International Law in the New Age of Globalization May 19 2021 This collection brings together a series of essays which address some of the challenges that globalization poses to the international legal order. The book examines the interaction of globalization and international law through four sub-themes: the adaptation of classical international legal tools to regulate and adjudicate community interests and conflicts in the era of globalization; coordinating dialogues and governance strategies within and between international legal systems and institutions; globalization and the diversification of actors; and the exposure of State sovereignty to private actors and the need to preserve the regulatory powers of States. The volume will be of interest to international law scholars, practitioners and students, as well as to those working in the fields of international relations and globalization.

The Embedded Firm Dec 06 2022 The globalization of capital markets since the 1980s has been accompanied by a vigorous debate over the convergence of corporate governance standards around the world towards the shareholder model. But even before the financial and economic crisis of 2008/2009, the dominance of the shareholder model was challenged with regard to persisting divergences and national differences in corporate law, labor law and industrial relations. This collection explores this debate at an important crossroads, echoing Karl Polanyi's famous observation in 1944 of the disembeddedness of the market from society. Drawing on pertinent insights from scholars, practitioners and regulators in corporate and labor law, securities regulation as well as economic sociology and management theory, the contributions shed important light on the empirical effects on the economy of the shift to shareholder primacy, in light of a comprehensive reconsideration of the global context, policy goals and regulatory forms which characterize market governance today.

Intelligent Robotics and Applications Sep 03 2022 This three volume set LNAI 9244, 9245, and 9246 constitutes the refereed proceedings of the 8th International Conference on Intelligent Robotics and Applications, ICIRA 2015, held in Portsmouth, UK, in August 2015. The 61 papers included in the second volume are organized in topical sections on man-machine interaction; robot design, development and control; navigation and planning; robot motion analysis and planning; medical robot; prototyping; and manufacturing.

In Black and White Jul 13 2023 In Black and White is probably the most honest autobiography ever published by a chess grandmaster. The Dutchman, born in 1956, covers his rise to the chess elite, his insecurities, and the difficulties he encountered. The highlight of his career was his qualification for the Candidates Matches, only four steps away from the World Championship. He won a game but lost the match against Gata Kamsky. The Dutch edition was published in 2011 and has reached cult status. It was very well received by fans and reviewers - and with the English translation will finally get a well-deserved wider audience.

OAuth 2.0 Cookbook May 23 2024 Efficiently integrate OAuth 2.0 to protect your mobile, desktop, Cloud applications and APIs using Spring Security technologies. About This Book Interact with public OAuth 2.0 protected APIs such as Facebook, LinkedIn and Google. Use Spring Security and Spring Security OAuth2 to implement your own OAuth 2.0 provider Learn how to implement OAuth 2.0 native mobile clients for Android applications Who This Book Is For This book targets software engineers and security experts who are looking to develop their skills in API security and OAuth 2.0. Prior programming knowledge and a basic understanding of developing web applications are necessary. As this book's recipes mostly use Spring Security and Spring Security OAuth2, some prior experience with Spring Framework will be helpful. What You Will Learn Use Redis and relational databases to store issued access tokens and refresh tokens Access resources protected by the OAuth2 Provider using Spring Security Implement a web application that dynamically registers itself to the Authorization Server Improve the safety of your mobile client using dynamic client registration Protect your Android client with Proof Key for Code Exchange Protect the Authorization Server from COMPUTERS / Cloud Computing redirection In Detail OAuth 2.0 is a standard protocol for authorization and focuses on client development simplicity while providing specific authorization flows for web applications, desktop applications, mobile phones, and so on. This book also provides useful recipes for solving real-life problems using Spring Security and creating Android applications. The book starts by presenting you how to interact with some public OAuth 2.0 protected APIs such as Facebook, LinkedIn and Google. You will also be able to implement your own OAuth 2.0 provider with Spring Security OAuth2. Next, the book will cover practical scenarios regarding some important OAuth 2.0 profiles such as Dynamic Client Registration, Token Introspection and how to revoke issued access tokens. You will then be introduced to the usage of JWT, OpenID Connect, and how to safely implement native mobile OAuth 2.0 Clients. By the end of this book, you will be able to ensure that both the server and client are protected against common vulnerabilities. Style and approach With the help of real-world examples, this book provides step by step recipes for troubleshooting and extending your API security. The book also helps you with accessing and securing data on mobile, desktop, and cloud apps with OAuth 2.0.

Optimal Auxiliary Functions Method for Nonlinear Dynamical Systems Apr 17 2021 This book presents the optimal auxiliary functions method and applies it to various engineering problems and in particular in boundary layer problems. The cornerstone of the presented procedure is the concept of "optimal auxiliary functions" which are needed to obtain accurate results in an efficient way. Unlike other known analytic approaches, this procedure provides us with a simple but rigorous way to control and adjust the convergence of the solutions of

nonlinear dynamical systems. The optimal auxiliary functions are depending on some convergence-control parameters whose optimal values are rigorously determined from mathematical point of view. The capital strength of our procedure is its fast convergence, since after only one iteration, we obtain very accurate analytical solutions which are very easy to be verified. Moreover, no simplifying hypothesis or assumptions are made. The book contains a large amount of practical models from various fields of engineering such as classical and fluid mechanics, thermodynamics, nonlinear oscillations, electrical machines, and many more. The book is a continuation of our previous books "Nonlinear Dynamical Systems in Engineering. Some Approximate Approaches", Springer-2011 and "The Optimal Homotopy Asymptotic Method. Engineering Applications", Springer-2015.

Korchnoi: Move by Move Sep 22 2021 Viktor Korchnoi is a chess legend. In a career which has spanned over 60 years, he won countless grandmaster tournaments, was a four-time Soviet Champion, a multi-time World Championship Candidate, and twice fought for the World Championship in famous battles with his adversary Anatoly Karpov. Throughout his career Korchnoi continually refined his style and he was as comfortable in defence as he was in attack. He was happy to provoke opponents, accept sacrifices, defend precisely and then ruthlessly exploit weaknesses. In this book, former American Open Champion Cyrus Lakdawala studies his favourite Korchnoi games and examines Korchnoi's skills in the key areas of attack and defence, initiative, exploiting imbalances, accumulating advantages and endgame play. He demonstrates clearly how we can all improve by learning from Korchnoi's play. Move by Move provides an ideal platform to study chess. By continually challenging the reader to answer probing questions throughout the book, the Move by Move format greatly encourages the learning and practising of vital skills just as much as the traditional assimilation of knowledge. Carefully selected questions and answers are designed to keep you actively involved and allow you to monitor your progress as you learn. This is an excellent way to improve your chess skills and knowledge.

Communications and Cryptography Jan 19 2024 Information theory is an exceptional field in many ways. Technically, it is one of the rare fields in which mathematical results and insights have led directly to significant engineering payoffs. Professionally, it is a field that has sustained a remarkable degree of community, collegiality and high standards. James L. Massey, whose work in the field is honored here, embodies the highest standards of the profession in his own career. The book covers the latest work on: block coding, convolutional coding, cryptography, and information theory. The 44 contributions represent a cross-section of the world's leading scholars, scientists and researchers in information theory and communication. The book is rounded off with an index and a bibliography of publications by James Massey.

Inside Cyber Warfare Aug 14 2023 Inside Cyber Warfare provides fascinating and disturbing details on how nations, groups, and individuals throughout the world use the Internet as an attack platform to gain military, political, and economic advantages over their adversaries. You'll discover how sophisticated hackers working on behalf of states or organized crime patiently play a high-stakes game that could target anyone, regardless of affiliation or nationality. The second edition goes beyond the headlines of attention-grabbing DDoS attacks and takes a deep look inside recent cyber-conflicts, including the use of Stuxnet. It also includes a Forward by Michael Chertoff (former Secretary of Homeland Security) and several guest essays, including one by Melissa Hathaway, former senior advisor to the Director of National Intelligence and Cyber Coordination Executive. Get an in-depth look at hot topics including: The role of social networks in fomenting revolution in the Middle East and Northern Africa The Kremlin's strategy to invest heavily in social networks (including Facebook) and how it benefits the Russian government How the U.S. Cyber Command and equivalent commands are being stood up in other countries The rise of Anonymous with analysis of its anti-structure and operational style or tempo Stuxnet and its predecessors, and what they reveal about the inherent weaknesses in critical infrastructure The Intellectual Property (IP) war, and how it has become the primary focus of state-sponsored cyber operations

World Champion Chess for Juniors May 11 2023 Grandmaster Joel Benjamin introduces all seventeen World Chess Champions and shows what is important about their style of play and what you can learn from them. He describes both their historical significance and how they inspired his own development as a player. Benjamin presents the most instructive games of each champion. Magic names such as Kasparov, Capablanca, Alekhine, Botvinnik, Tal, and Karpov, they're all there, up to current World Champion Magnus Carlsen. How do they open the game? How do they develop their pieces? How do they conduct an attack or defend when necessary? Benjamin explains, in words rather than in chess symbols, what is important for your own improvement. Two Americans are included in this highly instructive manual, accessible to every post-beginner. Of course the crystal-clear style of Bobby Fischer, the 11th World Champion, guarantees some very memorable lessons. Additionally, Benjamin has included Paul Morphy. The 19th century chess wizard from New Orleans never held an official title, but was clearly the best of the world during his short but dazzling career. Studying World Champion Chess for Juniors will prove an extremely rewarding experience for ambitious youngsters. Trainers and coaches will find it worthwhile to include the book in their curriculum. The author provides many suggestions for further study.

Geothermal Heating Jul 01 2022 To date all books on geothermics have emphasized its use for generating electricity, with applications of lower grade resources for direct heating meriting only a brief chapter. This book brings together research from a range of scientific journals and 'grey' literature to produce the first comprehensive text on geothermal heating. Economics form an important part of the book. It provides a step by step analysis of the various ways in which thermal waters can be used to provide space heating and of the advantages and disadvantages of different approaches. The final section of the book provides case studies of 31 geothermal heating schemes in France, USA and Iceland.

Chess Coach Jun 19 2021 A LIFE DEDICATED TO CHESS AND ITS PLAYERS This remarkable book is a tribute to a man who is probably the greatest chess coach of all time. Mark Dvoretsky was a fascinating, intelligent, honest, decent, hard-working and good-natured

man who dedicated his life to chess and its players. When Dvoretsky started coaching after a fairly successful career as a player, he became a kind of doctor who could quickly spot what his students needed help with. He made them better chess players but also better people. In this book, not only his most famous students Artur Yusupov and Sergey Dolmatov explain what made Dvoretsky so special, but also former World Champions such as Garry Kasparov, Vishy Anand, Veselin Topalov and Magnus Carlsen, and many others. In addition to a wealth of delightful and often touching stories, Chess Coach contains 39 of Dvoretsky's games, which show what a strong player he was. They have been analysed by Dvoretsky himself and by many of his former students. Several interviews and articles complete this colourful compilation. One of Dvoretsky's own most famous books was called For Friends and Colleagues – as Garry Kasparov writes in his extensive foreword, this book is a worthy reply 'From Friends and Colleagues'.

Unrelenting Innovation Apr 29 2022 The hands-on guide for fostering relentless innovation within your company Gerard Tellis, a noted expert on innovation, advertising, and global markets, makes the compelling case that the culture of a firm is the crucial driver of an organization's innovativeness. In this groundbreaking book he describes the three traits and three practices necessary to create a culture of relentless innovation. Organizations must be willing to cannibalize successful products, embrace risk, and focus on the future. Organizations build these traits by providing incentives for enterprise, empowering product champions, and encouraging internal markets. Spelling out the critical role of culture, the author provides illustrative examples of organizations with winning cultures and explores the theory and evidence for each of the six components of culture. The book concludes with a discussion of why culture is superior to alternate theories for fostering innovation. Offers a groundbreaking take on innovation that is driven by a company's culture Shows what it takes to create a culture of innovation within any organization Based on a study of 770 companies across 15 countries, the origin of 90 radical innovations spanning over 100 years, and the evolution of 66 markets spanning over a 100 years Provides numerous mini cases to illustrate the workings of culture Written by Gerard Tellis director of the Center for Global Innovation This must-have resource clearly shows the role of culture in driving relentless innovation and how to foster it within any organization.

The Greatest Attacker in Chess Sep 15 2023 Rashid Nezhmetdinov (1912-1974) played fearless attacking chess. With his dazzling style, the Soviet master already was a legend during his lifetime, but international fame largely eluded him. Only once did he get permission to show his exceptional talent in a tournament abroad. Five times Nezhmetdinov was chess champion of the Russian Federation. In the 1961 Soviet Championship, he won the 'Best Game' prize for a spectacular win against... Mikhail Tal who praised his opponent for his 'amazing creativity.' Other stars that 'Nezh' defeated in grand style included Spassky, Polugaevsky, Bronstein, and Geller. His games, full of tactical pyrotechnics, are his legacy and have reached an ever-growing audience. Nezhmetdinov's shocking strategic queen sacrifice, in 1962 against Chernikov, as shown on Agadmator's YouTube channel, has become the best-watched chess video of all time with millions of views. In this book, Cyrus Lakdawala pays tribute to the genius of the enigmatic Nezhmetdinov, a Tatar who grew up as an orphan in the part of the Soviet Union that is now Kazakhstan. In more than one hundred impressive and instructive games and positions, Lakdawala shows how Nezhmetdinov fought for the initiative, how he bluffed and sacrificed, and how he kept his cool to out-calculate his opponents. Lakdawala's lucid writing perfectly matches the power of 'Nezh's' moves. This wonderful collection celebrates Nezhmetdinov as the Greatest Attacker in Chess.

Smart Working Jan 07 2023 It is more possible than ever to influence and shape our working environments, our experience of work and each other. Business leaders who set the conditions and create engaging, meaningful work through organisational design and use of the knowledge and creative potential of their workforces are engaging in smart working. In *Smart Working: Creating the Next Wave*, Anne Marie McEwan explains how smart working is more than just flexible and mobile working. It is about flexibility and autonomy - how people work, not just where and when. She argues that systems, working environments and governance are more likely to lead to effective performance if they maximise self-determination and choice. She describes how collaborative communication technologies create possibilities for stimulating and harnessing collective intelligence, within and beyond organisational boundaries. In short, smart working is an outcome of designing organisational systems that are good both for business and people. McEwan warns that the tendency to talk about new management paradigms risks overlooking insights derived from years of academic research, and particularly from lessons learned from process innovation methodology. This rigorously researched but intensely practical book examines current workplace trends relating to people, technology, place and space. It reviews what we already know about effective management and high performance work methods and shows how those insights can be used to advantage in contemporary workspaces. It will help those with responsibilities for the strategic direction of their organizations. Learning and development and HR professionals will understand how to interpret these insights for their own business.

The Trillion Dollar Revolution Jan 27 2022 Ten years after the landmark legislation, Ezekiel Emanuel leads a crowd of experts, policy-makers, doctors, and scholars as they evaluate the Affordable Care Act's history so far. In March 2010, the Affordable Care Act officially became one of the seminal laws determining American health care. From day one, the law was challenged in court, making it to the Supreme Court four separate times. It transformed the way a three-trillion-dollar sector of the economy behaved and brought insurance to millions of people. It spawned the Tea Party, further polarized American politics, and affected the electoral fortunes of both parties. Ten years after the bill's passage, a constellation of experts--insiders and academics for and against the ACA--describe the momentousness of the legislation. Encompassing Democrats and Republicans, along with legal, financial, and health policy experts, the essays here offer a fascinating and revealing insight into the political fight of a generation, its consequences for health care, politics, law, the economy--and the future.

In the Zone Oct 24 2021 A winning streak in chess, says Cyrus Lakdawala, is a lot more than just the sum of its games. In this book he examines what it means when everything clicks, when champions become unstoppable and demolish opponents. What does it mean to be 'in the zone'? What causes these sweeps, what sparks them and what keeps them going? And why did they come to an end? Lakdawala takes you on a trip through chess history looking at peak performances of some of the greatest players who ever lived: Morphy, Steinitz, Pillsbury, Lasker, Capablanca, Alekhine, Botvinnik, Fischer, Tal, Kasparov, Karpov, Caruana and Carlsen. They all had very different playing styles, yet at a certain point in their rich careers they all entered the zone and simply wiped out the best players in the world. In the Zone explains the games of the greatest players during their greatest triumphs. As you study and enjoy these immortal performances you will improve your ability to overpower your opponents. You will understand how great moves originate and you will be inspired to become more productive and creative. In the Zone may bring you closer to that special place yourself: the zone.

Indoctrination U Dec 26 2021 In 2003, David Horowitz began a campaign to promote intellectual diversity and a return to academic standards in American universities. To achieve these goals he devised an Academic Bill of Rights and created a national student movement with chapters on 160 college campuses. *Take No Prisoners* is a riveting account of the reaction to Horowitz's campaign by professor unions and academic associations, whose leaderships have been taken over by the political left.

The Liberated Bishop Defence Aug 22 2021 In many 1.d4 openings, Black has trouble getting his bishop on c8 into play. Former Russian Chess Champion Alexey Bezgodov presents a radical solution to this nagging problem; liberate your bishop right away and put it on f5 on the second move! Play 2...Bf5! against either 2.c4 or 2.Nf3 will surprise your opponent and is also a great way to support your development, because the bishop takes control of the important square e4. If White does not immediately take decisive action, then within a move or two he can relinquish any hopes on an opening advantage. Alexey Bezgodov has found some great antidotes to White's most dangerous reactions in sharp and attractive lines. To test your understanding of his system he has included more than 100 exercises. After studying the fresh ideas and the clear explanations presented in *The Liberated Bishop Defence* chess players of almost every strength will enjoy the flexibility of a surprising, effective and universal weapon against 1.d4.

100 Endgames You Must Know Feb 08 2023 There are, contrary to what most amateurs believe, relatively few chess endgames one must know. Jesus de la Villa, an international grandmaster and former champion of Spain, presents the endgames that show up most frequently in practice, are easy to learn and contain ideas and concepts that are useful in more difficult positions. He brings you simple rules, guiding ideas at the beginning of each chapter, detailed and lively explanations, many diagrams, clear summaries of the most important themes, recommended exercises that will help you understand the material, and tests, divided in two parts: basic and final. The main thing De la Villa asks of you is to always understand WHY you play a move.

The King's Gambit Nov 24 2021 The King's Gambit is the most daring and dangerous opening. White throws caution to the wind, and Black must know what he is doing to avoid early defeat. The King's Gambit was all the rage in the 19th century, but has an enduring popularity throughout the chess world. Remarkably, it is once more the focus of the top grandmaster attention, for example when Nigel Short played it three times in a row against the world's best at the Madrid 1997 tournament.

Modes of Bio-Bordering Apr 10 2023 This open access book explores how biometric data is increasingly flowing across borders in order to limit, control and contain the mobility of selected people, namely criminalized populations. It introduces the concept of bio-bordering, using it to capture reverse patterns of bordering and ordering practices linked to transnational biometric data exchange regimes. The concept is useful to reconstruct how the territorial foundations of national state autonomy are partially reclaimed and, at the same time, partially purposefully suspended. The book focuses on the Prüm system, which facilitates the mandatory exchange of forensic DNA data amongst EU Member States. The Prüm system is an underexplored phenomenon, representing diverse instances of bio-bordering and providing a complex picture of the hidden (dis)integration of Europe. Particular legal, scientific, technical and political dimensions related to the governance and uses of biometric technologies in Germany, the Netherlands, Poland, Portugal and the United Kingdom are specifically explored to demonstrate both similar and distinct patterns.

The Economy of Tourism in Bangladesh Mar 29 2022 Bangladesh is a land of great natural beauty, with a rich culture. Its tourism industry is one of its greatest motivators for social and economic development - but it does not always climb to the heights of success that one might expect. This book is one of the first to explore tourism in Bangladesh in scholarly detail, examining driving factors behind the growth of the industry, as well as challenges it needs to overcome. It provides recommendations for policy makers, as well as a rich tapestry of scholarly work for researchers interested in Bangladesh, tourism management, and the study of developing economies.
