Hull, Author Supplement, 2013-11-01 This is a reader friendly book with an abundance of numerical and real life examples The text explores the fundamentals of futures and options markets and presents an accessible and student friendly overview of the topic without the use of calculus Applied Corporate Finance Aswath Damodaran, 2014-10-27 Aswath Damodaran distinguished author Professor of Finance and David Margolis Teaching Fellow at the NYU Stern School of Business has delivered the newest edition of Applied Corporate Finance This readable text provides the practical advice students and practitioners need rather than a sole concentration on debate theory assumptions or models Like no other text of its kind Applied Corporate Finance 4th Edition applies corporate finance to real companies It now contains six real world core companies to study and follow Business decisions are classified for students into three groups investment financing and dividend decisions **Dynamic Hedging** Nassim Nicholas Taleb, 1997-01-14 Destined to become a market classic Dynamic Hedging is the only practical reference in exotic options hedging and arbitrage for professional traders and money managers

Watch the professionals From central banks to brokerages to multinationals institutional investors are flocking to a new generation of exotic and complex options contracts and derivatives But the promise of ever larger profits also creates the potential for catastrophic trading losses Now more than ever the key to trading derivatives lies in implementing preventive risk management techniques that plan for and avoid these appalling downturns Unlike other books that offer risk management for corporate treasurers Dynamic Hedging targets the real world needs of professional traders and money managers Written by a leading options trader and derivatives risk advisor to global banks and exchanges this book provides a practical real world methodology for monitoring and managing all the risks associated with portfolio management Nassim Nicholas Taleb is the founder of Empirica Capital LLC a hedge fund operator and a fellow at the Courant Institute of Mathematical Sciences of New York University He has held a variety of senior derivative trading positions in New York and London and worked as an independent floor trader in Chicago Dr Taleb was inducted in February 2001 in the Derivatives Strategy Hall of Fame He received an MBA from the Wharton School and a Ph D from University Paris Dauphine **An Engine, Not a Camera** Donald MacKenzie, 2008-08-29 In An Engine Not a Camera Donald MacKenzie argues that the emergence of modern economic theories of finance affected financial markets in fundamental ways These new Nobel Prize winning theories based on elegant mathematical models of markets were not simply external analyses but intrinsic parts of economic processes Paraphrasing Milton Friedman MacKenzie says that economic models are an engine of inquiry rather than a camera to reproduce empirical facts More than that the emergence of an authoritative theory of financial markets altered those markets fundamentally For example in 1970 there was almost no trading in financial derivatives such as futures By June of 2004 derivatives contracts totaling 273 trillion were outstanding worldwide MacKenzie suggests that this growth could never have happened without the development of theories that gave derivatives legitimacy and explained their complexities MacKenzie examines the role played by finance theory in the two most serious crises to hit the world's financial markets in recent years the stock market crash of 1987 and the market turmoil that engulfed the hedge fund Long Term Capital Management in 1998 He also looks at finance theory that is somewhat beyond the mainstream chaos theorist Benoit Mandelbrot's model of wild randomness MacKenzie's pioneering work in the social studies of finance will interest anyone who wants to understand how America's financial markets have grown into their current form
