Worldwide Green Jobs Resource This book is the ideal guide to equipping you with the tools and know-how to develop an environmental career. It is filled with practical advice, case studies, personal profiles and top tips across the global environment sector. An essential resource for anyone, from school students to those who are already in work but dreaming of a more meaningful career. "This new book comes at exactly the right moment. There has never been a more critical time for effective, international action on our common ecological crisis, and success in that work requires a new generation of 21st Century environmental professionals." Kevin Doyle, Executive Director, Office of Career and Professional Development, Yale School of the Environment "As an experienced green career coach, the top questions I hear from green job seekers are, "What are the green jobs out there, which ones would be a good match, how do I get my foot in the door, and where do I find these jobs?" Taberham's book answers all of these in a refreshingly approachable way.' Lisa Yee-Litzenberg, President, Green Career Advisor LLC "One of the biggest challenges environmental career seekers face is understanding and muddling through the opportunities available to them based on their experience, education, and interest. Taberham's book is a great resource to help people navigate their options and grab some tips for the career journey.' Laura Thorne, The Environmental Career Coach 'A fantastic book

for those who are interested in pursuing a role in sustainability. Jam-packed with helpful resources, career insights, and real-life case studies this is a go-to resource for professionals who are launching their careers.' Sharmila Singh, New Lens Consulting 'Justin Taberham provides an impressive global overview of a multifaceted, ever-changing sector that continues to evolve rapidly due to advances in technology and knowledge, changes in funding and incentives, and shifts in priorities and laws.' Carol L. McClelland, PhD, Author of Green Careers for Dummies Expert guidance on exploring and choosing the perfect job for you. Describes jobs in a variety of fields that deal with environmental issues. (ages 13 and up) This inspiring guide to green careers includes profiles of 30 young professionals who have found success in environmental careers. Along with the fascinating interviews, readers will discover interesting eco - tidbits, career - planning resources, and useful information about universities and environmental organizations. Turning worm poop into multi - million - dollar empires. Flying airplanes through hurricanes. Using flowers and trees to brighten the lives of kids and ex - cons. Staring down grizzly bears in the Canadian Rockies. Saving chimps in Tanzania. And strutting their hip eco - friendly frocks on the streets of Hollywood. From the icebergs of the Arctic Ocean to the jungles of Africa, these bold eco - pioneers will show readers how to help save the planet ... and earn a paycheck at the same time. Environmental policies and initiatives have had a significant impact on businesses and employment practices across Europe. The Environment, Employment and Sustainable Development is a wide-ranging collection featuring contributions by academics and practitioners from countries including the UK, Spain, Switzerland, France, Belgium, The Netherlands and Ireland. Subjects covered include: * the effects of EU environmental directives, programmes and legislation and global conventions and agreements * assessment of environmental training, education and qualifications across Europe * national and international case studies * the commercial logic for businesses in 'going green' * examination of the growth in the public and

private sector of career opportunities for those with environmental expertise. Green jobs represent one of the fastest growing and changing segments of the global economy. You have an opportunity to introduce young people to career paths that are not only in demand, but that are also rewarding and help conserve the environment. Green Jobs: Exploring Forest Careers contains four learning activities that engage youth in actively exploring forest-related green careers. Anyone can use this resource with youth ages 12-25 in settings ranging from community youth programs and school classrooms, to college and career prep, to field trips and forest tours. Designed to be flexible, use individual activities or use the entire set as a stand-alone unit. The guide also contains a quiz that helps youth match their personality with an array of green jobs opportunities, and a self-assessment of their technical and other skills, such as communication and problem solving. Appendices include a list of career information websites, job boards and connections to academic standards. Earn green by going green with your career choice! You've worked hard for that environmental studies degree. Now what? Sometimes the choice of careers can seem endless; the most difficult part of a job search is narrowing down your options. Great Jobs for Environmental Studies Majors will help you choose the right career out of the myriad possibilities at your disposal. It provides detailed profiles of careers in your field along

with the basic skills necessary to begin a focused job search. You'll soon be on the fast track to landing a job that satisfies your personal, professional, and practical needs. Great Jobs for Environmental Studies Majors will help you: Determine the occupation that's best suited for you Craft a résumé and cover letter that stand out from the rest Learn from practicing professionals about everyday life on the job Become familiar with current statistics on salaries and trends within the profession Go from environmental studies major to: conservation scientist * naturalist * legislative advocate * consultant * environmental planner * biologist * park ranger * compliance officer This is a comprehensive yet practical guide for job seekers looking for green career opportunities. Green Collar Jobs: Environmental Careers for the 21st Century is a simple, easy-to-reference guide that will help students, recent graduates, job seekers, and career changers at all levels find the latest information and job resources in this burgeoning new field. This exceptionally timely book examines all aspects of green careers, beginning with an overview discussing green jobs from environmental, economic, and political perspectives. The core of the book is comprised of chapters that describe specific types of green jobs and career paths. These include jobs related to alternative energy, water resources, green marketing, green business, green building, and environmental law. For those willing to leave home, there is a

chapter on global environmental jobs, and there is information on niche green careers such as ecotourism and green interior design. Each chapter includes job sources, education and training resources, and a listing of companies involved in the particular business. Careers for Environmental Types and Others Who Respect the Earth lets career explorers look at the job market through the unique lens of their own interests. The book reveals dozens of ways to pursue a passion and make a living—including many little-known but delightful careers that will surprise readers. If you are ecologically minded and wish you had a job that allowed you to work on environmental issues, then this book is for you. Careers for Environmental Types describes dozens of jobs in a wide variety of disciplines, in the public and private sectors. Provides information on careers in cleaning up hazardous materials that pollute the environment, discussing employers working conditions, workplaces, and training. Presents information needed to learn about the careers available in the environmental field. Designed for those wishing to pursue a career related to the environment, this handbook covers: career opportunities; course and qualification guidance; application and recruiting procedures; and recent trends which will affect career choice. Updated to reflect ongoing changes in environmental fields, this text is a resource for anyone seeking information about environmental career opportunities and how to get started in one. Highlights include trends in

employment opportunities and additional material on careers in the energy field. Once it was just a good cause. Now, it's become a good career choice ... The Environmental Career Guide Look at the facts: Manufacturers are racing to develop environmentally safe (a.k.a. "green") products Hiring is up at the U.S. environmental protection agencies Environmental law is one of the hottest new fields in law schools today Would you like to become a part of this exciting, rewarding, and growing industry? This book will show you the way. The Environmental Career Guide shows you what you need to know to find the job of your dreams. You'll find out what key skills are needed, how to find employers engaged in environmental activities, how to package your experience or education to make a compelling case for employment, and much more. You'll get inside information on the different hiring policies of environmental businesses. You'll get lists of key environmental businesses—like manufacturing, government agencies, engineering consulting firms, and waste handling firms. And you'll get lists of key professional careers in environmental conservation—like chemistry, biology, financial analysis, law, and fund raising. Provides an overview of green jobs, presents profiles of ninety different occupations, offers case studies and interviews, and includes career planning information and job search resources. Strong, impressive resumes that lead to the right job! For job seekers wanting to create effective

resumes that hit the target every time, the VGM Professional Resumes series is here to help them reach that goal. Each book in the series offers essential advice plus 100 sample resumes and 20 cover letters tailored to a job seeker's needs or field of interest.
