward, angry, nostalgic, and disingenuous - hint at a variety of seedy events, including murder, orgies, tax fraud, and drug deals. Of course, the servant wasn't involved with any of these activities - if the reader chooses to believe him. In trying to convince the inquisitor of his innocence, the servant creates a web of half-truths, vague references, and glaring inconsistencies amid "forgotten" details, indicating that he may know more than he's letting on.

The One and Only Sparkella Mar 08 2021 An Instant #1 New York Times Bestseller! A Publishers Weekly Bestseller! EU Competition Law and Economics Jul 24 2022 This is the first EU competition law treatise that fully integrates economic reasoning in its treatment of the decisional practice of the European Commission and the case-law of the European Court of Justice. Since the European Commission's move to a "more economic approach" to competition law reasoning and decisional practice, the use of economic argument in competition law cases has become a stricter requirement. Many national competition authorities are also increasingly moving away from a legalistic analysis of a firm's conduct to an effect-based analysis of such conduct, indeed most competition cases today involve teams composed of lawyers and industrial organisation economists. Competition law books tend to have either only cursory coverage of economics, have separate sections on economics, or indeed are far too technical in the level of economic understanding they assume. Ensuring a genuinely integrated approach to legal and economic analysis, this major new work is written by a team combining the widely recognised expertise of two competition law practitioners and a prominent economic consultant. The book contains economic reasoning throughout in accessible form, and, more pertinently for practitioners, examines economics in the light of how it is used and put to effect in the courts and decision-making institutions of the EU. A general introductory section sets EU competition law in its historical context. The second chapter goes on to explore the economics foundations of EU competition law. What follows then is an integrated treatment of each of the core substantive areas of EU competition law, including Article 101 TFEU, Article 102 TFEU, mergers, cartels and other horizontal agreements and vertical restraints.

Famous Five 2: Five Go Adventuring Again May 10 2021 Julian, Dick, Anne, George and Timmy the dog find excitement and adventure wherever they go in Enid Blyton's most popular series. In their second adventure, the Famous Five find a thief at Kirrin Cottage. They think they know who it is, but need to prove it. Will the discovery of a very old map help uncover the true culprit? The text in this edition has been sensitively edited for today's reader and is unillustrated.

Big Tech and the Digital Economy Sep 06 2023 This book asks a simple question: are the tech giants monopolies? In the current environment of suspicion towards the major technology companies as a result of concerns about their power and influence, it has become

commonplace to talk of Google, Facebook, Amazon, Apple, Microsoft, or Netflix as the modern day version of the 19th century trusts. In turn, the tech giants are vilified for a whole range of monopoly harms towards consumers, workers and even the democratic process. In the US and the EU, antitrust, and regulatory reform is on the way. Using economics, business and management science as well legal reasoning, this book offers a new perspective on big tech. It builds a theory of "mologopoly". The theory advances that the tech giants, or at least some of them, coexist both as monopolies and oligopoly firms that compete against each other in an environment of substantial uncertainty and economic dynamism. With this, the book assesses ongoing antitrust and regulatory policy efforts. It demonstrates that it is counterproductive to pursue policies that introduce more rivalry in mologopoly markets subject to technological discontinuities. And that non-economic harms like privacy violations, fake news, or hate speech are difficult issues that belong to the realm of regulation, not antimonopoly remediation.

Dare to Disappoint Feb 28 2023 Growing up on the Aegean Coast, Ozge loved the sea and imagined a life of adventure while her parents and society demanded predictability. Her dad expected Ozge, like her sister, to become an engineer. She tried to hear her own voice over his and the religious and militaristic tensions of Turkey and the conflicts between secularism and fundamentalism. Could she be a scuba diver like Jacques Cousteau? A stage actress? Would it be possible to please everyone including herself? In her unpredictable and funny graphic memoir, Ozge recounts her story using inventive collages, weaving together images of the sea, politics, science, and friendship.
