Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. Does a giant hairy apelike creature roam the forests and swamps of North America? If so, this huge creature has managed to keep pretty well hidden, but is seen from time to time. Bigfoot is seen lurking in the shadows of strip malls in the Pacific Northwest and photographed walking across a stream or hiding behind a tree. He is watching hikers as they move through the forest and occasionally kidnaps children or murders solitary people who are in the woods. Childress gives us the latest bigfoot sightings and photos and looks at how the hairy giant has crept into the American psyche as time goes on. Childress starts at the beginning, telling the story behind an apparent bigfoot photo from the 1800s, and the tale of how the creature got its name in the 1950s. Bigfoot is present throughout the country, and Childress relates stories of sightings Back East, in the American Southwest, California and Pacific Northwest. He discusses bigfoot that make lots of noise, and presents photos throughout, including a special eight-page color photo section. More and more sailors and powerboaters are buying and relying on electronic and electric devices aboard their boats, but few are aware of proper installation procedures or how to safely troubleshoot these devices if they go on the blink. Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle. Through the use of humour, fun exercises, and a plethora of innovative and interesting selections from writers such as Dave Barry, Al Franken, J.R.R. Tolkien, as well as from the film 'The Matrix', this text hones students' critical thinking skills. FIELD & STREAM, America's largest outdoor sports magazine, celebrates the outdoor experience with great stories, compelling photography, and sound advice while honoring the traditions hunters and fishermen have passed down for generations. Louisiana is the Bayou State, a state that seems to have experienced more than its share of storms in recent years. The story is set in the 1950s. Those were the years; they were my years, my world, my generation. The life and legends of Louisiana bayou country come alive in this historical fiction/fantasy. The cast of characters alone, make for action packed adventure and thrilling entertainment. In November 1991 the American flag was lowered for the last time at Clark Air Base in the Philippines. This act brought to an end American military presence in the Philippines that extended back over 90 years. It also represented the final act in a drama that began with the initial rumblings in April of that year of the Mount inatubo volcano, located about nine miles to the east of Clark. This book tells the remarkable story of the men and women of the Clark community and their ordeal in planning for and carrying out their evacuation from Clark in face of the impending volcanic activity. It documents the actions of those who remained on the base during the series of Mount Pinatubo's eruptions, and the packing out of the base during the subsequent months. This is the story of the Ash Warriors, those Air Force men and women who carried out their mission in the face of an incredible series of natural disasters, including volcanic eruption, flood, typhoons, and earthquakes, all of which plagued Clark and the surrounding areas during June and July 1991. Small Gas Engines provides practical information about the construction and operation of one-, two-, and three-cylinder; two- and four-cycle gasoline engines. Detailed information about specific applications, maintenance, lubrication, troubleshooting, service, rebuilding, and repair is presented. The text is written in clear, nontechnical language. This edition is up-to-date with the latest advances in small gas engine technology. Thomas Gilovich offers a wise and readable guide to the fallacy of the obvious in everyday life. When can we trust what we believe—that "teams and players have winning streaks," that "flattery works," or that "the more people who agree, the more likely they are to be right"—and when are such beliefs suspect? Thomas Gilovich offers a guide to the fallacy of the obvious in everyday life. Illustrating his points with examples, and supporting them with the latest research findings, he documents the cognitive, social, and motivational processes that distort our thoughts, beliefs, judgments and decisions. In a rapidly changing world, the biases and stereotypes that help us process an overload of complex information inevitably distort what we would like to believe is reality. Awareness of our propensity to make these systematic errors, Gilovich argues, is the first step to more effective analysis and action. Gathers quotations about agriculture, anthropology, astronomy, the atom, energy, engineering, genetics, medicine, physics, science and society, and research The author of the controversial bestseller Brain Trust brings his scientific expertise to the chilling true story of unexplained phenomena on Utah's Skinwalker Ranch -- and challenges us with a new vision of reality. For more than fifty years, the bizarre events at a remote Utah ranch have ranged from the perplexing to the wholly terrifying. Vanishing and mutilated cattle. Unidentified Flying Objects. The appearance of huge, otherworldly creatures. Invisible objects emitting magnetic fields with the power to spark a cattle stampede. Flying orbs of light with dazzling maneuverability and lethal consequences. For one family, life on the Skinwalker Ranch had become a life under siege by an unknown enemy or enemies. Nothing else could explain the horrors that surrounded them -- perhaps science could. Leading a first-class team of research scientists on a disturbing odyssey into the unknown, Colm Kelleher spent hundreds of days and nights on the Skinwalker property and experienced firsthand many of its haunting mysteries. With investigative reporter George Knapp -- the only journalist allowed to witness and document the team's work -- Kelleher chronicles in superb detail the spectacular happenings the team observed personally, and the theories of modern physics behind the phenomena. Far from the coldly detached findings one might expect, their conclusions are utterly hair-raising in their implications. Opening a door to the unseen world around us, Hunt for the Skinwalker is a clarion call to expand our vision far beyond what we know. Ultimate Bass Boats is the definitive guide-book to bass boats and bass boating. From choosing a bass boat that fits your fishing style to boat rigging tips for top performance, Ultimate Bass Boats is a complete resource for the dedicated bass angler. How-to expert and experienced outdoorsman Monte Burch takes an in-depth look at the extraordinary watercraft that power anglers in pursuit of America's most popular game fish. Ultimate Bass Boats provides a comprehensive look at the modern bass boat. Learn how the top bass pros rig their boats for speed, performance, and fishability and discover the inside boat rigging secrets of the bass tournament pros. Other sections explain how to choose the best outboard and how to achieve top performance and maximum efficiency. Monte Burch teaches you the art of driving a bass boat like a professional whether at top speed or while stalking that big lunger with a trolling motor. Stoeger's new Ultimate Bass Boats includes a set of detailed, step-by-step instructions that let you rig your own 16-foot custom aluminum bass boat. From adjustable fishing seats to a quick release trolling motor mount, master how-to author Monte Burch provides all the direction you need to build a fully-outfitted bass boat. Stand-Alone, Menu-Driven Software Designed to Produce Catalog Cards & Labels for Spine, Book Pocket, & Circulation Cards in Conformity with AACR II Standards. Now Compatible with Laser Printers. The Save Feature Allows the Operator to Save the Material Input During a Session & Print It Out Later; Allows the Operator to Make Changes after a Set of Cards & Labels Has Been Produced & Print Out a New Set; Prints Acquisition Lists Sorted by Author, Title, or Call Number; & Allows Transfer of Data Saved on Disk to On-Line Catalogs & Database Programs
