

Download Ebook Chapter 26 Origins Of The Cold War Answers Read Pdf Free

Life in the Cold Jun 08 2022 A third edition of a classic work on cold climate ecosystems, updated with a new chapter on mammals and birds.

In from the Cold Dec 15 2022 Over the last decade, studies of the Cold War have mushroomed globally. Unfortunately, work on Latin America has not been well represented in either theoretical or empirical discussions of the broader conflict. With some notable exceptions, studies have proceeded in rather conventional channels, focusing on U.S. policy objectives and high-profile leaders (Fidel Castro) and events (the Cuban Missile Crisis) and drawing largely on U.S. government sources. Moreover, only rarely have U.S. foreign relations scholars engaged productively with Latin American historians who analyze how the international conflict transformed the region's political, social, and cultural life. Representing a collaboration among eleven North American, Latin American, and European historians, anthropologists, and political scientists, this volume attempts to facilitate such a cross-fertilization. In the process, *In From the Cold* shifts the focus of attention away from the bipolar conflict, the preoccupation of much of the so-called "new Cold War history," in order to showcase research, discussion, and an array of new archival and oral sources centering on the grassroots, where conflicts actually brewed. The collection's contributors examine international and everyday contests over political power and cultural representation, focusing on communities and groups above and underground, on state houses and diplomatic board rooms manned by Latin American and international governing elites, on the relations among states regionally, and, less frequently, on the dynamics between the two great superpowers themselves. In addition to charting new directions for research on the Latin American Cold War, *In From the Cold* seeks to contribute more generally to an understanding of the conflict in the global south. Contributors. Ariel C. Armony, Steven J. Bachelor, Thomas S. Blanton, Seth Fein, Piero Gleijeses, Gilbert M. Joseph, Victoria Langland, Carlota McAllister, Stephen Pitti, Daniela Spenser, Eric Zolov

Cuba, Hot and Cold Oct 13 2022 "A collection of renowned travel writer Tom Miller's best musings on the history and culture of Cuba"--Provided by publisher.

The Culture of the Cold War Jun 20 2023 The author examines the culture of the United States in the post- World War II era with its air raid drills, spy trials, anti-Communist activity, and TV quiz show scandals.

The Right to Be Cold Feb 14 2023 A "courageous and revelatory memoir" (Naomi Klein) chronicling the life of the leading Indigenous climate change, cultural, and human rights advocate For the first ten years of her life, Sheila Watt-Cloutier traveled only by dog team. Today there are more snow machines than dogs in her native Nunavik, a region that is part of the homeland of the Inuit in Canada. In Inuktitut, the language of Inuit, the elders say that the weather is Uggianaqtuq—behaving in strange and unexpected ways. *The Right to Be Cold* is Watt-Cloutier's memoir of growing up in the Arctic reaches of Quebec during these unsettling times. It is the story of an Inuk woman finding her place in the world, only to find her native land giving way to the inexorable warming of the planet. She decides to take a stand against its destruction. *The Right to Be Cold* is the human story of life on the front lines of climate change, told by a woman who rose from humble beginnings to become one of the most influential Indigenous environmental, cultural, and human rights advocates in the world. Raised by a single mother and grandmother in the small community of Kuujuaq, Quebec, Watt-Cloutier describes life in the traditional ice-based hunting culture of an Inuit community and reveals how Indigenous life, human rights, and the threat of climate change are inextricably linked. Colonialism intervened in this world and in her life in often violent ways, and she traces her path from Nunavik to Nova Scotia (where she was sent at the age of

ten to live with a family that was not her own); to a residential school in Churchill, Manitoba; and back to her hometown to work as an interpreter and student counselor. *The Right to Be Cold* is at once the intimate coming-of-age story of a remarkable woman, a deeply informed look at the life and culture of an Indigenous community reeling from a colonial history and now threatened by climate change, and a stirring account of an activist's powerful efforts to safeguard Inuit culture, the Arctic, and the planet.

Surviving Cold Weather Apr 30 2024 How to dress for winter; how to create a campsite and what to use as shelter; how to keep warm How to signal for help with aerial flares, smoke, mirrors, and whistles; finding and purifying water; finding and preparing food; protecting yourself and your supplies from wildlife How to use a map and compass; how to travel on snow and ice with snowshoes, skis, and crampons; how to avoid and deal with avalanches The first in Greg Davenport's Books for the Wilderness series, *Surviving Cold Weather* covers the techniques and equipment necessary for surviving in ice and snow. Photos and drawings illustrate gear and techniques. The book covers the five survival essentials--personal protection, signaling, sustenance, navigation, and health--as they relate to the cold. Upcoming books in the series are *Surviving Open and Coastal Waters*, *Surviving the Desert*, and *Surviving the Jungle*.

Shadow Cold War Aug 30 2021 The conflict between the United States and the Soviet Union during the Cold War has long been understood in a global context, but Jeremy Friedman's *Shadow Cold War* delves deeper into the era to examine the competition between the Soviet Union and the People's Republic of China for the leadership of the world revolution. When a world of newly independent states emerged from decolonization desperately poor and politically disorganized, Moscow and Beijing turned their focus to attracting these new entities, setting the stage for Sino-Soviet competition. Based on archival research from ten countries, including new materials from Russia and China, many no longer accessible to researchers, this book examines how China sought to mobilize Asia, Africa, and Latin America to seize the revolutionary mantle from the Soviet Union. The Soviet Union adapted to win it back, transforming the nature of socialist revolution in the process. This groundbreaking book is the first to explore the significance of this second Cold War that China and the Soviet Union fought in the shadow of the capitalist-communist clash.

The Dog Who Came in from the Cold Jan 21 2021 **CORDUROY MANSIONS - Book 2** In the Corduroy Mansions series of novels, set in London's hip Pimlico neighborhood, we meet a cast of charming eccentrics, including perhaps the world's most clever terrier, who make their home in a handsome, though slightly dilapidated, apartment block. The heartwarming and hilarious new installment in the Corduroy Mansions series presents the further adventures of Alexander McCall Smith's newest beloved character: the Pimlico terrier Freddie de la Hay. In the elegantly crumbling mansion block in Pimlico called Corduroy Mansions, the comings and goings of the wonderfully motley crew of residents continue apace. A pair of New Age operators has determined that Terence Moongrove's estate is the cosmologically correct place for their center for cosmological studies. Literary agent Barbara Ragg has decided to represent Autobiography of a Yeti, purportedly dictated to the author by the Abominable Snowman himself. And our small, furry, endlessly surprising canine hero Freddie de la Hay—belonging to failed oenophile William French—has been recruited by MI6 to infiltrate a Russian spy ring. Needless to say, the other denizens of Corduroy Mansions have issues of their own. But all of them will be addressed with the wit and insight into the foibles of the human condition that have become the hallmark of this peerless storyteller.

The Cold! Feb 02 2022 It is the year 2026, during a period dominated by the politics and corruption of a worldwide socialism movement and manmade global warming. In his first eighteen months in office, the new president of the United States has seemingly guided his country in a positive direction. For the first time in decades, it seems everyone is happy—until a lone army officer makes a phone call that changes everything. Army colonel Bill Crichton has just realized he and his fellow climate researchers have been deceived for the better part of thirty years. After he communicates his fears to his superiors that a natural catastrophe is about to strike the planet, Crichton and his small yet dedicated cadre find themselves in the crosshairs of armed international mercenaries led

by powerful people with ties to the White House. Now as Crichton and the female leader of a secret underground facility are unwittingly propelled into a dangerous situation, they must not only attempt to stay alive amid a murderous global conspiracy, but also save the human race from the next ice age.

The Cold War Jul 22 2023 The definitive history of the Cold War and its impact around the world We tend to think of the Cold War as a bounded conflict: a clash of two superpowers, the United States and the Soviet Union, born out of the ashes of World War II and coming to a dramatic end with the collapse of the Soviet Union. But in this major new work, Bancroft Prize-winning scholar Odd Arne Westad argues that the Cold War must be understood as a global ideological confrontation, with early roots in the Industrial Revolution and ongoing repercussions around the world. In *The Cold War*, Westad offers a new perspective on a century when great power rivalry and ideological battle transformed every corner of our globe. From Soweto to Hollywood, Hanoi, and Hamburg, young men and women felt they were fighting for the future of the world. The Cold War may have begun on the perimeters of Europe, but it had its deepest reverberations in Asia, Africa, and the Middle East, where nearly every community had to choose sides. And these choices continue to define economies and regimes across the world. Today, many regions are plagued with environmental threats, social divides, and ethnic conflicts that stem from this era. Its ideologies influence China, Russia, and the United States; Iraq and Afghanistan have been destroyed by the faith in purely military solutions that emerged from the Cold War. Stunning in its breadth and revelatory in its perspective, this book expands our understanding of the Cold War both geographically and chronologically, and offers an engaging new history of how today's world was created.

In the Shadow of the Cold War Dec 03 2021 Examines American engagement with the world from the fall of Soviet communism through the opening years of the Trump administration.

Take the Cold Out of Cold Calling May 20 2023 Presents advice on using Internet searching to perform successful telephone sales.

Cold Apr 06 2022 There are only few human beings who can adapt, survive and thrive in the coldest regions on earth. And below a certain temperature, death is inevitable. Sir Ranulph Fiennes has spent much of his life exploring and working in conditions of extreme cold. The loss of many of his fingers to frostbite is a testament to the horrors man is exposed to at such perilous temperatures. With the many adventures he has led over the past 40 years, testing his limits of endurance to the maximum, he deservedly holds the title of 'the world's greatest explorer'. Despite our technological advances, the Arctic, the Antarctic and the highest mountains on earth, remain some of the most dangerous and unexplored areas of the world. This remarkable book reveals the chequered history of man's attempts to discover and understand these remote areas of the planet, from the early voyages of discovery of Cook, Ross, Weddell, Amundsen, Shackleton and Franklin to Sir Ranulph's own extraordinary feats; from his adventuring apprenticeship on the Greenland Ice Cap, to masterminding over the past five years the first crossing of the Antarctic during winter, where temperatures regularly plummeted to minus 92°C. Both historically questioning and intensely personal, *Cold* is a celebration of a life dedicated to researching and exploring some of the most hostile and brutally cold places on earth.

Life in the Cold Mar 30 2024 A third edition of a classic work on cold climate ecosystems, updated with a new chapter on mammals and birds.

Out of the Cold May 27 2021 Featuring first hand accounts by international politicians and diplomats along with analyses by leading scholars, this unique collection of essays provides insights from multiple perspectives to foster better understanding of international relations during and after the Cold War. Experts from both sides of the "iron curtain" shed light on the origins, struggles, ending, and legacy of the conflict that dominated the second half of the twentieth century and that still affects current East-West relations, the securing and dismantling of weapons of mass destruction, and the instability of many regions. With a particular focus on diplomatic relations, the book looks at the origins of the conflict from Yalta to Korea, the prelude to Détente from Cuba to Vietnam, followed by the move from Détente to dialogue. It then addresses such issues as strategic

weapons, the impact of the war on scientific research, intelligence, and the fall of the Berlin Wall. Lastly, it examines the legacy of the Cold War across regions of the world, including Europe, Japan, India, China, and the lessons to be drawn for today's diplomatic relations and intelligence. With contributions from Howard Baker, Jr., Sir Anthony Brenton, Susan Eisenhower, Grigory Karasin, Alexander Likhotal, Kishan Rana, Ying Rong, and more, the volume presents a truly international treatment of a subject of global dimensions and importance. Students of politics and international relations will find it invaluable as will Foreign Service practitioners, and instructors teaching the Cold War and foreign affairs.

Common Cold Nov 25 2023 The common cold is unlike any other human disease because of two factors: firstly, it is arguably the most common human disease and, secondly, it is one of the most complex diseases because of the number of viruses that cause the familiar syndrome of sneezing, sore throat, runny nose and nasal congestion. These two factors have made a 'cure' for the common cold one of the most difficult scientific and clinical endeavours (a topic often discussed in the popular media, where comparisons are made with the ease of putting a man on the moon). The present book brings together a wide range of experts from epidemiologists to virologists and pharmacologists to look at recent advances in our knowledge of the common cold. In some respects the book is unique, as it focuses on the common cold, a syndrome so familiar to the layperson but one that receives little attention from the scientist and clinician. The common cold can be viewed from many different aspects as illustrated in Figure 1. The core knowledge for understanding the common cold must first come from virology and this is discussed in several chapters of the book. There have been major advances in this field because of the use of new methods of detecting viruses such as polymerase chain reaction techniques that have greatly aided our understanding of the epidemiology of viruses associated with common cold.

The Russian Cold Sep 23 2023 Cold has long been a fixture of Russian identity both within and beyond the borders of Russia and the Soviet Union, even as the ongoing effects of climate change complicate its meaning and cultural salience. The Russian Cold assembles fascinating new contributions from a variety of scholarly traditions, offering new perspectives on how to understand this mainstay of Russian culture and history. In chapters encompassing such diverse topics as polar exploration, the Eastern Front in World War II, and the iconography of hockey, it explores the multiplicity and ambiguity of "cold" in the Russian context and demonstrates the value of environmental-historical research for enriching national and imperial histories.

Don't Let In the Cold Dec 27 2023 A claustrophobic, high-stakes thriller that will have you fearing what waits out in the cold. It was supposed to be just one night in the cabin: one night for Lottie and her brand new stepsister, Jade, to try to get along. When a solar flare causes a massive blackout—no power or cell signal—Lottie knows they've got a long night ahead of them. Then, in the dark, someone else shows up at the cabin—a stranger named Alex, claiming to be lost and needing shelter from the coming snowstorm. But later that night, Lottie spies him in the driveway talking to two mysterious men in a pickup truck, and she's sure he's lying about why he's here. Before Lottie can find out more, a fire forces her, Jade, and Alex out into the blizzard, where they must rely on one another to get to safety—wherever that is. In the remote, freezing Tahoe wilderness, they have to survive more than just the elements. Soon it becomes clear that Alex's accomplices are hunting for all three of them, in a scheme that's gone too far and taken a chilling, deadly turn. Perfect for readers who love: Mysteries for teens Snowy, atmospheric thrillers Fans of Natasha Preston, Natalie Richards, and Karen McManus

Cold Sep 11 2022 From avalanches to glaciers, from seals to snowflakes, and from Shackleton's expedition to *The Year Without Summer*, Bill Streever journeys through history, myth, geography, and ecology in a year-long search for cold -- real, icy, 40-below cold. In July he finds it while taking a dip in a 35-degree Arctic swimming hole; in September while excavating our planet's ancient and not so ancient ice ages; and in October while exploring hibernation habits in animals, from humans to wood frogs to bears. A scientist whose passion for cold runs red hot, Streever is a wondrous guide: he conjures woolly mammoth carcasses and the ice-age Clovis tribe from melting glaciers, and he

evokes blizzards so wild readers may freeze -- limb by vicarious limb.

The Cambridge History of the Cold War Apr 26 2021 This volume examines the origins and early years of the Cold War in the first comprehensive historical reexamination of the period. A team of leading scholars shows how the conflict evolved from the geopolitical, ideological, economic and sociopolitical environments of the two world wars and interwar period.

The Cold Jan 28 2024 Seth is one of the few passengers to survive the train crash. Now he and his fellow survivors face a new world of snow, ice and freezing fog, where they will be hunted like prey in the ruins of Great Britain.

The Cold Song Nov 13 2022 Named in the New York Times Book Review's 100 Notable Books of 2014! Ullmann's characters are complex and paradoxical: neither fully guilty nor fully innocent Siri Brodal, a chef and restaurant owner, is married to Jon Dreyer, a famous novelist plagued by writer's block. Siri and Jon have two daughters, and together they spend their summers on the coast of Norway, in a mansion belonging to Jenny Brodal, Siri's stylish and unforgiving mother. Siri and Jon's marriage is loving but difficult, and troubled by painful secrets. They have a strained relationship with their elder daughter, Alma, who struggles to find her place in the family constellation. When Milla is hired as a nanny to allow Siri to work her long hours at the restaurant and Jon to supposedly meet the deadline on his book, life in the idyllic summer community takes a dire turn. One rainy July night, Milla disappears without a trace. After her remains are discovered and a suspect is identified, everyone who had any connection with her feels implicated in her tragedy and haunted by what they could have done to prevent it. *The Cold Song* is a story about telling stories and about how life is continually invented and reinvented.

The Boy Who Came in from the Cold May 08 2022 Todd Burton has had enough of small-town Buckman. His abusive stepfather calls him a fag; his friend Austin makes him realize he may be gay, but Todd doesn't want to admit his stepfather is right; and he dreams of being a chef. Three good reasons to flee his hometown and pursue greener pastures. But when Todd reaches the big city, his luck runs dry. Soon he can't pay his rent and gets evicted. In the middle of a snowstorm. Gabe Richards is a wealthy businessman with enough wounds of his own to make him afraid of ever being intimate again. But when he sees Todd outside his building, freezing to death, he takes pity on him and takes him in from the cold. To their mutual surprise, Todd and Gabe find themselves drawn to each other. "One night" turns into a week. Maybe letting a man in from the cold can melt the ice around Gabe's heart-and maybe getting evicted will turn Todd's luck around.

The Cold Vanish Jul 10 2022 Perfect for readers of Jon Krakauer and Douglas Preston, this "authentic and encyclopedic" book examines real-life cases of those who vanish in the wilderness without a trace (Roman Dial)—and those eccentric, determined characters who try to find them. These are the stories that defy conventional logic. The proverbial vanished without a trace incidences, which happen a lot more (and a lot closer to your backyard) than almost anyone thinks. These are the missing whose situations are the hardest on loved ones left behind. The cases that are an embarrassment for park superintendents, rangers and law enforcement charged with Search & Rescue. The ones that baffle the volunteers who comb the mountains, woods and badlands. The stories that should give you pause every time you venture outdoors. Through Jacob Gray's disappearance in Olympic National Park, and his father Randy Gray who left his life to search for him, we will learn about what happens when someone goes missing. Braided around the core will be the stories of the characters who fill the vacuum created by a vanished human being. We'll meet eccentric bloodhound-handler Duff and R.C., his flagship purebred, who began trailing with the family dog after his brother vanished in the San Gabriel Mountains. And there's Michael Neiger North America's foremost backcountry Search & Rescue expert and self-described "bushman" obsessed with missing persons. And top researcher of persons missing on public wildlands Ex-San Jose, California detective David Paulides who is also one of the world's foremost Bigfoot researchers. It's a tricky thing to write about missing persons because the story is the absence of someone. A void. The person at the heart of the story is thinner than a smoke ring, invisible as someone else's memory. The bones you dig up are most often metaphorical. While much of the book will embrace

memory and faulty memory—history—The Cold Vanish is at its core a story of now and tomorrow. Someone will vanish in the wild tomorrow. These are the people who will go looking.

Cold Mar 06 2022 Internationally acclaimed, *Cold* takes us deep into a harsh, frozen world, where love, greed, and the promise of a second chance compel six people toward a chilling and inevitable reckoning. In the frozen reaches of Michigan's Upper Peninsula, fierce winter storms hit without warning. The white opacity of one such blizzard allows Norman Haas to walk away from his prison work detail. Dangerously close to freezing to death, Norman is given shelter by Liesl Tiomenen, a middle-aged woman who lives in a house she and her late husband built in the woods. Armed with a rifle, she tries to turn him in, but when they set out on snowshoes, she suffers a fall, allowing him to flee again. Thus begins Norman's journey back to his past, back to the woman he loved who betrayed him, back to the brother who helped put him away, back to a dangerous web of family allegiances, deceptions, and intrigue. After finding Liesl injured and abandoned in the woods, Yellow Dog Township's sole full-time law enforcement officer Del Maki pursues Norman through a storm of mythic proportions.

The Cold War on the Periphery Jun 28 2021 Focusing on the two tumultuous decades framed by Indian independence in 1947 and the Indo-Pakistani war of 1965, *The Cold War on the Periphery* explores the evolution of American policy toward the subcontinent. McMahon analyzes the motivations behind America's pursuit of Pakistan and India as strategic Cold War prizes. He also examines the profound consequences—for U.S. regional and global foreign policy and for South Asian stability—of America's complex political, military, and economic commitments on the subcontinent. McMahon argues that the Pakistani-American alliance, consummated in 1954, was a monumental strategic blunder. Secured primarily to bolster the defense perimeter in the Middle East, the alliance increased Indo-Pakistani hostility, undermined regional stability, and led India to seek closer ties with the Soviet Union. Through his examination of the volatile region across four presidencies, McMahon reveals the American strategic vision to have been "surprisingly ill defined, inconsistent, and even contradictory" because of its exaggerated anxiety about the Soviet threat and America's failure to incorporate the interests and concerns of developing nations into foreign policy. *The Cold War on the Periphery* addresses fundamental questions about the global reach of postwar American foreign policy. Why, McMahon asks, did areas possessing few of the essential prerequisites of economic-military power become objects of intense concern for the United States? How did the national security interests of the United States become so expansive that they extended far beyond the industrial core nations of Western Europe and East Asia to embrace nations on the Third World periphery? And what combination of economic, political, and ideological variables best explain the motives that led the United States to seek friends and allies in virtually every corner of the planet? McMahon's lucid analysis of Indo-Pakistani-American relations powerfully reveals how U.S. policy was driven, as he puts it, "by a series of amorphous—and largely illusory—military, strategic, and psychological fears" about American vulnerability that not only wasted American resources but also plunged South Asia into the vortex of the Cold War.

A Cold Welcome Jan 04 2022 Cundill History Prize Finalist Longman-History Today Prize Finalist "Meticulous environmental-historical detective work." —Times Literary Supplement When Europeans first arrived in North America, they faced a cold new world. The average global temperature had dropped to lows unseen in millennia. The effects of this climactic upheaval were stark and unpredictable: blizzards and deep freezes, droughts and famines, winters in which everything froze, even the Rio Grande. *A Cold Welcome* tells the story of this crucial period, taking us from Europe's earliest expeditions in unfamiliar landscapes to the perilous first winters in Quebec and Jamestown. As we confront our own uncertain future, it offers a powerful reminder of the unexpected risks of an unpredictable climate. "A remarkable journey through the complex impacts of the Little Ice Age on Colonial North America...This beautifully written, important book leaves us in no doubt that we ignore the chronicle of past climate change at our peril. I found it hard to put down." —Brian Fagan, author of *The Little Ice Age* "Deeply researched and exciting...His fresh account of the climatic forces shaping the colonization of North America differs significantly from

long-standing interpretations of those early calamities.” —New York Review of Books

The Cold Millions Feb 22 2021 “One of the most captivating novels of the year.” - Washington Post NATIONAL BESTSELLER A Best Book of the Year: Bloomberg | Boston Globe | Chicago Public Library | Chicago Tribune | Esquire | Kirkus | New York Public Library | New York Times Book Review (Historical Fiction) | NPR's Fresh Air | O Magazine | Washington Post | Publishers Weekly | Seattle Times | USA Today A Library Reads Pick | An Indie Next Pick From the #1 New York Times bestselling author of Beautiful Ruins comes another “literary miracle” (NPR)—a propulsive, richly entertaining novel about two brothers swept up in the turbulent class warfare of the early twentieth century. An intimate story of brotherhood, love, sacrifice, and betrayal set against the panoramic backdrop of an early twentieth-century America that eerily echoes our own time, *The Cold Millions* offers a kaleidoscopic portrait of a nation grappling with the chasm between rich and poor, between harsh realities and simple dreams. The Dolans live by their wits, jumping freight trains and lining up for day work at crooked job agencies. While sixteen-year-old Rye yearns for a steady job and a home, his older brother, Gig, dreams of a better world, fighting alongside other union men for fair pay and decent treatment. Enter Ursula the Great, a vaudeville singer who performs with a live cougar and introduces the brothers to a far more dangerous creature: a mining magnate determined to keep his wealth and his hold on Ursula. Dubious of Gig’s idealism, Rye finds himself drawn to a fearless nineteen-year-old activist and feminist named Elizabeth Gurley Flynn. But a storm is coming, threatening to overwhelm them all, and Rye will be forced to decide where he stands. Is it enough to win the occasional battle, even if you cannot win the war? Featuring an unforgettable cast of cops and tramps, suffragists and socialists, madams and murderers, *The Cold Millions* is a tour de force from a “writer who has planted himself firmly in the first rank of American authors” (Boston Globe).

Out of the Cold Mar 18 2023

The Cold World They Made Aug 11 2022 Ron Robin looks at the original power couple of strategic studies who, during the most dangerous military standoff in history, gained access to the deepest corridors of power. The Wohlstetters’ legacy was kept alive by disciples in George W. Bush’s administration, and their signature brilliance and hubris continue to shape U.S. policy today.

The Cold War from the Margins Jul 30 2021 In *The Cold War from the Margins*, Theodora K. Dragostinova reappraises the global 1970s from the perspective of a small socialist state—Bulgaria—and its cultural engagements with the Balkans, the West, and the Third World. During this anxious decade, Bulgaria's communist leadership invested heavily in cultural diplomacy to bolster its legitimacy at home and promote its agendas abroad. Bulgarians traveled the world to open museum exhibitions, show films, perform music, and showcase the cultural heritage and future aspirations of their “ancient yet modern” country. As Dragostinova shows, these encounters transcended the Cold War's bloc mentality: Bulgaria's relations with Greece and Austria warmed, émigrés once considered enemies were embraced, and new cultural ties were forged with India, Mexico, and Nigeria. Pursuing contact with the West and solidarity with the Global South boosted Bulgaria's authoritarian regime by securing new allies and unifying its population. Complicating familiar narratives of both the 1970s and late socialism, *The Cold War from the Margins* places the history of socialism in an international context and recovers alternative models of global interconnectivity along East-South lines. Thanks to generous funding from The Ohio State University Libraries and its participation in TOME (Toward an Open Monograph Ecosystem), the ebook editions of this book are available as Open Access volumes from Cornell Open (cornellpress.cornell.edu/cornell-open) and other repositories.

Did Anything Good Come Out of the Cold War? Nov 01 2021 The Cold War was a conflict between the United States and the Soviet Union that partly manifested itself as a race to conquer space. The Soviet Union launched the first satellite into orbit in 1957, while twelve years later the United States put the first humans on the moon. Some of the many technological feats required for space travel trickled down into everyday life, such as satellite television, bar codes, and joysticks. This resource highlights innovations that arose from the Cold War, demonstrating how this long conflict helped shape today’s world in some positive ways.

Cold Enough for Snow Oct 01 2021 The inaugural winner of The Nobel Prize, an international biennial award established by Giramondo (Australia), Fitzcarraldo Editions (UK) and New Directions (USA). Cold Enough for Snow was unanimously chosen from over 1500 entries. A novel about the relationship between life and art, and between language and the inner world – how difficult it is to speak truly, to know and be known by another, and how much power and friction lies in the unsaid, especially between a mother and daughter. A young woman has arranged a holiday with her mother in Japan. They travel by train, visit galleries and churches chosen for their art and architecture, eat together in small cafés and restaurants and walk along the canals at night, on guard against the autumn rain and the prospect of snow. All the while, they talk, or seem to talk: about the weather, horoscopes, clothes and objects; about the mother's family in Hong Kong, and the daughter's own formative experiences. But uncertainties abound. How much is spoken between them, how much is thought but unspoken? Cold Enough for Snow is a reckoning and an elegy: with extraordinary skill, Au creates an enveloping atmosphere that expresses both the tenderness between mother and daughter, and the distance between them. 'So calm and clear and deep, I wished it would flow on forever.' — Helen Garner 'Rarely have I been so moved, reading a book: I love the quiet beauty of Cold Enough for Snow and how, within its calm simplicity, Jessica Au camouflages incredible power.' — Edouard Louis 'Au's prose is elegant and measured. In descriptions of bracing clarity she evokes 'shaking delicate impressions' of worlds within worlds that are symbolic of the parts of ourselves we keep hidden and those we choose to lay bare. Put simply, this novel is an intricate and multi-layered work of art — a complex and profound meditation on identity, familial bonds and our inability to fully understand ourselves, those we love and the world around us.' — Jacqui Davies, Books+Publishing

We All Lost the Cold War Jan 16 2023 Drawing on recently declassified documents and extensive interviews with Soviet and American policy-makers, among them several important figures speaking for public record for the first time, Ned Lebow and Janice Stein cast new light on the effect of nuclear threats in two of the tensest moments of the Cold War: the Cuban Missile Crisis of 1962 and the confrontations arising out of the Arab-Israeli war of 1973. They conclude that the strategy of deterrence prolonged rather than ended the conflict between the superpowers.

Life in the Cold Oct 25 2023 This book gives an up-to-date account of the current knowledge of cold adaptation in animals, including phenomena like hibernation, daily torpor, thermoregulation and thermogenesis, metabolic regulation, freeze tolerance, anaerobiosis, metabolic depression and related processes. For the next four years - until the 12th International Hibernation Symposium - it will serve as a state-of-the-art reference source for every scientist and graduate student working in these areas of physiology and zoology.

Swallowed by the Cold Aug 23 2023 The intricate, interlocking stories of Jensen Beach's extraordinarily poised story collection are set in a Swedish village on the Baltic Sea as well as in Stockholm over the course of two eventful years. In Swallowed by the Cold, people are besieged and haunted by disasters both personal and national: a fatal cycling accident, a drowned mother, a fire on a ferry, a mysterious arson, the assassination of the Swedish foreign minister, and, decades earlier, the Soviet bombing of Stockholm. In these stories, a drunken, lonely woman is convinced that her new neighbor is the daughter of her dead lover; a one-armed tennis player and a motherless girl reckon with death amid a rainstorm; and happening upon a car crash, a young woman is unaccountably drawn to the victim, even as he slides into a coma and her marriage falls into jeopardy. Again and again, Beach's protagonists find themselves unable to express their innermost feelings to those they are closest to, but at the same time they are drawn to confide in strangers. In its confidence and subtle precision, Beach's prose evokes their reticence but is supple enough to reveal deeper passions and intense longing. Shot through with loss and the regret of missed opportunities, Swallowed by the Cold is a searching and crystalline book by a startlingly talented young writer.

Cold Wars Feb 27 2024 Cold Wars tells the story of the common cold, the most widespread disease of all. From ancient Egypt to the space age, colds have plagued mankind, and many attempts have been made to find a cure. Today, we spend millions of pounds on remedies and businesses lose

millions of pounds through employee sickness- but are we any closer to conquering the cold? In the aftermath of the Second World War, a concerted effort was made in the UK to resolve the scientific conundrum of the common cold. A Common Cold Unit was established near Salisbury, making use of some rather primitive facilities provided by the American Red Cross, and for nearly 50 years was part of the British medical establishment. Much of the research was done on volunteers, who came in large numbers to the CCU to spend days in isolation while scientists attempted to give them a cold. Many eminent scientists, including James Lovelock, were part of the attempt to understand the common cold. This book begins with a brief history of colds through the centuries, describing what earlier generations believed and the strange treatments they tried. That the cold was caused by a virus was only uncovered at the beginning of the last century. The authors vividly describe the establishment of the Common Cold Unit, and its work in uncovering the causes and transmission of the cold and analysing possible treatments. Finally, they assess the progress made in recent years in understanding the psychological aspects of colds, and the latest research on prevention and cures. Cold Wars offers a fascinating account of an eccentric, but effective, attempt to unravel the mysteries of the common cold.

The Cold Book Jun 01 2024

[The Penguin who was Cold](#) Mar 25 2021 A poignant and non-didactic exploration of difference, self-acceptance, the power of friendship, and inner strength. Milo is a penguin who, unlike the other penguins, does not like the cold. When he takes a chance and goes on a trip to a faraway place where it's warm, he finds friends who accept him, and with their support he learns to accept himself. When he returns home, he is even able to befriend others who are different. *The Penguin Who Was Cold* is an endearing tale of a young penguin named Milo who does not want to dive into the icy water of the pack ice to catch fish. Unlike his comrades, he stays put, standing alone at the edge of the ice and contemplating the cold sea. When a whale appears and offers to take him on a trip, Milo readily accepts. It is the beginning of a fabulous journey. In the faraway South Seas, Milo is amazed by the colors, the warmth of the water and the air, and most of all the friendly welcome he receives from the tropical animals who accept him for who he is and then give a precious and symbolic gift.

Ah-Choo! Apr 18 2023 Some colds are like mice, timid and annoying; others like dragons, accompanied by body aches and deep misery. In *AH-CHOO!*, Jennifer Ackerman explains what, exactly, a cold is, how it works, and whether it's really possible to "fight one off." Scientists call this the Golden Age of the Common Cold because Americans suffer up to a billion colds each year, resulting in 40 million days of missed work and school and 100 million doctor visits. They've also learned over the past decade much more about what cold viruses are, what they do to the human body, and how symptoms can be addressed. In this ode to the odious cold, Ackerman sifts through the chatter about treatments-what works, what doesn't, and what can't hurt. She dispels myths, such as susceptibility to colds reflects a weakened immune system. And she tracks current research, including work at the University of Virginia at Charlottesville, a world-renowned center of cold research studies, where the search for a cure continues.
