The Art of Not Being Governed James C. Scott, 2009-01-01 From the acclaimed author and scholar James C Scott the compelling tale of Asian peoples who until recently have stemmed the vast tide of state making to live at arm's length from any organized state society For two thousand years the disparate groups that now reside in Zomia a mountainous region the size of Europe that consists of portions of seven Asian countries have fled the projects of the organized state societies that surround them slavery conscription taxes corvée labor epidemics and warfare This book essentially an anarchist history is the first ever examination of the huge literature on state making whose author evaluates why people would deliberately and reactively remain stateless Among the strategies employed by the people of Zomia to remain stateless are physical dispersion in rugged terrain agricultural practices that enhance mobility pliable ethnic identities devotion to prophetic millenarian

leaders and maintenance of a largely oral culture that allows them to reinvent their histories and genealogies as they move between and around states In accessible language James Scott recognized worldwide as an eminent authority in Southeast Asian peasant and agrarian studies tells the story of the peoples of Zomia and their unlikely odyssey in search of self determination He redefines our views on Asian politics history demographics and even our fundamental ideas about what constitutes civilization and challenges us with a radically different approach to history that presents events from the perspective of stateless peoples and redefines state making as a form of internal colonialism This new perspective requires a radical reevaluation of the civilizational narratives of the lowland states Scott s work on Zomia represents a new way to think of area studies that will be applicable to other runaway fugitive and marooned communities be they Gypsies Cossacks tribes fleeing slave raiders Marsh Arabs or San Bushmen

**Gaia and the New Politics of Love** Serena Anderlini-D'Onofrio,2010-08-31 WINNER 2010 Nautilus Silver Book Award Cosmology New Science Gaia theory argues that the flora and fauna of the planet operate in a self regulating web that keeps the world livable According to the theory humankind is the most powerful species in this web and also its biggest threat This provocative book explores ways to minimize and ultimately eliminate this threat with love and intimacy Controversial Italian author Serena Anderlini D Onofrio has authored the first global ecology study based on an analysis of human health Anderlini D Onofrio identifies her remedy within the context of Gaia theory re envisioning it as a more inclusive philosophy that positively impacts not only relationships but world ecology under duress The author links human sexuality to the global ecosystem claiming that freedom from fear will stimulate a holistic health movement powerful enough to heal relationships and restore planetary balance Gaia and the New Politics of Love is bracing in its range weaving together issues of human and global health the relationship of politics sexuality and ecology practices and styles of love the changing roles of eroticism and gender in our lives and polyamory bisexuality and the AIDS reappraisal movement Clarification Statement from the Author The argument of this book emphasizes the arts of loving as a way to help humanity make peace with our hostess

Gaia the third planet Some of these arts involve sharing emotional resources and amorous partners Often the arts of loving require the use of barriers mechanical protections such as condoms At times they do not because only tantric energies are exchanged The author of this book is persuaded that barriers are recommendable when sexual practices result in the exchange of deep body fluids unless previous fluid bonding arrangements have been made The author is also persuaded that good practices of holistic health contribute to strengthening the immune systems of those who engage in the arts of loving Safety practices are important in making the arts of loving healthy regardless of what factors are involved in the syndromes most prevalent today including AIDS and other conditions in the STD spectrum Historically disagreement has moved knowledge forward Today s science is the result of yesterday s disagreements and controversies The author believes in critical thinking and she respects dissidence in science today including Gaia science reappraisals of AIDS and holistic medicine She hopes her readers will be open to hearing more than one side of a story This statement and the contents of this book do not constitute medical advice in any way Readers are invited to consult their own healers and health care providers

harmless children compared to the new ones rising from the shadows      **The Clockwork Three** Matthew J. Kirby,2012-02-01 Three ordinary children are brought together by extraordinary events Giuseppe is an orphaned street musician from Italy who was sold by his uncle to work as a slave for an evil padrone in the U S But when a mysterious green violin enters his life he begins to imagine a life of freedom Hannah is a soft hearted strong willed girl from the tenements who supports her family as a hotel maid when tragedy strikes and her father can no longer work She learns about a hidden treasure which she knows will save her family if she can find it      Fishers, Monks and Cadres Edyta Roszko,2021-03-31 This remarkable and timely ethnography explores how fishing communities living on the fringe of the South China Sea in central Vietnam interact with state and religious authorities as well as their farmer neighbors even while handling new geopolitical challenges The focus is mainly on marginal people and their navigation between competing forces over the decades of massive change since their incorporation into the Socialist Republic of Vietnam in 1975 The sea however plays a major role in this study as does the location a once peripheral area now at the center of a global struggle for sovereignty influence and control in the South China Sea The coastal fishing communities at the heart of this study are peripheral not so much because of geographical remoteness as their presumed social awkwardness they only partially fit into the social imaginary of Vietnam s territory and nation The state thus tries to incorporate them through various cultural agendas while religious reformers seek to purify their religious practices Yet recently these communities have also come to be seen as guardians of an ancient fishing culture important in Vietnam s resistance to Chinese claims over the South China Sea The fishers have responded to their situation with a blend of conformity co option and subtle indiscipline A complex triadic relationship is at play here Within it are various shifting binaries for example secular religious fishers farmers local ritual Buddhist doctrine and so forth and different protagonists state officials religious figures fishermen and women who construct enact and deconstruct these relations in shifting alliances and changing contexts Fishers Monks and Cadres is a significant new work Its vivid portrait of local beliefs and practices makes a powerful argument for looking beyond monolithic religious traditions Its triadic analysis and subtle use of binaries offer startlingly fresh ways to view Vietnamese society and local political power The book demonstrates Vietnam is more than urban and agrarian society in the Red River Basin and Mekong Delta Finally the author builds on intensive long term research to portray a region at the forefront of geopolitical struggle offering insights that will be fascinating and revealing to a much broader readership      *The Ethical Slut* Dossie Easton,Janet W.
