**Modern Processor Design**

John Paul Shen, Mikko H. Lipasti, 2013-07-30 *Conceptual and precise Modern Processor Design* brings together numerous microarchitectural techniques in a clear understandable framework that is easily accessible to both graduate and undergraduate students. Complex practices are distilled into foundational principles to reveal the authors' insights and hands-on experience in the effective design of contemporary high performance micro processors for mobile, desktop and server markets. Key theoretical and foundational principles are presented in a systematic way to ensure comprehension of important implementation issues. The text presents fundamental concepts and foundational techniques such as processor design, pipelined processors, memory and I/O systems and especially superscalar organization and implementations. Two case studies and an extensive survey of actual commercial superscalar processors reveal real world developments in processor design and performance. A thorough overview of advanced instruction flow techniques including developments in advanced branch predictors is incorporated. Each chapter concludes with homework problems that will institute the groundwork for emerging techniques in the field and an introduction to multiprocessor systems.

*Alfa Romeo 916 GTV and Spider* Robert Foskett, 2013-03-01. Alfa Romeo 916 GTV and Spider traces the complete story of the Alfa Romeo GTV and Spider models produced between 1994-2005, commonly known to enthusiasts by the manufacturer's project code as the 916 series. The 916 models would always be controversial; they replaced the iconic Spider, the best selling Alfa Romeo sports model of all time, and the brand-establishing Alfetta GTV. Sharing components and a platform with a humble Fiat hatchback would the cars ever be considered real Alfa Romeos? The cars were critically acclaimed and though they faced tough competition in the late 1990s from the likes of the Audi TT, they remained in production for over a decade. Topics covered include: Full history of the 916 series GTV and Spider models; Design, development and evolution of the models from 1994-2005; Participation of the GTV in motorsport; Model variations in depth through all three facelifts; Previously unpublished production figures and chassis numbers for the desirable limited edition GTV Cup model. A comprehensively researched guide to the entire lifespan of the 916 series. Will appeal to Alfa Romeo and automotive enthusiasts. The history and design process are examined along with an in-depth guide to each of the model variants produced. The cars' current position in the classic car market is considered. Superbly illustrated with 240 colour photographs. Robert Foskett is a life-long Italian car enthusiast with a special interest in Alfa Romeo.
