Transforming Global Information and Communication Markets Peter F. Cowhey,Jonathan D. Aronson,2012-01-13 Innovation in information and communication technology ICT fuels the growth of the global economy How ICT markets evolve depends on politics and policy and since the 1950s periodic overhauls of ICT policy have transformed competition and innovation For example in the 1980s and the 1990s a revolution in communication policy the introduction of sweeping competition also transformed the information market Today the diffusion of Internet wireless and broadband technology growing modularity in the design of technologies distributed computing infrastructures and rapidly changing business models signal another shift This pathbreaking examination of ICT from a political economy perspective argues that continued rapid innovation and economic growth require new approaches in global governance that will reconcile diverse interests and enable competition to flourish The authors two of whom were architects of international ICT policy reforms in the 1990s discuss this crucial turning point in both theoretical and practical terms
